**THE DAIRY BUSINESS**

WONDERFUL GROWTH IN UNION COUNTY.

Pays Handsome Profits to Farmers, Stimulates Good Road Building and the Growing of Better Forage Crops to Produce Milk.

Within the past two years the dairying business of Union county has increased at least twofold. It is estimated that there are now 600 cream separators owned and operated in the county. Farmers now haul cream from every portion of the county to North Powder and Union, where the creameries are located. Besides the great amount hauled in, hundreds of gallons are shipped by rail from distant points.

Several farmers haul their output as far as 18 miles, making the trip twice a week. The separator has been made the greatest producer of profits of any small invention of the farm. The farmer separates his milk and cream at home, the small bulk of the pure cream making the task of delivery simple and convenient. One can of 20 gallons' capacity will hold the cream from three days' milking on 12 cows, and the skimmer milk can be used each day to feed pigs, calves and chickens.

Almost every farmer in the county is now furnishing cream to one of the creameries and men who heretofore would not handle any enterprise less than a 160-acre farm, are milking from four to six cows at a handsome weekly profit.

The output of the creameries finds ready market in the mines of Baker county and much of it is shipped to Portland, and more would be shipped there if cheaper rates could be secured.

In the winter season the creameries have been compelled to run half time on account of the scarcity of winter milk cows and impassable roads, but it is the intention of the dairy and creamery people to establish winter routes and prepare enough good cows to keep the creameries running all winter.

More attention is being paid to the growing of dairy forage feeds, and the business promises to take a lead in Union county within a very few years.

One man who had exceptionally good cows claims to have netted \$90 per month on 12 head, during the months of April, May and June, while the bunchgrass was good.

With the decreasing range area, upon which large herds of cattle were formerly ranged, the farmer finds it necessary to turn his attention to other profitable branches that can be handled on a smaller area. The business is stimulating the building of good country roads, the growing of better breeds of milkers and the production of diversified crops to produce milk.

**DOES YOUR SCALP ITCH?**

Are Your Hairs Dropping One by One!

If your scalp itches you are doubtless suffering from dandruff. The dandruff germ is digging up your scalp in little flakes, called dandruff, and sapping the life of the hair bulb. No hair preparation that is a mere hair stimulant and tonic will cure dandruff, because it won't kill the germ that causes the trouble. Newbro's Herpicide is the latest scientific discovery; and it will kill the dandruff germ. Destroy the cause and you remove the effect; Kill the germ and you will have no more dandruff, falling hair or baldness. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich. F. W. Schmidt & Co., special agents.

**USE PURE ICE INSTEAD.**

Don't Run Any Risk—Use Ice From Boiled and Distilled Water.

Owing to the low stage of the water in the city well it has been found necessary to pump some of the supply from the channel of the river. For this reason it is thought best by Dr. Cole, the city health officer, to call the attention of the public to the advisability of boiling the water used for drinking purposes.—E. O. July 22.

Better use pure ice, made from water that has been both boiled and distilled. It is cheaper than you can boil the water. Ross Ice Co., Phone Main 1781.
