THE OLD, OLD STORY. Mrs. Uptowne-Horace, who was Richard the Third referring to in that scene where he says 'I have her, but I will not keep her long?' Uptowne—Oh! probably to a new cook he had just engaged.

THE WORLD'S CROP

YIELD FOR 1903 WILL BE THREE BILLION BUSHELS.

Harvest Season in Different Countries—Cost of Producing Wheat—Average Profit Per Acre in all the Great Wheat Belts of the World.

Ten million men and several million women are in the midst of the greatest wheat harvest in the history of the world. It is estimated that the wheat crop this year will reach three billion bushels, by far the largest ever gathered.

Wheat is the oldest cereal of which there is any record, being spoken of in the Bible as the "staff of life," and known to have existed 2,700 years B. C.

Modern methods of harvesting grain have invaded many of the foreign lands since Mr. Cyrus McCormick built the first reaper in 1831, and his machines, which have been improved upon from time to time, have been the real reason for the increase in wheat production.

Think of ten thousand acres of ripened grain in one field, which must be cut within four or five days. A sufficient number of men could not enter the field to do the work by hand alone.
