Corner Main and Alta

## BEEF OUTPUT SHORT

BUT FIFTY PER CENT OF USUAL AMOUNT TO BE FED.

Butter Creek Crops Short and Demand From Heppner Very Strong—No Cattle Changing Hands—Hay \$6 Per Ton in the Field, Against \$4.50 Last Year.

Reports from the Echo district say that there will not be over 50 per cent of the usual number of cattle fed in that locality the coming winter. The first cause of this shortage is the great amount of hay bought up on the Butter Creek farms, by Heppner people, as a result of the loss of crops by the cloudburst, and the second cause is a natural shortage in the alfalfa crop, in the Butter Creek district.

Hay is now selling in the field, in the Echo district, at \$6 per ton, while last year, at this time, it could be bought for \$4.50. The crop is estimated to be 20 per cent short, while the amount purchased by Heppner people, will bring the amount left in the home stack yards, available for use in feeding, to about 50 per cent of the usual amount, fed out to beef cattle during the winter season.

There has been an increase of 20 per cent in the alfalfa acreage, in the Butter Creek and adjacent alfalfa belts, this year. Almost every farmer in the locality has plowed out and seeded some new land, or converted old farming land into alfalfa meadow, and while the water supply is sufficient to irrigate an increase of a like amount, each year, for a number of years, there is also a gradual increase in the ditch mileage, each season.

The Butter Creek country is more favored than other irrigated communities, in that one good winter flooding will produce two crops. Less water is required to grow alfalfa, in this district, than in any other locality on the Pacific Coast.

There is very little movement in the cattle business this fall on account of the high price of hay. No calves or beef stock are changing hands, and those who have both hay and cattle are holding on to them.

Last year over 150 carloads of fat cattle were shipped from the Echo country to the Sound and Portland markets. This year it is estimated that not over 75 or 80 cars will be fed, reducing the output of the district from about 4,000 head fed and shipped last year, to about 2,500 head this year.

### NEW PROGRAM AT PARK.

Large Crowd Present Last Night to Witness New Professional Bill.

A large crowd was present at Shields' Park last night to witness the new professional bill. Baby Owens appeared in the "Honey-moon," and was well received. Zoyerra, in his marvelous revolving globe act, made a good impression with the audience and will be a winner for the week.

Athon, Wilson and Clark presented in a very able manner, the comedy sketch, "What Happened to Brown." The new pictures on the polyscope and the new illustrated songs were well received.

The new side exit from the park meets with the hearty approval of the patrons, as it is not now necessary to wait so long to get out after the performance is over.

An entirely new professional bill will be presented on Thursday night. Baby Owens will appear in a scene from "The Burglar," on that night. A large list of amateurs has been selected by the management also. Tickets at Brock & McComas' drug store.

### OUTLOOK FOR PRUNES.

Oregon Will Have Banner Crop—Demand From Europe Growing.

Portland, Aug. 18.—Prune growers are looking hopefully forward to a profitable season this year. Until August 1 it was estimated by experts that Oregon would have the largest prune crop in its history, some placing it at 30,000,000 pounds, but unofficial reports have been coming in from some sections of the Willamette valley and from Clark county, Wash., to the effect that a heavy drop was taking place. It is found, however, that the drop has been extensive only in orchards which have not been well attended to, while in well cultivated and well cared for orchards there has been practically no drop, and in some the crop is better than ever before. The state board of horticulture will endeavor to ascertain just how extensive this drop has been and what effect it will have on the June estimates.

### For Rent.

I have remodeled the upstairs of the Despain block and have some of the nicest dance rooms in the city. Call and see them.

## IS A GOODLY LAND

JOHN DAY COUNTRY IS NOT UNDERSTOOD.

Has Vastly More Possibilities Than Generally Supposed—its Greatest Needs Are Railroads and Systematic Development—The People Now Living There Are Prosperous.

J. B. Despain and James Spence have returned from an eight-day trip into the Ritter and Long Creek part of the John Day country, and report that to be a wonderful country. The country is mountainous and rough, but is settled in a scattered way. Looking from peak to peak, it would not seem that there could be profit in living there at any point, so rough and shaggy is the land, but on closer inspection it is found that little ranches are nestled here and there in the heart of the mountains, and all the inhabitants are prosperous and doing well.

The farms there are not situated in the valleys as here, but are perched on the tops and the sides of the mountains—hung here and there in the little cups and hollows of the canyon sides. Fields containing from 20 to 100 acres are cultivated in this way and in these fields almost everything can be raised. Corn and tomatoes and melons grow well, and wherever there is no rock, be it on top of the highest mountain or in the valley, grain can be grown with profit. It is a curious and at the same time a wonderful country.

The chief interests of the country

are centered in the stock business, and all of the corn that is raised there is cut and saved for the winter feed of the cattle. It is shocked in the fields and allowed to stand until dry and is then fed to the animals as needed. It makes better feed than anything else that can be raised, and the stock fatten faster on less feed when they are fed on the corn, than by any other means.

A. E. Batson was hanged at Lake Charles, La., for the murder of the Earl family of six persons in 1902. Robbery was the motive for the murder.

### WHAT MADE IT SO?

Many people are coming in with the report that the wheat is better than they thought, large, plump and fine. Many people are coming in with the report that the shoes sold at the big Boston Store are better than others and they want some of them. They are large, plump and fine. It is a fact we do pay the manufacturer more for a shoe to sell at a given price than others do, and thus we secure greater value. We sell shoes at a less expense per dollar's worth than any other concern in the city, and therefore we can afford to handle such lines as the Douglas for men, Gloria for women, and Red School House for children.

Douglas is the largest manufacturer of well shoes to sell at \$3, \$3.50 and \$4 in the world, and we certainly have a representative line, one that will astonish you. The Gloria \$3.50 shoe for women is the best shoe at this price sold the American public today. We find each season an increase of trade—why is it? Merit that confirms buying opinion. Good wear combined with good looks and comfort. Oh yes, we must not overlook the Red S. H. shoes. They fit the school boys and girls. We have kinds for each. I believe you had better get the next pair at the

THE BOSTON STORE.
