

Ask Your Doctor

He will tell you—
That barley-malt is a half-digested food, as good as food can be.
That hops are an excellent tonic.
That the little alcohol in beer—only 3½ per cent—is an aid to digestion.

But Purity is Essential

But he will tell you that beer must be protected from germs, and brewed in absolute cleanliness.
He'll say, too, that age is important, for age brings perfect fermentation. Without it, beer ferments on the stomach, causing biliousness.

Schlitz beer is brewed with all precautions. It is the recognized standard all the world over, because of its purity.

OHIO REPUBLICANS

ARE PLANNING TODAY TO DEFEAT THE DEMOCRATS.

Believed That the Issue Will Be to Compass the Defeat of Tom Johnson—Not Yet Known Who Will Head Either Ticket This Fall.

Columbus, O., Aug. 21.—The Ohio republicans are planning to open their campaign about three weeks hence. The occasion will mark an epoch in the political history of the Buckeye state. A very distinguished list of party leaders will be in attendance, and preparations for the event are now advancing on a large scale. The hard work of the republican state committee is now devoted to the legislative phase of the campaign, for this is where the chief trouble is expected.

The democrats have not completed plans for their campaign. It will be a vigorous one, however, and will be commenced as soon as the ticket is named next week. As to the ticket, there is no longer much doubt that it will be headed by Mayor Tom L. Johnson of Cleveland. John L. Zimmerman, of Springfield, is the only other person mentioned in connection with the gubernatorial nomination and the announcement last week by Mr. Johnson that he would accept the nomination if it would tend to strengthen the legislative situation, has had a depressing effect on the Zimmerman forces.

The Center of the Fight.

Whether or not Mr. Johnson heads the ticket he is certain to be the center and life of the democratic state campaign. Chairman Dick of the republican state committee intimates that the nomination of Mr. Johnson will suit republican leaders. The republicans have looked with great disfavor and some apprehension upon the prominence taken in politics by Cleveland's mayor. They openly say that the thing to be most desired from their viewpoint is to eliminate Mr. Johnson from the political map of Ohio.

If Mr. Johnson is named as the man to head the democratic ticket, General Dick and Senator Hanna seem to be of the opinion that they can deliver him a body blow. It is believed that if Mr. Johnson receives the nomination unusual efforts will be made by the republicans to roll up a tremendous vote in the hope of blasting the political future of the mayor at one stroke. The republican leaders are anxious about the matter for the reason that they have figured out apparently that, unless Mr. Johnson is personally a candidate, they will still have to deal with him in the state, even if he goes upon the stump and the republicans are victorious.

The outlook for a strenuous campaign is excellent just at this time, and the fact that a governor and a legislature which will select a senator are to be elected, will intensify the interest from this time on.

IRRIGATION CONGRESS.

Coming Session at Ogden a Very Important One.

Ogden, Utah, Aug. 21.—Indications are abundant that the eleventh national irrigation congress which meets in this city next month will be the most important and interesting gathering of its kind ever held in America. The agricultural department at Washington is taking an especial interest in the convention, and word has been received from Secretary Wilson that he will have as many scientists of that department attend the gathering as can be conveniently spared.

The exhibition of fruits and cereals grown under irrigation promises to be one of the most interesting features of the congress. A number of valuable prizes have already been offered for the best exhibits and a long list of premiums is expected before the exhibition opens. Senator Clark, of Montana, is out with an offer of a \$500 loving cup for the best exhibit of green fruits, and Colonel Frederick Pabst, of Milwaukee, makes a similar offer for the best barley exhibit.

IOWA STATE FAIR.

Expected to Be Finest in the History of the State.

Des Moines, Iowa, Aug. 21.—The Iowa State Fair, which was formally opened today, bids fair to eclipse all of its predecessors in several respects. During the last year the grounds have been considerably improved and several new buildings constructed. Notwithstanding these increased accommodations the exhibits are so numerous that the housing facilities are taxed to the utmost.

The agricultural, horticultural, livestock and swine departments are particularly well filled. The special amusement features are also unusually numerous and of an exceptionally high class. Railroad officials are looking forward to record-breaking crowds of visitors from all sections of the state during the coming week.

BOSTON WOMEN LAWYERS.

Three Were Sworn in Today—One Brilliant Record.

Boston, Mass., Aug. 21.—Of the scores of more young women who endeavored to obtain admission to the

bar in Massachusetts this year only three proved to be eligible and these were sworn in today, the ceremonies being attended by prominent lawyers and judges and other interested spectators. The three successful candidates were Marion E. Dunbar, of Boston; Lillian Belle Moulton, of Medford, and Ethel Twycross, of Somerville.

The last named has the distinction of being the first woman to complete the prescribed course of study in two years and that at the earliest age at which anyone is permitted to leave the Boston University law school—21 years—and with probably the highest marks ever attained by a woman. Miss Twycross intends to begin her practice in Boston next month and will devote herself to probate work.

LAST DAY OF CAMP.

No Falling Off in Interest or Attendance.

San Francisco, Cal., Aug. 21.—Though this was the last day of the official program of the Grand Army encampment, there was no falling off of interest apparent on the part of the thousands of veterans and other visitors. The encampment held a concluding business session at which the unfinished business was got out of the way. Hundreds of the veterans visited Oakland, Alameda and other suburban cities this afternoon and were objects of elaborate entertainment on the part of the citizens of those places. Special exercises of an interesting nature will be held in the Mechanics' Pavilion tonight as a fitting wind-up of the great gathering. Tomorrow night will see the majority of the visitors turn their faces homeward. Many have arranged to visit Yosemite valley, the big tree forests and other places of interest in California before proceeding homeward.

End of Bitter Fight.

"Two physicians had a long and stubborn fight with an abscess on my right lung," writes J. F. Hughes, of DuPont, Ga., "and gave me up. Everybody thought my time had come. As a last resort I tried Dr. King's New Discovery for Consumption. The benefit I received was striking and I was on my feet in a few days. Now I've entirely regained my health." It conquers all coughs, colds and throat and lung troubles. Guaranteed by Tallman & Co.'s drug store. Price 50c and \$1. Trial bottles free.

Tennessee Insurance Men.

Chattanooga, Tenn., Aug. 21.—The Tennessee Fire Insurance Agents' Association began its fifth annual convention today at Lookout Inn, and will continue in session through tomorrow. Some of the topics scheduled for special consideration at the meeting are as follows: Superfluous agencies, legislation, the duty of the local agent in peace and war, the best system of office work and soliciting, the country agency, and the best system for secretary and agent in regard to rates.

Monument to Hale Johnson.

Newton, Ill., Aug. 21.—In the presence of a number of prohibition leaders from various parts of the country, the Hale Johnson monument was unveiled here today with interesting ceremonies. Mr. Johnson was chairman of the prohibition state committee and national committeeman at the time of his murder, election day of last year. He was vice-presidential candidate on the prohibition ticket in 1896.

To Launch Pennsylvania.

Philadelphia, Pa., Aug. 21.—Arrangements have been completed at Cramps' shipyards for the launching of the armored cruiser Pennsylvania. The event will be accompanied with interesting ceremonies in which Governor Pennypacker and other officials of the state of Pennsylvania, the municipal officers of Philadelphia, and representatives of the navy will take part.

For Rent.

I have remodeled the upstairs of the Despain block and have some of the nicest once rooms in the city. Call and see them. C. C. BERKELEY.

ODD FELLOWS MEET

NATIONAL CONVENTION IN SEPTEMBER AT BALTIMORE.

First Organization of the Independent Order Was in This City—Over Sixty Thousand Visitors Are Expected—Goodwin, of Georgia, Will Preside.

Baltimore, Md., Aug. 21.—Letters are being received daily at the office of the grand secretary of the Sovereign Grand Lodge of Odd Fellows from suburban lodges indicating an unusually large attendance at the national meeting of the order which is to be held in Baltimore, beginning one month from today. It is particularly appropriate that the convention should be held in this city, as it was here that the order was given birth in America. Washington lodge, No. 1, is known as the "mother lodge," and during the coming convention a number of interesting relics connected with the early days of the order will be exhibited to the visitors. One of the most interesting of these relics is the chair used by Thomas Wildley, founder of the order in America. The chair is still in a good state of preservation.

It is estimated that the number of visitors at the coming convention will pass the 60,000 mark. Letters have been received stating that large delegations will be on hand from Michigan, Georgia, Illinois, Indiana, Colorado, New York, Pennsylvania, Ohio and a number of other states. There will be no grand officers elected this year, each being elected for a term of two years, and the election having been held last year. The present grand sire, who will preside over the proceedings of the convention, is John B. Goodwin, of Atlanta, Ga.

To Look Well

CRUSHES OUT THE LIFE

The most loathsome and repulsive of all living things is the serpent, and the vilest and most degrading of all human diseases is Contagious Blood Poison. The serpent sinks its fangs into the flesh and almost instantly the poison passes through the entire body. Contagious Blood Poison, beginning with a little ulcer, soon contaminates every drop of blood and spreads throughout the whole system. Painful swellings appear in the groins, a red rash and copper colored spots break out on the body, the mouth and throat become ulcerated, and the hair and eye brows fall out; but these symptoms are mild compared to the wretchedness and suffering that come in the latter stages of the disease when it attacks the bones and more vital parts of the body. It is then that Contagious Blood Poison is seen in all its hideousness. The deep eating abscesses and sickening ulcers and tumors show the whole system is corrupted and poisoned, and unless relief comes soon this serpent disease tightens its coils and crushes out the life. The only antidote for the awful virus is S. S. S. It is nature's remedy, composed entirely of vegetable ingredients. S. S. S. destroys every vestige of the poison, purifies the blood and removes all danger of transmitting the awful taint to others. Nothing else will do this. Strong mineral remedies, like mercury and potash, dry up the sores and drive in the disease, but do not cure permanently. Send for our home treatment book and write us if in need of medical advice or special information. This will cost you nothing.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

DISTILLED WATER ICE

The New York Times has the Following to say in Regard to Ice

Probably no bacteriological fact is better established than that much of the ice of commerce is dangerously impure. The assumption that water purifies itself in freezing was long ago shown to have but a limited basis in truth. The individual crystals are likely to be purer than the mother liquid from which they are formed; but ice is a mass of crystals in which may be entangled all kinds of impurities.

The germs are not only killed in the process of manufacturing the ice, but the condensed water passes through two cakes, two charcoal and one sponge filter, leaving it absolutely pure to go into the cans.
