Bright's Disease

Not Rare, but Common—All Kidney Disease is Bright's Disease —The 8th to 10th Month It Becomes Chronic and Incurable by All Known Means Except the new Fulton Compounds, which Record 87% of Recoveries.

We have before us a little work on kidney disease by Joseph E. Edwards, M. D., of Philadelphia, that contains some things that every one ought to know. Many people imagine Bright's Disease is rare, when, in fact, it covers the whole gamut of kidney diseases. This book sets out that the kidneys have but one function, viz., the elimination of the urea and waste products, and that all interferences with that function are called Bright's Disease. Dr. Edwards adds: "For the benefit of physicians who may read this book I will give a list of the cases which I attribute to Bright's Disease, viz.: Albuminuria. Congestion of the Kidney. Degeneration of the Kidney. Fatty Degeneration of the Kidney. Inflammation of the Kidney. Uræmia. Disease of the Kidney."

Thus, all kidney disease being Bright's Disease, the serious question is, is it acute or chronic? In other words, is it in the primary or secondary stages? For the eighth to tenth month it becomes chronic and is then incurable by all known means except the Fulton Compounds. The kidneys are not sensitive. There is often no notice of the trouble till it has already fastened. If you have kidney disease in the first stage the Renal Compound will cure it quickly. If it is of more than 8 to 10 months standing it is the only thing known that will cure it. In proof that nothing else will we cite all medical works as evidence that to this time there has been nothing that cures Chronic Bright's Disease. The stockholders of the John J. Fulton Co., business and professional men of San Francisco, are the first people in the world to announce a positive cure, presenting a definite percentage of recoveries (87 per cent), and giving out the lists of the cured, all among purely chronic, well-defined cases. If you have any kind of kidney trouble, there is only one thing to take, The Renal Compound for Bright's Disease is \$1 for Diabetes, \$1.50 John J. Fulton Co., 409 Washington street, San Francisco, cal. compounds. Free analyses for patients. Pamphlet free. We are the sole agents.

TO SAVE FORESTS

F. H. NEWELL WOULD PROTECT THE SETTLER.

One of the Features of Chief Hydrographer's Report is its Treatment of Forest Questions—Increased Value of Land With Irrigation.

One of the most interesting, as well as important, features of the first annual report of F. H. Newell, chief of the reclamation service, is a discussion of the forest problem, in its relation to the conservation of the water supply of the West. Mr. Newell has always been an advocate of forest reserves, especially in regions where water is scarce, and mountain streams are doubly in need of protection. Having devoted much study to the question, he can speak authoritatively.

Within the arid and semi-arid portions of the West, he says, nearly 120,000,000 acres are covered with woodland, the trees, though scattered, having value for firewood, fence posts, rails and other purposes essential to the success of the armer and pioneer. In addition, more than 75,000,000 acres are covered with heavy forest, having commercial value as timber. The aggregate area of desert, woodland and forest is a little more than half the extent of the arid and semi-arid regions; the remainder is grazing land. Thus, so far as area is concerned, the grazing industry is and probably always will be the great industrial pursuit of the West. So far as values are concerned, however, there is another aspect to the matter.

The open range of the arid region is generally stated to be capable of supporting one cow to every 20 or 30 acres. The same land when watered and put in alfalfa will frequently feed 10 cows to every 20 acres; or in orchards at favorable altitudes will support a family of three or even five. The open range may have a value of 50 cents an acre, while under irrigation the selling price may jump to \$50, and if in orchards to \$500 an acre. Thus the value of the lands are directly reversed, the grazing land having the greatest extent and the least value and the irrigated land the least extent and greatest value.

Mr. Newell maintains that the best development of the Western country requires the conservation of the forests along the headwaters of the principal streams; in fact, all streams whose waters can be utilized for irrigation purposes. He believes in proper regulation of the cutting of timber, permitting the removal of ripe trees. He even believes in encouraging a more general cutting of mature timber than is now practiced, stating that in some portions of the West as high as 40 per cent of the timber stand has passed maturity and the trees are dying or dead.

"From a commercial standpoint," says he, "trees have first value for lumber, and, fortunately, the best use of the forest as lumber is not antagonistic to their preservation and to the perpetuation of favorable conditions for a permanent water supply. The first step in the preservation of the forest is to protect them from their great enemy, fire; the next step is the judicious cutting of the mature trees, which should be conducted on a business-like basis that will make the forests yield a revenue sufficient to pay the cost of patrolling and protecting them. With systematic supervision, similar to that employed in the preservation of public forests in other parts of the world, it will be possible to protect the headwaters of the streams without cost to the taxpayer."

IMPROVE THE SERVICE.

Mail in the Interior of Oregon is irregularly Delivered.

The mail schedule between Heppner and Canyon City was changed a few days ago so that no mail comes to Long Creek on Monday from either way, says the Long Creek Light. The Saturday mail for Long Creek and other offices along the route comes to Monument on Sunday and there, within 20 miles of its destination, lays over 24 hours.

The people all along the line from Monument to Canyon City are complaining about this arrangement and the attention of the postoffice department at Washington will probably be called to this defect in our mail service, and arrangements made if possible, to have the mail come on through.

TRIP.

The World's Greatest Cure for the Liquor and Tobacco Habits, Captain S. W. Taber, of Seattle, when asked: "Do you endorse Trib as a cure for the liquor and tobacco addiction?" said: "I do heartily endorse Trib as a true and harmless cure for either liquor or tobacco. I have had the pleasure of seeing Trib cure many people, and never knew of a failure when the party taking it was sincere."

Price per treatment, \$12.50. For sale by all druggists.
