OPPOSES GRAZING

ATTORNEY GENERAL WOULD NOT PASTURE RESERVES.

Says Stock Destroys Water Sources —Thinks the Object of Forest Preservation is Now Being Defeated by the Grazing Process.

Attorney General A. M. Crawford took his vacation in the Cascade mountains this summer, and for the first time in over three weeks he spent yesterday and today in his office at the capitol, says the Salem Journal. He is much improved in appearance by his trip, and feels rejuvenated and ready for a year's hard work. Accompanied by his son, James, a guide and a cook, Mr. Crawford spent 18 days on a trip from Roseburg to Crater lake and Clear lake.

The party was mounted on sure-footed horses, and jack animals carried the necessary supplies. Among the latter was a tent, but it was not used, as the weather throughout was fine, and the party slept in the open every night. Mr. Crawford and party visited the north shore of Crater lake, where they camped at the foot of Mount Llano, from which point a splendid view of the strange and beautiful sheet of water, high up in an extinct crater of the mountain range, could be obtained.

Later a trip to Diamond lake was enjoyed. Mr. Crawford calls the latter the most beautiful body of water in the Cascades. It is located 15 miles northwest of Crater lake, and has the clearest sparkling water imaginable. They fished in Fish creek, a tributary to the Umpqua river, meeting with splendid success.

On the trip a large black bear was shot by General Crawford, and a cub was also secured, and he brought home as a trophy the bear skin, which will hereafter ornament the Crawford home. Three deer also fell victims to General Crawford's unerring Winchester, and grouse innumerable were killed, to be eaten by the party.

Mr. Crawford, in speaking of the Cascade forest reserve, criticized the system now in vogue, by which cattle and sheep are allowed to pasture in the woods of the reserve. The object being to protect the water supply, he states that the pasturing of stock will defeat this, as the underbrush and all small vegetation is eaten and destroyed by the stock, and the water falling down over the denuded ground in torrents, and when the dry season sets in the supply of water intended to be supplied by the reserve will be lacking and will be entirely inadequate.

The object of the establishment of this fine reserve will thus be defeated. Aside from this it is a wrong principle for the federal government to provide pasture and feed for one man or class of men, while others must pay for the same privilege, as the pasturing of stock is limited, and permits issued to those making use of the reserve for pasture—others not supplied with permits being excluded. He states that the reserve is a splendid one and should be well cared for by the federal government, with a view to making it what it was intended it should be—a preserver of water for the lowlands.

SOCIALISTS BOYCOTTED.

Anaconda Smelting Companies Will Not Hire Reformers.

The socialists carried Anaconda, Mont., at the last election, electing nearly all the city officers. As already told in these columns, the capitalist officers refused to surrender the offices, and at the bidding of the great smelter companies inaugurated a reign of practical anarchy. The socialists carried the matter into the courts, and succeeded in seating their officers.

Now, the smelting companies have closed down and announce that when they open up no socialists will be employed. As practically every smelter man in the West belongs to the American Labor Union, and this organization is pledged to socialism, it will probably be some time before they can open up under those conditions. Meanwhile these tactics are rapidly spreading the gospel of socialism throughout Montana, and it is quite likely that the socialists will carry the whole state at the next election. When this time comes the capitalists will probably want to take their mines to some other state.—Boycott's Weekly.
