## FACTORY WILL OPEN

LA GRANDE SUGAR MILLS  
TO BEGIN SEPTEMBER 1.

Output This Year Will Reach 5,000,000 of Sugar—Beet Crop Light, But of Good Quality—Per Cent of Sugar Very High—Yield Will Probably Be 15 Tons Per Acre.

La Grande, Sept. 11.—The sugar factory will start for the season's run on September 21.

A preliminary run is now being made, to convert the left-over syrup from last year into sugar, and to get the machinery in readiness for the regular run. There is enough of this syrup on hand to make 50,000 pounds of brown sugar. This syrup is the residue left over from the refining process of last year, and is a part of the regular output of the factory, and varies with different years, according to the amount of sugar made.

The best crop, while very light in places this year, is over, average in quality, and many of the fields will average over 15 tons of beets per acre, but the valley will probably average 15 tons.

The tonnage of beets now in sight will reach 15,000 tons, which should yield between four and five million pounds of refined sugar.

The factory will employ about 125 men and boys, and the field belonging to the factory people will employ as many as 450 people, during the beet harvest period. All this labor will be local, white labor as far as it is possible to secure it. The supply of white labor is usually scarce, and to provide for any emergency, the company has contracted for 100 Japanese laborers, in case the supply of white labor should prove inadequate.

The factory will run night and day and the daily capacity is from 350 to 400 tons of beets per day, and it will be crowded to the limit in order to grind up all the crop before the fall rains begin. Last year considerable of the late crop was left out on account of the rains.

The first plowing for the purpose of gathering the crop will be done on the 15th, as the haulers will necessarily have to start a couple of days before the factory is ready for the new crop.

## Dam Washed Away.

La Grande, Sept. 11.—The sugar factory's dam, about a mile beyond the Electric Light Company's power house, a mile west of here, washed out about 3:30 o'clock last night. The water came down the river in great torrents, which leads to the supposition that a large quantity of water had been turned loose at Perry or some point above.

## Ask Your Doctor

He will tell you—That barley-malt is a half-digested food, as good as food can be.

That hops are an excellent tonic.

That the little alcohol in beer—only 3½ per cent—is an aid to digestion.

But Purity is Essential

But he will tell you that beer must be protected from germs, and brewed in absolute cleanliness.

He'll say, too, that age is important, for age brings perfect fermentation. Without it, beer ferments on the stomach, causing biliousness.

Schlitz beer is brewed with all precautions. It is the recognized standard all the world over, because of its purity.

Fearful Odds Against Him.  
Bed-ridden, alone and destitute. Such in brief was the condition of an old soldier by name of J. J. Havens, Versailles, O. For years he was troubled with kidney disease and neither doctors nor medicines gave him relief. At length he tried Electric Bitters. It put him on his feet in short order and now he testifies: "I'm on the road to complete recovery." Best on earth for liver and kidney troubles and all forms of stomach and bowel complaints. Only 50c. Guaranteed by Tallman & Co., druggists.
