

HAIR GROWTH

Promoted by Shampoos of Cuticura Soap

And Dressings of Cuticura the Great Skin Cure

Fast, Sweetest, Most Effective Remedies for Skin, Scalp and Hair.

This treatment at once stops falling hair, removes crusts, scales and dandruff, destroys hair parasites, soothes irritated, itching surfaces, stimulates the hair follicles, loosens the scalp skin, supplies the roots with energy and nourishment, and makes the hair grow upon a sweet, wholesome, healthy scalp when all else fails.

Millions of women now rely on Cuticura Soap assisted by Cuticura Ointment, the great skin cure, for preserving, purifying and beautifying the skin, for cleansing the scalp of crusts, scales and dandruff, and the stopping of falling hair, for softening, whitening and soothing red, rough and sore hands, for baby rashes, itchings and chafings, for annoying irritations, or too free or offensive perspiration, for necrotic weaknesses, and many sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet and nursery.

Cuticura remedies are the standard skin cures and humor remedies of the world. Bathe the affected parts with hot water and Cuticura Soap, to cleanse the surface of crusts and scales and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Ointment freely, to allay itching, irritation and inflammation, and soothe and heal, and, lastly, in the severer forms, take Cuticura Resolvent, to cool and cleanse the blood. A single set is often sufficient to cure the most torturing, disfiguring skin, scalp and blood humors, from pimples to scrofula, from infancy to age, when all else fails.

Sold throughout the world. Cuticura Resolvent, 50c. (In West, 75c.) Cuticura Soap, 25c. (In West, 35c.) Cuticura Ointment, 25c. (In West, 35c.)

GRAIN DEALERS MET

ANNUAL CONVENTION IS AT MINNEAPOLIS.

Exporters and Buyers, Including a Large Number From Canada—All the Great Grain Growing Regions Are Represented—Large Attendance.

Minneapolis, Oct. 6.—The annual convention of the Grain Dealers' National Association, which opened here today, is the largest in point of attendance ever held by the organization. Those in attendance include all the prominent eastern exporters of Boston, New York, Baltimore, Philadelphia and Newport News, and the west coast exporters who load grain into ships at San Francisco, Portland, Tacoma and Seattle and send it half way round the world to England or down to Australia.

The exporters from New Orleans and Galveston are in attendance to compare methods with the dealers who export from Duluth, while the dealers in all the larger milling centers are here to discuss matters of mutual interest in connection with railroad rates, consumptive demand and the primary movement of grain.

The present convention is also unique in that there is an unusually large attendance of Canadian grain men. The eastern and western Canadian grain men have their own association, which has sent representatives to observe the proceedings of the convention while many dealers are attending independently.

Today's proceedings consisted almost entirely of the usual formalities incident to the opening of the convention. Tomorrow the discussion of practical questions will begin in earnest. Representatives of the Chicago board of trade and of the milling interests of Iowa, Kansas, Minnesota, the Dakotas, Indiana, Nebraska and other states will be heard.

The question of reciprocity with Canada which has long been advocated by the Minnesota grain interests, will be exhaustively discussed by the convention. The sessions will continue until Friday. One afternoon will be devoted by the visitors to an inspection of the mammoth mills and elevators of the Twin Cities.

LIPTON ABANDONS FIGHT.

No More Challengers Unless Right Designer is Found.

New York, Oct. 6.—Sir Thomas Lipton arrived here from Chicago today. He will remain here until Friday, when he will sail for home. While he has no present intention of building another challenger, he said that the Shamrock III would remain here to serve perhaps as a trial horse should the fortunate day ever come when he should feel justified in bringing another challenger. There would be no use, he said, in doing so unless he could find another Herreshoff on the other side.

Walking Delegates.

"Labor in Chicago pays over \$500,000 a year," said John C. Driscoll, of the associated teaming interests, "to support business agents. In the years past these walking delegates have been able to rule the movement as they pleased and have caused millions of dollars of unnecessary loss. I have talked to many of the leading employers and they are with me in the scheme to force these idlers to go to work. The way to do it is to tell the unions that their business agents cannot do negotiating with the man who pays the wages. These organizations must be made to understand that employers will and should treat with their employees only."

Increase of Suicide.

The suicide question may become a very serious one in New York, where it is manifestly on the increase. A peculiar feature of the malady here is that it strikes so many people whom it would seem ought to find life pleasurable. A past fruitful cause of self-murder was want and physical suffering, it of late a number of cases have appeared among people of means if not of downright wealth. In many instances no apparent cause could be found.

BENTLEY & HARTMAN.

THE PIG'S PARENTS.

Care That the Sow Should Have About Farrowing Time.

Immature parentage is the cause of small litters and sickly pigs. Farrowing is due about 112 days after breeding. Set down the dates.

Do not disturb the sow for twenty-four hours after farrowing unless she appears restless and wants to eat.

Feed sparingly for ten days, gradually increasing the feed until she eats it up clean twice a day.

Avoid feeding buttermilk or very sour milk for the first few days after farrowing.

There is nothing better than sweet milk, ground oats, shorts, middlings and oilmeal mixed into a slop.

Shut the sow up only a few days before farrowing and if the weather is cold cover her with a warm blanket.

A sow fed on corn alone before farrowing will be likely to produce small, weak pigs.

A reasonable amount of exercise of the dam gives vigor to the offspring of any animal.

Select the best sows to breed from. Have vigor, size, bone and early maturing qualities always in mind.

The sire should have a well formed head and ears, well sprung ribs, width and depth of body, good girth and strong, short legs.

Do not let too many pigs run together. Give them a pen where they can run out away from the dam occasionally. Feed them sweet milk in low troughs. They soon learn to eat.—New York Tribune Farmer.

An Odd Habit Among Rooks.

Among the odd habits of rooks is the way that members of the same rookery have of intermarrying generation after generation. The males always choose their wives from among their near neighbors, and if one should be so bold as to bring home to his rookery a bride from a distance the other rooks will invariably refuse to receive her and will force the pair to build some way off. In the neighborhood of big rookeries outlying nests of this kind may always be found.

Fresh Paint Stains.

A fresh paint stain on woollen goods will disappear if rubbed against other woollen goods. For instance, if the stain is on the sleeve of a coat take that garment off and rub the paint against the other sleeve. It will disappear and leave no sign. This is easier than applying turpentine and exactly as efficacious, but it must be done while the paint is still wet.

Very Legal.

"We claim that my client did not run away with the horse, as alleged. The horse was ahead of him all the time, and he simply followed the horse."

The Prosecuting Attorney—it amounts to the same thing. He was the accessory after the fact. He is old enough to know better than to follow a bad example.—Boston Transcript.

Something Like It.

"Does your son matriculate this year, Mrs. Hammofesine?"

"Why, really, I don't know. I ain't heard anything about matriculation, but he wrote me in his last letter that he had got vaccinated, and it took terrible."—Chicago Record-Herald.

Serene Superiority.

"Mr. Lofibrow takes himself very seriously," remarked Miss Cayenne.

"In what way?"

"He asked me if I thought I could be happy with him. As if his presence could make the slightest difference one way or another!"—Exchange.

Its Reason For Being.

"What kind of a society is yours?" asked her father.

"A secret society," she replied.

"But what is its object?"

"Oh, just to have secrets from the other girls!"—Chicago Post.

None to Spare.

"Beg pardon," said the suspicious looking fellow, meeting Subbuts in a dark street, "but what time have you?"

"Just enough to catch my train," replied Subbuts as he hastened on.—Exchange.

DEATH DICE.

Grotesque Relic of the Hohenzollern House Recalled.

Emperor William has just presented to the Hohenzollern museum at Berlin the famous "death dice," employed by one of his ancestors in the middle of the seventeenth century to decide a difficult case.

A beautiful girl had been murdered and suspicion fell upon two soldiers, Rudolph and Alfred by name, who had been rivals for her hand. Both denied their guilt strenuously, and torture failed to extort a confession from either of them.

Frederick William of Hohenzollern, known as the great elector of Brandenburg and father of the first king of Prussia, ordered dice to be brought, in order that the two soldiers should throw for death, the loser to be executed as the murderer.

This trial by chance was conducted with great pomp and ceremony, the great elector attending in person to superintend this appeal to divine intervention, for as such he regarded it. Rudolph had the first throw, and he threw two sixes, thus obtaining the highest possible number.

On seeing this Alfred fell to his knees and prayed: "Almighty God, thou knowest that I am guiltless, protect me, I beseech thee." Then he threw the dice with such force that one of them broke into two parts. The one that had remained unbroken showed six, one-half of the broken dice also showed six, while the second portion of the broken dice showed one, thus giving Alfred a total of thirteen, or one more than Rudolph had thrown.

The whole assembly is said to have been filled with astonishment at the wonder, and Rudolph, regarding it as a sign from heaven, confessed to having committed the murder, being thereupon sentenced to death by the great elector.—Baltimore Herald.
