

Ask Your Doctor

He will tell you—
That barley-malt is a half-digested food, as good as food can be.
That hops are an excellent tonic.
That the little alcohol in beer—only 3 1/2 per cent—is an aid to digestion.

But Purity is Essential

But he will tell you that beer must be protected from germs, and brewed in absolute cleanliness.

He'll say, too, that age is important, for age brings perfect fermentation. Without it, beer ferments on the stomach, causing biliousness.

Schlitz beer is brewed with all precautions. It is the recognized standard all the world over, because of its purity.

THIS is the instrument I use in examining the interior of the eye. With it I can tell if your eye is in a healthy condition or plainly see any disease that may be present. This is very important for sometimes glasses will not help your eye trouble. If you need glasses I have instruments for showing me just what lenses are required. If you do not, your trouble can be corrected by a physician.
