He will tell you—
That barley-malt is a half-digested food, as good as food can be.
That hops are an excellent tonic.
That the little alcohol in beer—only 3 1/2 per cent—is an aid to digestion.

But Purity is Essential

But he will tell you that beer must be protected from germs, and brewed in absolute cleanliness.

He'll say, too, that age is important, for age brings perfect fermentation. Without it, beer ferments on the stomach, causing biliousness.

Schlitz beer is brewed with all precautions. It is the recognized standard all the world over, because of its purity.

AN ELECTROCUTION

DIES IN THE CHAIR AT COLUMBUS, OHIO.

Three Men Murdered a Woman at Toledo, and One Turned State's Evidence—A Sister of the Victim Was Badly Injured—Man Who Turned State's Evidence Received a Life Sentence.

Columbus, O., Oct. 21.—With his brother confined in a cell a few yards away awaiting a similar fate, Ben Wade goes to the electric chair in the penitentiary today for one of the foulest crimes committed in Ohio in recent years. Wade has been under sentence of death for more than a year and he entertained hopes to the last that he might escape the chair. These hopes were finally dashed to pieces last week when the circuit court refuse to grant a stay of execution.

Brutal Murder of a Woman.
The Wade brothers were convicted of the murder of Kate Sullivan, who lived in a lonely house near Toledo. She and her sister, Johanna Sullivan, were alone in the house on the evening of April 14, 1900, when masked men entered for the purpose of robbery. Before they left, however, Kate Sullivan was clubbed to death and her sister badly injured.

Not long after a man named Landon was sent to the penitentiary for some offense, and upon his release he became talkative and gave information which led to the belief that he and the Wade brothers were guilty of the Sullivan murder. All were arrested and all were found guilty of murder in the first degree, but with Landon's verdict there was a recommendation for mercy, and he was sent to prison for life. He was the main witness in the prosecution of the brothers. The date for Albert Wade's execution was set for last June, but a motion for a new trial acted as a stay of execution.

OREGON APPLES.

Minnesota Buyer Says no Country in the World Compares to This.

Speaking of the almost miraculous growth of fruit in Oregon, and the prices received for them, a Minnesota fruit buyer says to a Spokane paper: "The Hood River Valley association sold 20,000 boxes of Spitzenbergs and Newton Pippins to one dealer for \$2 and \$1.80 a box respectively. An orchardist in Grand Forks, B. C., got 4 cents a pound for all he raised. The average price will run from 40 cents a hundred for the least desirable varieties to an average price of \$1 for good loose apples. The better the quality, flavor and color, the higher the price.

"We in Minnesota raise wonderful apples, but we have a hard time doing it, as there are so many adverse conditions to contend with. The same effort and intelligence expended out here would bring ten times the return. Growing apples here practically without cultivation is profitable. Intelligent cultivation, with the same pains as is taken to produce a heavy wheat crop or fine livestock, would produce tremendous profits. The mark of \$1,000 to the acre has been reached here, to my knowledge, while \$500 is not extraordinary. We can do nothing to compare with this in the East. This region is beyond doubt the greatest apple country in the world. All it needed to give it that reputation was an improvement in flavor and now that that has been obtained, your orchards will make your country famous."

DOLL MANUFACTURE.

Falling Off of This Novel Trade in the World's Markets.

The state department at Washington has received a report from Consul General Hughes at Coburg, Germany, which report tends to show the

marked falling off in the doll trade of the world.

The Washington correspondent of the San Francisco Chronicle says: "According to Consul Hughes, who reviews the situation under the caption, 'The Doll Trade of Thuringia, the trade with the United States for the year ending June 30, 1903, amounted to \$1,849,013 out of a total export of \$3,552,607, but Thuringia's trade with the other nations slumped badly. England did a very poor doll business with Thuringia. No demand seemed to exist for dolls. The cause of this is hard to tell. Canada did somewhat better in the cheap class of goods, but even this trade might be much improved.

Australia and other British colonies have not ordered anything like the same amount of goods as in previous years.

Austria-Hungary may be said to have practically stopped buying in Thuringia. Switzerland, Netherlands and Belgium each are doing only a small business in low grade goods. Argentine Republic has done a small business for years which seems to remain about the same; the same may be said for Brazil. Cuba's trade has not picked up since the war. The Central American trade has never been large, and of late it has fallen off entirely. The slump is traceable in various nations of the world. French competition is supposed to be responsible in some cases for the falling off of Thuringia's trade.

JOHN MITCHELL'S BOOK.

Deals at Length With the Coal Strike and Its Settlement.

The president of the United Mine workers of America, John Mitchell, has written a book on labor. According to the St. Paul Dispatch, "Organized Labor; Its Problems, Purposes and Ideals, and the Present and Future of American Wage Earners," is the title.

Seven of the fifty-eight chapters are devoted to the coal strike of last year and President Roosevelt is commended for his appointment of the anthracite coal strike commission, which act is termed "a landmark in the history of labor."

Mr. Mitchell adds that "the President of the United States thus asserted and upheld the paramount interest of the public in conflicts affecting the injury and welfare of the community." The history of the strike is fully given, and the account is free from invective or denunciation of the operators. Strikes as a last resort are defended, but both sides to an industrial dispute are urged to meet each other fairly and exhaust all means towards a peaceful settlement before such conflicts become necessary.

ISLAND POPULATION.

Philippine Archipelago Has 6,976,574 People.

For the first time since our acquisition of the Philippine Islands, according to Public Opinion, we have a statement of the total population of the islands, the approximate accuracy of which may be safely accepted. Public Opinion says: "The new government census is completed so far as the main labor, that of enumeration, is concerned, and needs only the revision of the tabulators. Subject to that, the figures for the total population are 6,976,574, which are remarkably close to the estimate of 6,901,339 made by the American census officials in 1900 and the estimate of 6,975,073, made by the bureau of insular affairs in the war department in 1902. In round numbers, then, we may conveniently say there are seven million people in our Philippines dependency."
