He will tell you—  
That barley-malt is a half-digested food, as good as food can be.  
That hops are an excellent tonic.  
That the little alcohol in beer—only 3 1/2 per cent—is an aid to digestion.

### But Purity is Essential

But he will tell you that beer must be protected from germs, and brewed in absolute cleanliness.  
He'll say, too, that age is important, for age brings perfect fermentation. Without it, beer ferments on the stomach, causing biliousness.

Schlitz beer is brewed with all precautions. It is the recognized standard all the world over, because of its purity.

### A BAD FALL, Might Have Resulted Fatally Had Help Not Come.

A resident of Pendleton has been persuaded to tell the story of a severe accident which befell him. Here is a lesson to be drawn from his experience.

G. W. Baker, carpenter, living at Tustin and Aura streets, in Pendleton, says: "A year ago this coming April, while living in Seattle, Wash., I fell from a staging to the ground, 12 feet below, and struck squarely on my back. I was laid up for five weeks in bed and ever since then my kidneys have been affected. The secretions were highly colored and contained a sediment like brick dust. I had dizzy spells and headaches and a dull aching pain through my loins and kidneys and back. I procured Doan's Kidney Pills at the Brock & McComas Co., drug store and have used seven boxes. I consider myself cured. The urinary difficulty is a thing of the past and I have neither headaches, dizziness, nor pains in my back."

## FOR BETTER ROADS

### CONVENTION PASSES SOME RINGING RESOLUTIONS.

Favors an Appropriation From Counties to Cover Expense of Good Roads Meeting—Indorses Governor Chamberlain's Convict Road Plan.

The following resolutions unanimously adopted embody the sentiments of the Oregon Good Roads convention, just held in Portland.  
"That the sum of \$3,000 is required to adequately cover the expense necessary in carrying out effectively the purposes of this organization, and that it is the sense of this convention that the equitable proportion to be contributed by each county ought to be determined by its pro rata of assessable values; and that each county judge should charge himself with the duty of seeing that the assessment of his county is lawfully secured and paid into the treasury of this association, to be disbursed upon the orders of the executive committee to whom the treasurer shall furnish bond for the safe custody and proper disposition of all funds.  
"That we heartily endorse the position taken by Governor Chamberlain upon the use of convicts for road purposes as expressed in his address read before us yesterday; and that a committee of five be appointed to be known as 'The Legislative Committee,' whose duty it shall be to present to the legislature of Oregon, in proper form for legislative action, this and all other matters that may be decided by this association as demanding legislation.  
"That we urge upon all future legislatures the paramount importance of making appropriations therefor and the need for caution in protecting the state treasury against all needless expenditures, to the end that taxes be reduced and that the people shall derive more substantial benefit from those which they do pay.  
"That we favor the general principle of state aid in road construction under competent engineering supervision as embodied in the laws of many of the older states, and that we believe that the general government, that derives its prosperity and power from the states should contribute its equitable proportion to the cause of road betterment, which will so greatly advance the welfare of the states and improve the condition of all the people; and we urge our state and national representatives to give their hearty support to this policy; and we especially urge upon our representatives in congress the necessity and great importance of an appropriation of not less than \$100,000 for the office of public road inquiries in order that object-lesson roads may be constructed in all the states."

The work of grading will be commenced at once and be pushed to completion as soon as possible, and the necessary fluming will be constructed during the ensuing fall and winter. The excavating, it is estimated by W. R. Powell, the consulting engineer of the company, will take about six weeks.
