NEEDS MORE ROPE

CONSUL H. B. MILLER
GIVES TIP TO AMERICANS.

Says the Great Shipping and River Transportation Industry of the Orient should Use American Product—Sails Made of American Cotton—Should Also Use American Rope.

Consul Henry B. Miller, at Niuschwang, China, makes the following novel and interesting report on the use of rope in the oriental shipping industry. Mr. Miller's report says:

There were 20,000 Chinese junks registered at Niuschwang last year. This is only a very small percentage of the number in China. In this section all of these junks use sails made of American cotton goods. An effort is being made to furnish the rope for them from the United States. The rope used thus far was made here from hemp raised in Manchuria. It is badly made, is quite inferior, and does not wear well—usually one season.

The seagoing junks use great quantities of rope, especially of large sizes, instead of anchor chains. This is made from some of the palms raised in southern China and the manufacturing of the rope is done also in the south by the men who navigate the boats. Inquiries there as to the cost of it will show the possibilities of competition for the trade.

The fact that considerable quantities of American rope are being ordered for Manchuria—some for Chinese junks—indicates the possibilities of a trade in this line. If sales can be established throughout North China they may grow to wonderful proportions, for the amounts used and the number of boats are surprisingly large.

If, in addition, it would be possible to get a part of the rope trade of southern and central China, the volume would be sufficient to keep several large plants in operation. The simple fact that the competition is against Chinese production need not necessarily signify that the business is impossible, for the strongest competitor of American cloth for the sails of these same boats is cotton cloth made from cotton produced in China.

The great bulk of transportation in China is by water and no country in the world is using so many sail boats as China; and all these use considerable rope. This trade would not use the high class and high-priced articles. Our cheapest and poorest are so much better than those in general use that they may possibly supplant them.

The enormous quantity used and the possibilities of a great trade if the market can be secured at all is sufficient inducement for a thorough investigation.

In China rope is made from grass, hemp, jute, palm and bamboo.

Manilla Rope.

Manilla ropes have been tried in this climate but the extreme dryness of the air during the fall, winter and spring, covering so long a period, shrinks and breaks the fiber and makes it worthless. Gunboats going into winter quarters here have found all of their ropes worthless in the spring and unable to bear any strain.

The seagoing junks use the large rope made of a species of palm, and the junk men take these ropes apart and work them over every two years.

Sizes and Prices.

The river junks here use hemp ropes varying in size from one-fourth of an inch to one inch in diameter. Price is 23 cents Mexican (3.5 cents) per catty (11.3 pounds). They also use a jute rope, mostly 1 1/4 inches in diameter, for their anchor rope; this sells for 11 cents Mexican (5.4 cents) per catty.

The superior quality and longer life of American rope may appeal to these people. If samples and prices are sent to this consulate, I will gladly give the matter attention and endeavor to introduce it.

"MILLIONAIRE TRAMP" TONIGHT

Has Drawn Large Audiences Wherever Presented.

The only way to judge a play is by its ability to draw large audiences and to please those who attend. This is the only true measure of success, whatever argument may be brought to the contrary. That the new play, "A Millionaire Tramp," possesses

these qualifications, is proved by the large audiences which have attended every performance this season. It is not the relic of an old favorite traveling on its old reputation, but a new production now making one.

"A Millionaire Tramp" comes to the Frazer theater tonight, and in all probability standing room only will be the rule with this splendid attraction.

A Good Name.

From personal experience I testify that DeWitt's Little Early Risers are unequalled as a liver pill. They are rightly named because they give strength and energy and do their work with ease.—W. T. Easton, Boerne, Tex. Thousands of people are using these tiny little pills in preference to all others, because they are so biliousness, torpid liver, jaundice, sick headache, constipation, etc. They do not purge and weaken, but cleanse and strengthen. HOME COMPANY FOR EASTERN OREGON.

STOP PAYING RENT

— And buy a Home of the

Co-Operative Guarantee Realty Company
BAKER CITY, ORE.

I want a Home of my own. I have no money to make the down payment. How can I manage this?

Q. What is the first move and what does it cost? A. First you sign the application blank for as many thousand dollars as you wish, paying an application fee of \$5.00 for each \$1,000 applied for. Your next payment of \$2.50 will come due the first of the following month, and you must continue to pay the \$2.50 per month on each \$1,000 contract until you are put into possession of your home.

Q. What is the cost of a \$1,000 home in your company? A. A home of the value of \$1,000 procured through the CO-OPERATIVE GUARANTEE REALTY COMPANY costs \$1,200.

Q. Does this include interest and all other costs? A. Yes. This is the total cost. We charge no interest. The extra \$200 is our brokerage fee.

Q. Is there anything extra to pay when I get the home? A. Yes. You pay a fee of \$5.00 for examining the abstract and the drawing up of the papers.

Q. What do I pay after taking possession? A. You pay \$7.50 per month for each \$1,000 your home costs until all of your payments, including application fee and the \$2.50 monthly payments made before possession, equals \$1,200 per \$1,000, which completes and fulfills this obligation.

Q. What do I get in the way of title? A. First, you get a contract for deed, which is made a recordable instrument. Said contract for deed to run until you have paid to this company at least \$600 on each \$1,000 subscribed for. Then this company agrees to give you a warranty deed and take back a non-interest-bearing mortgage for the unpaid balance.

Q. If I fail to pay on the first day of the month, what is the penalty? A. There are no penalties or fines imposed by this company. You have 30 days on each payment, and if you are sick or out of work, you have 30 days longer to make up such lapsed payments.

Q. What references do you give? A. The best references we have are the people whom we have placed in possession of property, whose addresses we publish in all of our catalogs.

Q. Can I build my own home, or does the company build it? A. This is optional with the contract holder. The company does not only deal in real estate, but we are contractors and builders as well.

Q. Can I buy a home already built if I find one that suits me? A. Yes, if upon appraisal of the property by the company the security is deemed sufficient for the money invested.

Q. To whom shall I make my monthly payments? A. Your monthly payments shall be made direct to the Home Office. No agent is authorized to collect the monthly payments except district managers in outside districts who have authority for collecting.

Q. Supposing I should die after taking out one of your contracts? A. The heirs of the deceased can assume his obligations and carry them out if they choose. If not, the company will refund all money paid in by the deceased, on demand.

Investigate our proposition. Place your monthly savings with us and secure a home at the lowest possible cost. No Better Investment Than This. Series B will be the same, with the exception of payments being \$5.00 before the maturity of the loan and \$10.00 thereafter until \$1,200 is paid on each \$1,000 contract.

Can anyone suppose that we would double the necessary cost of our brewing without a vital reason?

Would we spend so much on cleanliness? Would we cool the beer in plate glass rooms? Would we filter all the air that touches it? Would we age it for months? Would we sterilize every bottle?

We do it to attain absolute purity—to avoid the remotest possibility of germs—to make Schlitz Beer healthful.

Why accept a common beer, brewed without any of these precautions, when Schlitz Beer costs no more?

Your dealer may prefer to furnish a beer that pays a little more profit; but does it pay you to permit it? Isn't pure beer—Schlitz Beer—worth asking for?
