# ADVERTISE OREGON

GOVERNOR CHAMBERLAIN TELLS WHAT IS NEEDED

Washington and California Outstripping the Webfoot State in Making Themselves Known to the World—Large Attendance Promised for Lewis and Clarke Fair.

Governor Chamberlain, in speaking of the need of advertising Oregon resources more thoroughly, says:

"Just at present it is Oregon's industrial resources that need advertising and to this we should give more attention. There is woeful ignorance concerning Oregon all through the east. Men who travel know something of this country and its advantages, but the great mass of individuals know nothing of the opportunities which are here offered for home-seekers. California on the south and Washington on the north have been extensively advertised, while Oregon has been neglected. The railroads have done some advertising for us, but if we are to experience the growth we desire we must remember our state and 'fly with our own wings.'"

"A prominent eastern railroad man told me one day that for the man who has capital to invest Oregon is the most promising field, for it is yet almost untouched and its resources are as unlimited as they are unknown. By proper advertising at St. Louis and elsewhere in the east, a larger number of people can be brought here to purchase property and make homes."

"I believe there will be a large attendance of eastern people at the Lewis and Clarke fair, and that in the next few years there will be a heavy immigration to this state, but this will not be brought about without hard work on the part of our own people."

"I have talked Oregon and the Lewis and Clark for everywhere I have been. This is a great state with a great future, and I realized it more than ever since I have returned from a circle around the United States. I am happy to be back here again in my own beloved Oregon."

### HERPICIDE

A Luxuriant Growth of Hair.

The chief adjunct of beauty is now placed within the reach of every one. Herpicide, a new scientific discovery that actually destroys the microbes responsible for all scalp diseases. It not only makes dandruff and falling hair fall off of the scalp, but invigorates the hair roots, causing a soft, thick growth to supplant the old thin and brittle one. Here is what one happy woman says:—  
 Philadelphia, Mont., Nov. 22, '00.  
 My hair was coming out very rapidly, and in places was entirely bald, and calling on my physician he strongly recommended Herpicide to me, and after three or four applications my hair stopped falling, and is coming in again quite thick. I need to be troubled with dandruff, or when I am vexed, as you see I have come to praise Herpicide's Herpicide.
