

PUSH THE CREAMERY

FARMERS AGREE TO FURNISH MILK FOR IT.

Commercial Cream Company Will Build Here When Fifty Patrons Are Guaranteed—Pendleton Offers Exceptional Advantages—All the Butter Used Now Is Imported.

M. L. Warren, who resides near Pendleton, is the first man to pledge a number of cows to a creamery in this city. He was in the city Saturday and called upon the East Oregonian to say that he appreciated the efforts being made to bring a creamery here, and that he would make a business of furnishing milk to such an institution.

D. J. Ingram, who resides on Birch creek, six miles from Pendleton, has also signed his willingness to milk a number of cows if a creamery were started here.

Both of these gentlemen think a sufficient number of cows can be secured on Birch Creek, McKay, on the Wild Horse and Umatilla river to warrant a creamery.

Only Fifty Patrons Needed.

The Commercial Creamery Company, of Salem, through its manager, George D. Goodhue, has made a standing offer to Pendleton to establish a first-class, modern creamery in this city, whenever 50 milk patrons could be secured. This offer holds good yet, and this large creamery company is willing to bring this profitable industry here if people show just a little encouragement.

This company operates one of the largest creameries in the Willamette and is experienced in the business, and recognizes the superior advantages of this city for such an industry. The excellent pasturage of the farming districts, the alfalfa pastures and pure mountain water, all unite to make this an ideal creamery district and the extensive cold storage facilities offered in Pendleton clinch the advantages.

A canvass of the Birch creek and McKay creek farmers will be made soon, with a view to securing pledges for 50 regular patrons who will furnish milk. It is the general opinion of the farmers who have been consulted on the matter that the proper way to handle the milk from this district is to establish a separator station at some point near the city convenient to the greatest number of cows and have all the milk delivered there, to make as little inconvenience as possible for the patrons.

Even Scrub Cows Pay.

In Union county common "scrub" cows have yielded a profit of \$4.50 to \$7 per head per month, and the football farmers of that county have engaged extensively in milking in the past two years.

The business men of Pendleton are very much interested in seeing a good creamery established here, as the entire amount of butter consumed here is imported and the investment of a few thousand dollars and the employment of several people in a creamery in the city is an addition to the industries of Pendleton which is cordially invited.

The East Oregonian especially invites the farmers living near the city to consider the matter and say how many cows they can milk as an inducement to this industry. This office is in communication with Mr. Goodhue, the representative of the creamery company and is interested in the matter only so far as inviting an industry to Pendleton which will be profitable to its owners, beneficial to the city and a source of legitimate income to the citizens of Umatilla county.

BEDSTEAD DRAPERIES.

A Tasteful Device Which Does Not Interfere With Ventilation.

The prejudice against the drapery of bedsteads caused by the old fashioned "four poster" is now disappearing in favor of a light and tasteful style, which causes in no way discomfort to the sleeper. This drapery may be arranged in such a way that it will not interfere in the least with the free cir-

HOW THE DRAPERY IS ARRANGED.

ulation of air in the bedroom, and for the purpose of illustration we select an ordinary metal bedstead.

For the successful carrying out of the design a round piece of wood five inches in diameter and two inches thick is required.

In the center of this hole must be bored through large enough to take a round piece of wood of a length to suit the width of the drapery to be used. A portion of an ordinary broom handle will answer the purpose. This is fixed to the wall by four nails at the desired height above the head of the bed. It would be as well if the holes for the nails were bored in the wood first. The drapery is thrown over this and looped back to the wall as depicted. This is an extremely simple and effective drapery and can be made in almost any light material.

Peril in the Celluloid Comb.

A physician says that he sees a great deal of advice in the newspapers on the care of the hair, but very few warnings against wearing celluloid combs. Most "shell" combs that are not born tide tortoise shell, and therefore expensive, frail and easily broken, are made of colored celluloid, and one may assume that eight women out of every ten wear at least one of these dangerous things in their hair. The doctor in question calls attention to the fact that celluloid is so inflammable that it may at any time ignite, even at several feet from an open fire, and that in any case it will do so in a temperature of a few degrees hotter than boiling water. The obvious deduction is that if we cannot afford to purchase shell combs for our hair then this highly convenient and useful ornament should be left severely alone. On the whole, it is better to be without a celluloid comb than to run the risk of losing even six square inches of one's scalp, as recently happened in the case of one of the said doctor's patients.

For the Scrawny Hand.

Scrawny hands are the sorrow of many a pretty woman and this brings her greatest grief in life. For these hands a massage is to be recommended and rest.

To plump out the hand take enough almond oil to cover the back of the hand, about ten drops, and rub gently into the skin. Rub until none of the oil is visible. Extend the treatment up the arm and try to round out those lines of ugliness.

Cold cream makes a good massage for the hand and wrist.

The movement for massaging the back of the hand is a rotary one. The operator must perform it with the palm of the hand, going round and round in a circle, so as to bring every bit of flesh into activity. There are no wrinkles to be smoothed out, only flesh to be developed.

Physical Culture.

Physical culture has done wonders for weak women and sickly girls and for the growing girl who has no organic trouble, but needs the tonic of proper exercise in the open air and rest and nourishing food, all of which are essential when physical culture is once undertaken in earnest, says Hester Egerton in The New Idea Magazine. Growing girls, awkward and self-conscious, are helped after a few months of careful training to a mental poise and dignity of carriage and presence that go far to make a plain woman beautiful.

Carpet Lining.

Before relaying carpets after cleaning or when about to lay new ones I always cover the carpet lining well with newspapers. These can be thrown away when the carpets are taken up, thus preserving the lining from dust and from the wear and tear of beating it.—Exchange.

Saving Lemons.

When one wishes to use only a few drops of lemon juice, the most economical way is to pierce one end with a silver fork and express by gentle pressure as much juice as is needed. The opening made closes up and the lemon will remain fresh for a number of days.

Of the 43,574,000 tons of pig iron produced in the world last year, the output in the United States was 17,820,000 tons.

The Portuguese government is wrestling with a serious crisis, financial and political.

Frazer's Book Store

GRAND CHRISTMAS ARRAY

BEAUTIFUL GIFT BOOKS

Fancy leather bindings in red, green and black, ooze calf, limp leathers, Roycroft style, limp lizard bindings, odd and new. Popular Poets in real seal bindings. Pyrogravure bindings, the latest thing.

Gibson Books

"THE WEAKER SEX."
"THE WIDOW AND HER FRIENDS."
"THE SOCIAL LADDER."

Girls' Books

The Alcott books, the Elsie books, the Pepper books, Francis Hodgson Burnett and many other new books.

Boys' Books

The Ager books, the Henty books, Ernest Thompson Seton's books, including his latest and best, Two Little Savages and other popular books too numerous to mention.

Picture Books for Children

Books of all descriptions—Linen books for A. B. C.'s, Happy Hooligan, Alphonse and Gaston, The Tigers, The Katzenjammers, Foxy Grandpa, Buster Brown and the Minstrels.

Novelties

In this line we have a collection of inexpensive but attractive and useful articles, including shell ornaments of many beautiful and pleasing designs.

Pictures

A very pretty line of pictures, framed and unframed. Also some new things in small frames in gold and ebony. Ask to see our beautiful hand-painted Water Colors.

The Latest Popular Fiction

The leading books of the day are—"Mettle of Pasture" by James Lane Allen; "The Little Shepherd of Kingdom Come" by Jno. Fox; "Gordon Keith," by Thomas Neeson Page; "The Grey Cloak," by Harold McGrath; "The Filligree Ball," by Katherine Greene; "The Call of the Wild," by Jack London; "Lady Rose's Daughter," by Mrs. Humphrey Ward; "The Rose," by Frederick J. Isham; "Letters of a Self-Made Merchant to His Son," "The One Woman," by Thomas M. Jr.; "The Sherrods," by Geo. Barr McCutcheon; and many others of great interest.

Dolls, Dollies and Dollets

Of all kinds, from 1 cent to \$5.00. Unbreakable doll heads also Bisque and china heads.

Doll Buggies and Go-Carts

The newest thing out. All wire and indestructible. Make your little one happy.

Leather Goods

We think we have the latest and best line shown in this city in wrist bags, purses, bill books, card cases, music note diaries for 1904.

Miscellaneous

Christmas tree decorations, some new things never shown before. X'mas candles and holders, wax candles and pillar candles, albums, calendars, fancy stationery, footballs, punching bags, boxing gloves, game boards from 75c to \$5.00. Flip pit and many other games.

HIGH SPEED TESTS.

Trains May Be Run at 100 Miles an Hour With Safety.

The high speed tests that have been going on so long upon the electric line at Zossen, Germany, must soon produce an effect upon general practice, says the New York World. When an ordinary car is driven at 130 miles an hour and a standard sleeping car at 99½ miles without damage to motors, rolling stock or tracks, people will begin to ask railroad companies everywhere why 50 miles an hour should be considered almost the limit for fast trains.

Of course high speed implies not only a strong track, but a clear track. The Empire State Express cannot be expected to average much better than its present rate of 54 miles an hour when it has to run at grade through the main streets of cities like Schenectady and Syracuse. But if electric trains can run on special roadbeds to Philadelphia in an hour, to Buffalo in five hours and to Chicago in nine hours it would seem a profitable enterprise to build lines laid out and equipped for the purpose.

WORK ON PUBLIC LAND.

Bureau of Forestry Has Selected Many Favorable Tracts.

A large amount of work has been done by the bureau of forestry on

public lands in the past year. Selection has been made and approved of 104,159 acres in the Chippewa Indian reservation in Minnesota. The rules which will control the lumbering in this reservation have been prepared and have received the approval of the secretary of the interior. At the request of the secretary of war, a working plan for the timber tract at West Point was prepared.

This plan is now being put into effect under the supervision of the forester. Working plans were also prepared for three Indian reservations in Wisconsin. Applications have been made by private owners for assistance in 94 cases, of which 37 were for timber tracts and 57 for wood lots.

In its co-operative scheme for assisting private owners, applications have been received altogether for the management of over 5,600,000 acres.

THE TEXAS FEVER.

Suppression of This Curse Has Been Vigorously Prosecuted.

In the suppression of the Texas fever 1,620,403 cattle from the infected district and 259,525 cattle from the district adjacent have been inspected and 66,116 infected cars have been cleaned and disinfected.

The efforts of the bureau of animal industry, which has for years been endeavoring to discover a practical method for destroying the tick by

which this disease has spread without injuring the cattle, seem likely to be successful.

Such a consummation would relieve most of the Southern cattle from quarantine restrictions and would add greatly to their value in the markets of the country. Apparent success has been reached by dipping the cattle in a crude oil obtained in certain Texas wells.

DESTROYING FRUIT PESTS.

Department of Agriculture Importing Pest-Destroying Lady Bugs.

The distribution of colonies of the lady bird enemy of the San Jose scale has been continued by the agricultural department during the year, mainly in charge of the entomologists of the state experiment stations.

During the early summer of 1903, 26 colonies were distributed in 12 different states. Of last year's distributions, those sent to Georgia have given the best promise. The fig fertilizing insect continues to be a great success in California.

It has been thoroughly acclimatized at Fresno and Niles. Good work has been done by the parasitic enemy of the black scale, originally imported by the division of entomology from Italy and later from South Africa. In the colonized district over 90 per cent of the black scale has been destroyed by the parasite.

Liquids Americans Consume

Somebody who has been counting the quantity of the liquids consumed by the American people in the twelvemonth has found that in last year enough tea, coffee, beer, liquors and other beverages covered an area of land two square to a depth of ten feet—large enough, it was suggested, to float several navies of the size of our own. The amount of alcoholic beverages alone which were consumed satisfy the national thirst during the period would fill a canal 100 long, 100 feet wide and 10 feet

One Hundred Dollars a Day

is the value H. A. Tisdale, Pendleton, S. C., places on DeWitt's Hazel Salve. He says: "I have used it for 20 years. I tried many other salves and medicines, but all failed except DeWitt's Hazel Salve. It is a combination of healing properties of Witch Hazel, antiseptics and emollients; and permanently cures blisters, itching and protruding sores, cuts, bruises, eczema, rheum and all skin diseases. See Tollman & Co.

Government tests of wireless telegraphy between Fort Fisher and Schuyler, 106 miles apart, are a complete commercial success.
