TO PREVENT CAR FAMINE.

Southern Pacific Will Hereafter Furnish Plenty for All Shipments,

It is announced that the Southern Pacific Raliroad company will under-take to see that Oregon's industries do not hereafter suffer from a car famine:

The people along the line of the Southern Pacific in this state are ab-solutely dependent upon the road for the removal of their products to the market, and, while the producer suf-fers materially from such conditions as have existed throughout the great timber belt for the past four months. it is certainly true that they have suffered no greater loss than the

raliroad company.

To cripple the industries along its lines means simply that capital will withdraw from the district and go onto the Great Northern or Northern Pacific, where they prevent car famines, consequently one can hardly believe that it is contrariness on the part of the Southern Pacific and the fact that they are endeavoring to prevent the recurrence of the present condition would make one believe condition would make one believe they mean to do the square thing in the future -Ex.

#### Editor's Unusual Modesty.

Some of the young men of the own got an idea in their heads that Editor Hendryx was going to be mar-ried Wednesday night, and a crowd went up to the residence of Grant Thornburg and, as they supposed, proceeded to serenade the newly-wedded couple with tin cans and all the other instruments that belong to a first class charivari. The screnade made all the wild animals in a radius of four miles hunt their holes, for fairly made the welkin ring, but Mr. Hendryx was sleeping peacefully in his own house, dreaming of bliss to come. We could perhaps give a list of those who took part in the entertainment, but we will refrain from doing so out of sympathy for them.—Granite Gem.

Not True of Barbed Wire Lines, Party line telephones are great disseminators of gossip, says the Port-land Telegram. Anyone who has such a 'phone in the house appre-ciates this assertion. The telephone is particularly attractive to the curious woman for the first month or two after the instrument has been installed. After that period a woman, if she has attended promptly every time the bell sounded, knows all egon climate.—Roseburg Review.

there is to discover about the other people on the line and about their friends as well.

#### Another Idaho Road.

It is the intention of the people ontrolling the Bruneau townsite and various projects in connection there with to build a railroad from the point on the Snake river where their boat line will land to the town,

This road will be eight miles length. A very feasible route has been found for it and it can be operated with small expense.

The intention is to build the road

immediately, and have it ready to run by the 15th of May. E. W. Johnson of the company was in Salt Lake last week looking up equipment for the

The boat which will run from Glenn's Ferry will soon be finished and the company will shortly be able to haul freight by boat and road from Glenn's Ferry to Bruneau. Beise Statesman.

#### To Harness the Falls,

The united water power of Sho-shone, Augur and Twin Falls is shortly to be transferred into elec-trical energy of 100,000 horse power for distribution in Idaho, Utah and Nevada. The company which will construct the power plants will be incorporated in a few days under the laws of Maine. It will expend \$750. 000 in the enterprise and it has capital at hand to carry it through-Boise Statesman.

## CREAMERY FOR LEWISTON.

Salem Company Decides to Establish Branch in Idaho Town,

George D Goodhue, agent and man ager of the Commercial Cream Company, of Salem, has just returned from Lewiston, where his company has decided to establish a branch of their prosperous business, although Lewiston does not possess the advantages enjoyed by Pendleton for such

The Lewiston branch will perhaps be ready for operation before spring. as the company will be ready to get the benefit of the earliest grass which appears. Lewiston does not enjoy the cold storage advantages possessed by Pendleton, and has less range and pasturage facilities adjacent to town, but the people took up the proposition readily.

All the company asks is a guaran-tee of 50 patrons who will furnish milk to start the creamery. The management is confident that the milk patrons will rapidly increase the institution gets under and the farmers reauze what the

handsome profits amount to.
In Union county the price paid for butter fat is regulated by the price of butter in the market. The price of the butter fat there is 2½ cents below the price of butter, and goes up and down with butter in the mar-kets. Common cows there have averaged from \$6.50 to \$10 per head per rooth, owing to the brisk demand for butter. Pendleton offers additional advantages for a first-class crean ery in having ample cold storage fa-cilities, by which surplus butter made in slack season can be stored indefinitely until the demand is bet-
