### **NEWS FROM THUNDER.**

### **Living Expenses Are Very High in Isolated District.**

L. A. Wayland and C. W. Stallings have returned from Thunder Mountain and report that the outlook is very satisfactory and that much development work will be carried on during the winter, says the Spokane Press.

While the mines are well stocked with supplies, it is feared that a shortage will be experienced before spring, as the merchants failed to have their goods brought in before the heavy fall of snow. Flour is now selling at \$10 per sack, bacon at 50 cents per pound, condensed milk at \$16 per case, kerosene at \$20 per case, and other supplies in like proportion.

There are 25 different properties operating in Thunder Mountain this season outside of the base belt where several companies are working large crews.

The Dewey is working day and night with a full force of about 30 men. The reports from their upper and lower tunnels are very promising and great results are expected from this property. The Sunnyside, under the management of Lee Abbott, is working a full force of 25 men.

## **BIBLE INSTITUTE**

### **FIRST ANNUAL MEETING**

### **HELD AT WHITMAN.**

Pendleton Academy, Weston Normal and Milton College Will Send Delegates of at Least Ten Students—O. R. & N. Has Offered Reduced Rate for the Occasion.

Whitman College will hold the first annual Bible Study Institute ever held there, on January 8-10, under the auspices of the Young Men's Christian Association.

All the colleges and academies of the country adjacent to Walla Walla have been invited to send delegates to this institute, in hopes of becoming acquainted with and of arousing interest in the work, in the different institutions. At least ten delegates will go from Pendleton academy, Weston Normal and Columbia college at Milton and an important and profitable meeting is expected.

Pendleton academy is showing a deep interest in the meeting and the young men going from here will go prepared to take advantage of every opportunity to learn and get in touch with the work.

The basket ball team of the different institutions will play at least two games during the meeting, and the team from the Pendleton academy expects to take part in one of the games. Those going from the academy are as follows: William E. Laing, James R. Thompson, Herbert Boorch, Horace Cheney, J. Peebler, E. B. Waffle, Arleigh Russell, Lindsay Conner, Roy Penland, William Howard, Earl Yates, Win Wright and Hopper.

Mr. Stone, superintendent of the Portland branch of the Y. M. C. A., will be present and take part in the meeting. Mr. Stone is one of the most active workers on the coast and his services will be beneficial in the extreme to the college boys undertaking this movement. It is the intention to hold these meetings regularly hereafter, and all the colleges in the inland Empire are expected to gradually join in the work until this Bible institute becomes a feature of the midwinter terms, with meetings held at different places each year.

The O. R. & N. has offered a reduced rate for the occasion and the different college delegations from Umatilla county are urgently requested by Whitman to take part in the meeting and make a good showing at the first institute. Following is the program for the occasion:

## **MAY SUCCEED BURT**

### **A. L. MOHLER MAY BECOME PRESIDENT UNION PACIFIC**

Has Had Wide Railroad Experience on Many Roads—O. R. & N. Success Largely Due to His Management and Foresight—Would Not Refuse Presidency.

A. L. Mohler, president of the O. R. & N., may be promoted to the presidency of the Union Pacific, in place of President Horace G. Burt, who resigned yesterday, says a Portland paper.

The announcement of the retirement of President Burt came as a surprise, but was quickly followed by gossip as to the probable successor. Some of the Eastern papers yesterday coupled the news of the resignation of Mr. Burt with the mention of Vice President Thorne, of the Texas & Pacific, a Gould road, as successor. In Spokane the railroad men think Mohler has an excellent chance for the position.

Since he entered railroad service as an office clerk for the Chicago & Northwestern, at Galt, Ill., in 1868, Mr. Mohler has, by his energy and ability, won steady promotion.

His railway experience has included one year as station agent, the next as clerk in the auditor's office, two years of service as traveling auditor and pioneer agent, two years as chief clerk in the freight department, one year as assistant general freight agent, six years as general freight agent Burlington, Cedar Rapids & Northern, three and one-half years as general freight agent of the St. Paul, Minneapolis & Manitoba, now Great Northern, of which road he was subsequently consecutively land commissioner, general freight agent, general superintendent, assistant general manager and general manager.

When he left J. J. Hill he became general manager of the Minneapolis & St. Louis, and then came to Portland and for years has been president of the O. R. & N. The remarkable growth in business and earnings of that company is largely attributed to his efforts.

Mr. Mohler's ability and record have been widely recognized and on a number of occasions in recent years his name has been mentioned in connection with the presidency of Eastern roads. He has heretofore refused to leave the O. R. & N., but as the Union Pacific is also a Harriman line it is not thought he would refuse the presidency of the latter line if offered to him.

One report from the East has it that the resignation of Mr. Burt arose from a disagreement between the president and Mr. Harriman, chairman of the board. Burt was a strong advocate of piece work in the railroad shops, which Mr. Harriman has ordered abolished.

### **RUSH TO BUFFALO HUMP.**

### **One Hundred Thousand Pounds of Freight on Road.**

Never in the history of the camp has there been more freight going into the Hump than at the present time. During this week Frank Brown has loaded 26 four-horse teams with nearly 100,000 pounds of freight and then was short of freighters. All of these teams are now on the road and comprise a 10-stamp mill with rock crusher and concentrator for the Jumbo besides a large amount of equipment for the Cracker Jack.

The roads into the mountains above the snow line are in good condition and if no storm occurs within the next few days they will be packed as hard as ice. The snow road is rapidly becoming popular with the freighters, as the absence of rocks, stumps and holes more than makes up for the extra cost of horse feed and cold weather. With freight going in as it is this winter, no trouble is experienced in keeping the road open and a trip to the Hump is now practically a continuous sleigh ride. —Grangeville Free Press.

### **Had Wrong Face Along.**

"Just one kiss," the lover pleaded. "No, indeed," the maiden said. All his coaxing went unheeded. "Not a one till we are wed. Wasn't she precise and prim? Not to give one kiss to him?"
