RUSSIA'S FROZEN LAKE IS A BARRIER

As if it were not enough to have to fight the Japs by sea and land, the Russians are now confronted with the dreaded ice storms upon Lake Baikal, which keep the thick ice of the lake splitting and shifting just when they are trying to keep their railway tracks across it in condition to transport troops.

Baikal does not look very big upon the ordinary school maps of Siberia. It is, in fact, very nearly as large as Lakes Erie and Ontario combined, and at its widest part is wider than either of these great lakes of America. Long Island Sound would be lost in one end of it.

More than 400 miles as the crow flies from its northern to its southern end it lies square across the path of the Siberian railway, a formidable obstacle. In summer trains are ferried across from shore to shore in a few hours. In the dead of winter tracks can be maintained upon the ice, but there always some weeks in spring and fall when traffic is interrupted.

A loop of the railway to pass around the southern end of the lake and make a possible all-rail line has been surveyed, but the rugged mountains that bound the lake make its construction very difficult. The Siberian line has already cost more than \$400,000,000, and the state railways in general cost \$7,000,000 year more than they earn, so that Russia naturally has hesitated about under-

taking another such great expense. The cost of the loop line would not be much in the United States, but Russia, with all her enormous size, has a foreign trade smaller than that of Holland, Australia or Belgium, and her resources are taxed to the utmost to maintain the railways she already has and to keep the army and navy going.

Being about as far north as Hudson's Bay and at an elevation as great as the top of the highest mountain in Westchester county, Lake Baikal is cold enough in winter to manufacture a good quality of ice but the tremendous gales that sweep over it from the northwest are deflected by the high mountains of the Baikal range to the westward and blow directly down upon the ice upon that side, greatly depressing it and causing it to bob up elsewhere where the pressure is less.

This occasions ice-cracks and shifting of the surface even when the solid ice is quite thick enough to bear the light cars of the Siberian railway train, which are only about one-third as heavy as ours.

According to yesterday's dispatches such a storm is on now, making cracks several yards wide, which laborers are trying to close by fitting in blocks of ice which would soon freeze in place if the wind would let them.

There is also great scarcity of ties upon which to lay the rails.

HARBIN FOR A BASE

RUSSIAN CITY IN THE HEART OF MANCHURIA.

Six Hundred Miles North of Port Arthur—A Place of Great Military and Commercial Importance—is Three Hundred Fifty Miles West of Vladivostok—Has Sixty Thousand Population.

New Chwang, Feb. 26.—The city of Harbin, which Russia has decided to make the center of her military concentration, is located on the Sungari river, at the point where the Manchurian branch of the Siberian railway crosses the stream, and where the Chinese Eastern branch starts south to Port Arthur and Dairen. It is about 350 miles west of Vladivostok and 600 miles north of Port Arthur. Its location is the geographical center of Manchuria and is admirably situated. The city is surrounded on all sides for hundreds of miles with rich and productive agricultural country, producing corn, wheat, oats, barley, tobacco, vegetables and some fruits. Minerals and timber and great areas of grazing lands also surround it.

At present the place consists of the old town, three miles from the central depot; Preston or the river town, the present commercial center, and the administration town, in close proximity to the railroad station. Before the railway engineers establish-

ed this as their headquarters there was no native town in the vicinity, and the entire place is therefore a Russian product.

The city has been created by the Russian government, under the management of the Manchurian Railway Company. The land for many miles in each direction has been secured so as to make it impossible for any foreign influence to secure a profit or foothold close to the city, and foreigners have been recognized as having no rights whatever. The normal population of the city consists of 60,000 Russians, exclusive of soldiers.

The Sungari river is navigable with light draught steamers and native craft for nearly 200 miles above the city. From Harbin to the Amoor river during the navigating season, which will begin in about four or five weeks and continue to the first of November, good sized steamers run daily.

The city was started primarily as a military center and an administration town, for the government and direction of railway affairs. Its growth into a splendid commercial and manufacturing city was not originally provided for by the promoters, and it was somewhat of a surprise to them, but, once started, the government used every system of promotion and protection that could be devised to encourage its growth along these lines. Numbered among the city's industries are flour mills, several of which are equipped with modern American machinery, meat-packing plants, sawmills and brick-making plants.

INDIANA SPIRITUALISTS.

Are Met in Anderson for Three Days' Convention.

Anderson, Ind., Feb. 26.—Believers in spiritualism, who are more numerous in Indiana than in any other state of the Union, gathered in force here today for a three days' convention. The primary purpose of the convention is to consider and adopt plans for the solidifying and strengthening the state organization. To this end it is proposed to appoint district superintendents to look after the work in each congressional district, to form circuits for speakers, mass meetings, quarterly meetings, etc., and to otherwise arrange for carrying on the propaganda in a systematic manner.

Some of the most prominent spiritualistic leaders and mediums of the entire country are attending the convention and during the three days the gathering will be in session there will be a number of seances and lectures in addition to the regular business meetings.

TO PROTECT MEAT BUYERS.

State Commission for That Purpose in Pennsylvania.

Harrisburg, Pa., Feb. 26.—The commission appointed by Governor Pennypacker to assist the State Livestock board in the preparation of rules for the guidance of meat inspectors in disposing of the carcasses of meat-producing animals found upon slaughter to be afflicted with tuberculosis held its first meeting at the capitol today for the purpose of organizing.

It is proposed that the commission shall consider the relation of the meat of tubercular animals to the public health and the measures that it shall be necessary to employ to protect consumers against danger from infectious meats.

To Hang for Triple Crime.

Raleigh, N. C., Feb. 26.—Governor Aycock having declined to intercede, the execution of Jabel Register will take place today in the Columbus county jail at Whiteville. Register was convicted of a triple crime—murder, burglary and arson. On March 28 last, in company with his father, H. B. Register, he went to the home of Jesse Soles, a white man, and shot Soles and also a negro by the name of Jim Staley. After killing the men the Registers robbed the house and burned it. The elder Register was found guilty and sentenced to life-imprisonment.

Two severe cases of Ovarian Trouble and two terrible operations avoided. Mrs. Emmons and Mrs. Coleman each tell how they were saved by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I am so pleased with the results obtained from Lydia E. Pinkham's Vegetable Compound that I feel it a duty and a privilege to write you about it.

"I suffered for more than five years with ovarian troubles, causing an unpleasant discharge, a great weakness, and at times a faintness would come over me which no amount of medicine, diet, or exercise seemed to correct. Your Vegetable Compound found the weak spot, however, within a few weeks—and saved me from an operation—all my troubles had disappeared, and I found myself once more healthy and well. Words fail to describe the real, true, grateful feeling that is in my heart, and I want to tell every sick and suffering sister. Don't dally with medicines you know nothing about, but take Lydia E. Pinkham's Vegetable Compound, and take my word for it, you will be a different woman in a short time."—MRS. LAURA EMMONS, Walker-ville, Ont.

Another Case of Ovarian Trouble Cured Without an Operation.

"DEAR MRS. PINKHAM:—For several years I was troubled with ovarian trouble and a painful and inflamed condition, which kept me in bed part of the time. I did so dread a surgical operation. "I tried different remedies hoping to get better, but nothing seemed to bring relief until a friend who had been cured of ovarian trouble, through the use of your compound, induced me to try it. I took it faithfully for three months, and at the end of that time was glad to find that I was a well woman. Health is nature's best gift to woman, and if you lose it and can have it restored through Lydia E. Pinkham's Vegetable Compound I feel that all suffering women should know of this."—MRS. LAURA BELLE COLEMAN, Commercial Hotel, Nashville, Tenn.

It is well to remember such letters as above when some druggist tries to get you to buy something which he says is "just as good." That is impossible, as no other medicine has such a record of cures as Lydia E. Pinkham's Vegetable Compound; accept no other and you will be glad.

Don't hesitate to write to Mrs. Pinkham if there is anything about your sickness you do not understand. She will treat you with kindness and her advice is free. No woman ever regretted writing her and she has helped thousands. Address Lynn, Mass.

\$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness. Lydia E. Pinkham Medicine Co., Lynn, Mass.

ODD ARCTIC NEWSPAPER.

The Eskimo Bulletin is the Only Yearly Paper in the World.

One of the oddest of newspapers is that published by an Eskimo missionary in the Arctic region, almost within the Arctic circle, says News-paperdom.

The Eskimo Bulletin is the name of the sheet and it claims to be "the only yearly paper in the world." It is printed in Cape Prince of Wales, its editor being W. T. Lapp, a missionary with journalistic qualifications.

Mt. Tabor Asylum a Nuisance.

Citizens of Mt. Tabor have begun suit in the Multnomah county circuit court to condemn the Mt. Tabor Sanitarium and asylum, as a public nuisance and will ask for its abandonment and removal outside of the residence district. Recently 40 crazy Indians from Alaska were brought there.
