A FRIEND IN NEED

LEE TEUTSCH RECEIVES PITIFUL NOTE FROM SICK WOMAN

Plucky Widow Who Supports Herself and Family, Driven to Ask a Loan From Mr. Teutsch—He Responds Promptly—Friends Should See That Her Wants Are Supplied.

Lee Teutsch has the reputation of having a big heart and a willing hand.

That's the reason he got the following note last evening.

A poor sick woman of Pendleton, whose name is mercifully withheld from the sordid gaze of the public, is lying ill at her home. There is no food in the house nor wood to help the sick woman warm. She depends on her daily work to furnish the necessities of life and when her hands stop her pay stops.

For a week she has been sick and has hoped every day to get better and be able to work. Her scanty store has dwindled lower and lower until at last she must ask for help or starve and she sent the following note to Lee Teutsch yesterday evening:

"Pendleton, Feb. 25.

"Mr. Teutsch:—I am down sick in bed and am clear out of wood and have no money to buy any with. I am going to ask you to lend me \$2.50 if you will, to get some wood with, and as soon as I get out to work again, I will pay it to you. I am clear out of everything and will be glad if you can let me have this amount, as I don't know anybody else to ask.
Yours truly,"

As soon as a boy could trot from Mr. Teutsch's store down to the house, this needy widow got her loan, and is now rejoicing that her confidence was not misplaced.

She needs more help. She is too proud to beg and will work when she can and friends should see that she is taken care of.

WILL CONTINUE SLOYD.

Conclusion Reached by the School Board Last Night.

The school board held a meeting last night, at which time the general condition of the schools was discussed and plans entered into for the harmonious working of all the departments of the district.

The matter of the Sloyd department was talked over by the board, and Mr. Le Masters who has charge of it, and it is probable that the work will be continued for the remainder of the year at least. It has proven a very interesting department to the pupils and is of practical value to them. There have been some misunderstandings as to the status of the head of the department, but that is now overcome, and it is thought that the work will proceed with no unpleasant interruptions from any source.

Glee Club Entertainment.

The Baptist church was comfortably filled last night with friends of the Whitman Glee Club, which rendered an entertaining program of songs and stories from school life. It was one of the most sprightly entertainments of the season and was highly appreciated. There was not a tiresome number on the program. They will be warmly welcomed to Pendleton at any future time.

To Sue the O. R. & N.

Baker City, Feb. 26.—Ben Bow and Jack Nixon, who were acquitted of the charge of stealing castron car fixtures for their foundry, yesterday, will now sue the company for damages.

FARMS ARE RUINED

MINING COMPANIES TO BE SUED FOR DAMAGES.

Shoshone County, Idaho. Streams Have Been Poisoned by Refuse From Smelters—Farming Land Has Been Ruined and Water Rendered Unfit for Use.

Spokane, Feb. 26.—Damages for \$546,500 will be demanded by 21 farmers of Shoshone county, Idaho, from the owners of several large mines in the Coeur d'Alene in suits which will be filed in the federal court at Moscow, Idaho, sometime this week. The farmers, all of whom have assigned their claims to Elmer Doty, claim that by reason of dumping debris in the south fork of the Coeur d'Alene river their farms have been irretrievably damaged. W. T. Stoll, of Spokane, and Judge Edwin McBee, of Rathdrum, are attorneys for the farmers.

It is contended by the farmers that in former years when the Coeur d'Alene river overflowed its banks, it left a sediment that was beneficial to the overflowed land.

It is claimed now, however, that about 3,000 tons a day of debris is being thrown into the south fork, and that the channel is being rapidly filled up.

Whereas, it is claimed, the river used to overflow once a year, now, in the filled condition of the channel, the slightest freshet causes it to overflow.

It is claimed that after the water, which mixes with lead in the process of concentration, flows back into the river, it renders the water absolutely poisonous, so that when the land is overflowed it leaves a sediment which destroys the soil.

It is also claimed that for stock to drink the water of the river means certain death. The valley of the Coeur d'Alene, it is pointed out, used to be a fine hay country. Now, it is alleged, its productiveness has been destroyed.

Choose wisely, enjoy long.
