

ABOUT THAT COAT

You wear a coat. Why? To keep the cold out? No; to keep the warmth in. What of the body that has no warmth—the thin, poor body that lacks the healthy flesh and fat it needs?

For such we say that Scott's Emulsion provides the right kind of a coat. Why? Because Scott's Emulsion builds firm, solid flesh and supplies just enough fat to fill nature's requirements—no more. That means bodily warmth.

We'll send you a sample free upon request. SCOTT & BOWNE, 409 Pearl Street, New York.

DITCHES KILL FISH

JOE HOCH THINKS SCREENS SHOULD BE USED.

Fishermen Should Also Be Honest Enough to Restrict the Day's Catch to the Lawful Limit—Umatilla County Promises Good Returns to Fishermen This Season—Sportsmen Should Use Judgment in Fishing and Give Everybody a Chance.

Joseph Hoch, one of Pendleton's enthusiastic fishermen, is not in love with the irrigation plants of the country when he comes to think of their effect on fish. He claims that the ditches are responsible for the death of a great many of the fish of Umatilla's streams, and is, therefore, heartily in favor of the putting of fish screens as ordered by the fish warden.

The trout, in coming up the ditches get out on the side or lateral ditches and go on down until they become lost and swim out into the shallow water where it spreads over the field. The screens will to a certain extent overcome this fault and will be a good thing for the fishermen of the county.

The dams which have been placed in the streams are also detrimental to the fish for they are stopped by them from going on up the streams to the spawning grounds, but with the precautions now being taken by the fish wardens, the conditions will soon be changed so that but little damage will be done.

Mr. Hoch agrees with the claim that the number of any one day's catch should be restricted, but he does not see how the matter will be handled unless it is by the education of the fishermen. If a person wants to catch a larger number than the law allows it is a hard matter for any one to detect him. It is largely a matter of honesty and will have to be left to the individual fisherman.

There are indications that the number of fish this year will be as large, if not larger, than last year, for new stock has been put in the streams each year, and this transplanting is now beginning to show fruit. Every fisherman in the county should have a chance for one or two good catches during the season.

ELECTROCUTION.

End of the Keeper of a Tenderloin Cafe in New York.

Ossining, N. Y. March 12. — Arrangements have been concluded at Sing Sing prison for the electrocution next week of Thomas Tobin, the New York murderer who came near escaping the death chair by skillfully feigning insanity. Though the exact time for the electrocution has not been made public, it is probable that it will take place at an early hour Monday morning.

Tobin's crime attracted wide attention because of its diabolical nature. The condemned man was manager of the Empire Cafe, a notorious gilded resort of the New York tenderloin. His victim was Capt. Craft, a man of means who made his home at Flushing, Long Island. On the night of the crime Craft drifted into the Empire and attracted attention by displaying a large roll of bills.

Evidence at the trial showed that Tobin, with the assistance of a waiter, deliberately killed the unfortunate man for the purpose of robbery. After the crime the murderer hacked the head from the body and was surprised by the police in the act of attempting to cremate the remains in the basement furnace under the cafe. His defense was insanity and so successfully did he play the part for a long time the medical experts were puzzled. After being sent to the asylum for the criminal insane Tobin was caught off his guard and the sham discovered. His sentence to death followed.
