 makes pale, thin children fat and chubby. Overcomes wasting tendencies and brings back rosy cheeks and bright eyes.  
 It's surprising how quickly children respond to Scott's Emulsion. It contains just the element of nourishment their little bodies need. They thrive on it.  
 Even a few drops in the baby's bottle have a noticeable effect for good. Nothing better than Scott's Emulsion for growing children.

**FARMERS COMPLAIN OF SHIFTLESS FARMHANDS.**  
 Wages of \$1 Per Day and Board No Inducement for Men to Remain Long With a Position — Good Opportunity for Steady, Permanent Class of Workingmen—Pendleton Never Has a Surplus of Laborers.  
 "I am paying \$1 per day for farm hands this spring," said a prominent farmer to the East Oregonian this morning, "and it seems impossible to keep good men at that price."  
 "There are plenty of men, but they will work but a few days, when their feet begin to itch and they hit the road. Umatilla county pays the best farm wages of any county in the state, the stock ranches also pay good wages, and yet it seems out of the question to keep steady men, on whom you can depend for work every day in the week and every week in the month."  
 "What the farmers of Umatilla county would like is a supply of steady, sober, hard-working young men, who are permanent in the country and who wish to secure a foothold and remain here.  
 "Such young men can always find steady work here at from \$20 to \$30 per month on the farm, and even higher wages than that on the stock ranches.  
 "These wages, compared with \$10 and \$12 per month in the East and South are strong inducements for good immigrants to locate here. Young men who so desire can take up homesteads, work steadily and comply with the law as to residence at the time of completing title to their land, have saved up a good start on which to begin business for themselves if they so desire.  
 "Some of the richest stockmen and farmers in Umatilla county began herding sheep here less than 10 years ago, and by attention to business and economy, have gradually grown to their present financial standing."  
 The demand for labor in Pendleton and Umatilla county is always at the very limit of the supply, on account of the varied industries drawing up on the labor forces of the city. The country districts are constantly in need of men, especially at this time of the year, when spring farm work and lambing are at hand.  
 Sheepshearing will soon begin in full blast, and this will require a large number of extra men, in handling the wool and the extra herds into which the sheep are divided during the shearing season.  
 Alfalfa hay, by being harvested two and three times a year makes almost a constant hay harvest after June 1, and the irrigation necessary to grow the crop, keeps a large supply of men constantly at work during the spring months.  
 The greatest demand for labor and teams comes when the wonderful wheat harvest of Umatilla county begins to ripen and the combined harvesters start into the fields. No other community in the West harvests on as large a scale as Umatilla county, where the immense combined harvesters, using 26 to 36 horses and five to ten men each, have almost completely supplanted the stationary threshers.
