Alexander Department Store

Shake a Pan of Beans

And the big ones come to the top. Same way with furniture stores in the shake-up of competition. It's more than floor space, the right prices and right furniture and right treatment makes our store really big.

Our stock is big, but our prices little in comparison with the prices we give. Carpets, rugs, linoleum. Newest patterns. Prettiest designs.

BAKER & FOLSOM

Furniture and Carpets

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO., Toledo, O.
Sold by Druggist, price 75c.
Take Hall's Family Pills for constipation.

The Eugene Commercial Club has begun an agitation for lower freight rates on merchandise into that city and lower rates on produce out.

FARMERS' MEETING

(Continued from page 1.)

feed to make the complete animal, just as it requires different kind of cultivation to make the perfect crop.

"In this section of Oregon, there are magnificent opportunities for raising all the forage crops in the highest excellence. Your irrigated districts are the most wonderful in the West. All the countless kinds of diversified feedstuffs will grow here and the feeding of stock will increase in interest and profits as you come to recognize the value of diversity.

Value of Diversity.

"As an instance of the value of diversity of feed, I saw two carloads of fat cattle from this district unloaded in the Portland slaughterhouse last winter. One of the carloads had been fed straight alfalfa, the other a mixture of alfalfa and barley. Those fed the mixture of barley with alfalfa, dressed 60 per cent beef, while those fed on straight alfalfa dressed but 53 per cent. The first carload had filled out in every part and carried all the beef that it was possible to get on their frames.

"You people do not appreciate fully the possibilities of this district. The dry-land alfalfa will grow on your hill soil. It does not require so much water as sunshine. It will grow abundantly with a good supply of oxygen from the air. It needs only cultivation to hold the moisture that is necessary at the roots. It does not need so much water as light and air and sunshine, and cultivation. You should sow a cereal crop with it to protect the young plants. Just cut this cereal crop and let it lie on the ground the first year to keep the hot sun from burning the plants and to hold the moisture in the ground.

"As the alfalfa takes root and strengthens, and becomes fixed in the soil, it will draw vitality from the air, and add to the soil, and become a perpetual storehouse for soil energy.

"I am glad to see the sugar beet coming into the Echo district. The irrigating ditch and sugar beet are the strongest missionaries of the Mormon. They have made the Mormon the champion agriculturist of the great American desert. The sugar beet will enrich your land. It will furnish employment for your idle men, women and children, and is a diversified crop that makes soil richer year by year.

"One thing that must be changed in Oregon is the practice of flooding alfalfa. You are using too much water. It requires more sunshine, and less flooding. Cultivate it, instead of flooding it. Harrow it over and cut up the soil, and hold the

moisture at the roots, instead of killing it out with surface drowning. "Alfalfa alone is not a complete ration. In Idaho they are sowing rye grass with it, to make it more effective in fat and milk producing. It must have assistance in filling out the animal. There must be a mixture of ingredients to finish the animal for beef."

Questions on Feeding.

Dr. Hutchinson then invited questions, and the period at which alfalfa should be cut, for the best feeding results was discussed.

Mr. Brownell asked: "At what period should the first crop on new land be cut?"

Dr. Hutchinson answered: "Just as the bloom first makes its blue tint seen—before the flower has burst out. It should be cut just as early as possible after the bloom is formed and before it bursts out. It is a good plan to cut the first crop and leave it lying on the ground to protect the roots of the young plants."

Question: "Should alfalfa be cut at certain stages for special purposes?"

Answer by Dr. Hutchinson: "Nitrogen is the essential fat and milk producer and this is at its highest in the plant just before the bloom bursts. Therefore, for either fat or milk purposes, it is best to cut it just before the bloom opens out in full. The conditions of the weather, of course, changes the time at which you should cut it, and also changes the feed value of the crop, no matter at what stage of growth you may cut it."

Question: "Which crop is best for fat producing, and which for young stock?"

Answer by Dr. Hutchinson and Prof. French: "There is no difference in the feed values of the different crops. The second crop having more coarse straw is better for calves, because they demand more bulk in feed, and the second crop contains

more fibre. The third crop is least valuable of any of them, as it is usually improperly cured and has less strength. Fat and milk require the same properties and, therefore, there is no difference in the crops for either of these purposes."

F. S. Bramwell's Address.

F. S. Bramwell, field superintendent of the La Grande sugar factory, who has charge of the beet crops at Echo, was then introduced, and made a few pointed remarks which were received with hearty applause.

Mr. Bramwell said: "Echo is unfolding. The growth will come faster than you realize, if you diversify your crops and make a demand for new people to fill your fields and gardens. You must make a demand for people before people will come to your town, and you will not induce new people to come here by raising alfalfa. You must introduce new crops, and create a labor market, so the word will go out to the world that Echo needs people to do her work."

"Under the one-crop system, your land has now reached the zenith of its value. There is no possibility of alfalfa raising advancing the prices of your land. You must grow something that will furnish employment to people, to induce settlers to come, and then your land values will soar. The sugar beet and the berry patches, the fruit and garden industry must be introduced to make a demand for settlers and this settlement will advance your land values."

"You are using 100 times more water in this district than they use in Utah. You are drowning out your alfalfa and destroying the life of your land by using too much water. If you wish to ruin your alfalfa fields and destroy the soil values of your land, just continue to use the dyking system of irrigating. It causes your alfalfa to turn yellow,

(Concluded on page 6.)

Woman's Nightmare

No woman's nappies can be complete without children; it is her nature to love and want them as much so as it is to love the beautiful and pure. The critical ordeal through which the expectant mother must pass, however, is so fraught with dread, pain, suffering and danger, that the very thought of it fills her with apprehension and horror. There is no necessity for the reproduction of life to be either painful or dangerous. The use of Mother's Friend so prepares the system for the coming event that it is safely passed without any danger. This great and wonderful remedy is always applied externally, and has carried thousands of women through the trying crisis without suffering.

Send for free book containing information of priceless value to all expectant mothers. The Bradford Regulator Co., Atlanta, Ga.

Mother's Friend

WE ARE READY

The New Pendleton Steam Laundry

IS NOW IN FULL OPERATION AND EVERYTHING IS MOVING ALONG LIKE CLOCKWORKS.

THE PENDLETON STEAM LAUNDRY IS A MODEL. IT IS THOROUGHLY EQUIPPED TO TURN OUT ANY AMOUNT OF WORK THAT MAY BE SENT TO IT. NO BETTER FACILITIES FOR DOING THE HIGHEST CLASS WORK CAN BE FOUND ANYWHERE. OUR PLACE IS PERFECTION ITSELF. ALL OUR MACHINERY IS BRAND NEW AND OF THE VERY LATEST MAKE. ALL THE MODERN CONVENIENCES ARE IN OUR PLACE. WE WENT THE LIMIT AND THE CITIZENS OF PENDLETON HAVE THE ADVANTAGES OF OUR PERFECT PLANT.

WE ARE PROUD OF OUR PLANT, AND OUR WORK AND WE TAKE PLEASURE IN SHOWING VISITORS THROUGH.

IT'S UP TO US

TO PLEASE YOU IF YOU ENTRUST YOUR WORK TO US. WE WILL CHEERFULLY TAKE THE RESPONSIBILITY AND WE WON'T FAIL.

FIRE-PROOF BUILDING

THE BUILDING WE OCCUPY WAS BUILT ESPECIALLY FOR OUR USE, ACCORDING TO OUR OWN PLANS, AND IS ABSOLUTELY FIRE-PROOF. YOU TAKE NO CHANCES.

A SMALL ORDER WILL RECEIVE THE SAME CAREFUL AND PROMPT ATTENTION AS A LARGE ONE. A POSTAL CARD OR TELEPHONE CALL WILL BRING OUR WAGON.
