

NIP IT IN THE BUD.

First Appearance of Dandruff a Forerunner of Future Baldness.
That such is the case has been conclusively proven by scientific research. Prof. Unna, the noted European skin specialist, declares that dandruff is the burrowed-up cuticle of the scalp, caused by parasites destroying the vitality in the hair bulb. The hair becomes lifeless, and, in time, falls out. This can be prevented.
Newbro's Herpicide kills this dandruff germ, and restores the hair to its natural softness and abundance.
Herpicide is now used by thousands of people—all satisfied that it is the most wonderful hair preparation on the market to-day.
Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

Competitive Examinations in Progress at Many Points.

New York, April 13.—A multitude of young men throughout the country, representing the flower of the student bodies of leading colleges and universities, racked their brains today in an endeavor to successfully pass the examinations for the Cecil Rhodes scholarships. The examinations were held simultaneously in every state and territory. Of the vast number of competitors about four score will be awarded the coveted honors.

Today's examinations form the first step toward carrying out the colossal educational plan of the late Cecil Rhodes. By the terms of the will of Mr. Rhodes two scholarships in Oxford university were apportioned to each of the states and territories of the United States, for the purpose of promoting a proper understanding of England, her laws, customs and institutions. Each of the scholarships is worth \$1,500 annually, the money being provided by interest from a permanent endowment set aside for that specific purpose by the terms of the will.
