EX-QUEEN'S BIRTHDAY.

Deposed Successor to the Hanoverian Throne.

Vienna, April 14.—At Gmunder, in upper Austria, where she resides with her son, the duke of Cumberland, the venerable Queen Marie of Hanover observed her 86th birthday today.

Queen Marie is a queen without a throne, for her husband was deposed nearly 40 years ago, so that the greater part of her life has been spent in exile. She was 25 when she married the king of Hanover, in 1843, and she enjoyed being a queen for 23 years. In the war of 1866 Hanover sided against Prussia, and the Prussian king, afterwards Emperor William I of Germany, the grandfather of the present emperor, revenged himself by deposing the Hanoverian monarch and adding Hanover to Prussia.

Queen Marie has never forgiven the Hohenzollerns for depriving her of her seat on a throne, and it is due chiefly to her urgings that her son, the duke of Cumberland, refuses to abandon his claim to the throne of Hanover.

CITY LABORERS ORGANIZE.

Seek Affiliation With American Federation of Labor.

Springfield, Mass., April 14.—The city laborers of 60 municipalities will organize a national body affiliated with the American Federation of Labor at a convention to be held in this city tomorrow. While the movement had its inception in the East many Western and Southern cities have promised to send representatives to the convention.

Up to the present the organization of city employees has proceeded along unsystematic lines. In some cities there are unions which include city laborers of various departments; in other cities the various classes of laborers have separate unions, and in others the city laborers are unorganized. A few of the unions hold charters from the Knights of Labor.

Primarily the object of the national organization is to enable city laborers' local unions to avail of the good offices of the American Federation of Labor in securing a uniform and equitable scale of wages and hours for city laborers throughout the United States.

The boycott, it is understood, will be the weapon adopted to bring cities to terms. The promoters of the movement argue that the city laborers, if well organized, can make their displeasure so felt at the polls that politicians and officials desirous of continuing in office can be forced to heed reasonable requests.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
