A solid, creamy foam is the invariable indication of body, age and excellence of brewing material in beer. Unless the best grades of barley and hops, selected with extreme care, are used in sufficient quantity, brewed so as to give the beer the proper strength and body, and afterward the beer is thoroughly ripened and aged, it cannot show the solid, creamy foam always found in the famous

A start was made with her last Sunday, but she was so weak that only five miles were made the first day, when a stop was made for her to rest. It required four days slow traveling to reach this city, a distance of but 24 miles.

The last two miles, down the hill into this city, she was carried by four men on a stretcher, because of the rocks in the road, which made it so rough that she could not ride in the carriage. Her brother has rented a house on Lincoln street. Her parents and brother and sister will reside here until the patient recovers.
