THE CORINTHIAN CANAL.

A Waterway Begun Six Hundred Years Before Christ.

"Speaking of canals," said the engineer who had been talking about Panama, "a very interesting canal, and one not much heard of, is that connecting the gulf of Corinth and the gulf of Aegina in Greece. It's some older than any we have in the western hemisphere also, for Perander, tyrant of Corinth, proposed to cut through the isthmus as long as 600 years before Christ. Superstition stopped him, however. Julius Caesar and Caligula took it up again when Rome had hold of Greece, but it was too much for them. Then came Nero and he went at it with vigor, but the work stopped when he died. Others kept pounding away at it for the next several hundred years, but it was not until 1881 that real work of the Nero energy was put upon it. Then Gen. Turr, aide-de-camp to Victor Emmanuel of Italy, organized a company and worked on it till the money gave out in 1890, the chief obstacle being some kind of a flint which dynamite couldn't break.

"About \$10,000,000 was spent up to 1890, and then Mr. Syngros took hold, organized a company with \$965,000 working capital, and finished the job in 1893. It was only four miles long, but it is 69 feet wide at the bottom and 80 feet at the water line, 26 feet and 3 inches deep in water, and it is cut nearly all the way through solid rock rising at some points to 269 feet above the canal. It is like a canyon and ships do not take kindly to it, the entrance being bad, a strong wind blowing through it as through a great airshaft, and there is at times a strong reverse current. It is an interesting trip through the canal, and it saves 123 miles of very rough water and 20 hours of time; but so far skippers prefer to go around the peninsula rather than through the canal, though with some changes which will be made it is believed the canal, though with some changes soon as a few ships begin to use it and remove the prejudice now existing against it."

Fenner of Marion, Ind., says: "I suffered with a cough until I run down in weight from 148 to 92 pounds. I tried a number of remedies to no avail until I used One Minute Cough Cure. Four bottles of this wonderful remedy cured me entirely of the cough, strengthened my lungs and restored me to my normal weight, health and strength." Sold by Tallman & Co.

HAIR NATURALLY ABUNDANT.

When It Is Free of Dandruff, It Grows Luxuriantly.

Hair preparations and dandruff cures, as a rule, are sticky or irritating affairs that do no earthly good. Hair, when not diseased, grows naturally, luxuriantly. Dandruff is the cause of nine-tenths of all hair trouble, and dandruff is caused by a germ. The only way to cure dandruff is to kill the germ; and, so far, the only hair preparation that will positively destroy the germ is Newbro's Herculid—absolutely harmless, free from grease, sediment, dye matter or dangerous drugs. It always itching instantly; makes hair glossy and soft as silk. "Destroy the cause, you remove the effect." Sold by leading druggists. Send 10c. in stamps for sample to The Herculid Co., Detroit, Mich. F. W. Schmidt, special agent.

THUNDER MOUNTAIN ROAD.

E. H. Dewey Outlines Plans to Open Rich Mining Region.

E. H. Dewey was over from Nampa Sunday. In talking of the matter of the road to Thunder Mountain he said there were three things he desired, says the Boise Statesman.

One was that the road should be completed this year; another that it should be built within the amount already appropriated; the third that it should not be so much longer that it would increase the cost of hauling freight.

With those points kept in mind it was his desire that the road should be built over the route that would accommodate the greatest number of interests.

Further, he said it would be advantageous for all interests to have the traffic of both sections of Thunder Mountain moving over the same road so far as possible. If the state road could be built so that the Big creek road could connect with it, it would be highly advantageous as it would be easier to keep the joint portion of the road in repair. It could also be kept open in winter better if the road could be built via the East fork route without costing more than the appropriation, without increasing the cost of freight to Roosevelt and without putting its completion over another year he had no objection whatever. He wanted to see just as many people benefited as possible without sacrificing the interests of the companies that had contributed to the road fund.
