## BACK FROM KOREA

BOISE MAN HAS MINED THERE PROFITABLY.

Graphic Description of the Hermit Kingdom—Cheap Labor There Enables Mining Companies to Work Low Grade Ores—Engineers Demand 37½ Cents Per Day and Board Themselves—Other Labor is 15, 20 and 30 Cents Per Day.

Mike Gallagher, a former well known Boise Basin mining man, but who for the past three years has been engaged in mining in Korea, returned to the city early Sunday morning to visit his old friends and the scenes of his former operations in Idaho, says the Boise Capital News. For 20 years Mr. Gallagher was engaged in mining in Idaho, the Boise Basin, Silver City and the Wood river country, being the principal scenes of his activity. He will remain in this country until September when he will return to the land over which the milardo maintains surveillance.

Nearly three years ago Mr. Gallagher went to Korea as foreman over a gang of men in one of the mines of the O. M. C. company, which owns a concession under the Korean government to a territory comprising about 40 miles square. The concession lies about 300 miles north of Seoul, the capital of Korea, and 60 miles east of Wegoen. It was obtained about eight years ago from the government by Mr. Leigh Hunt of Seattle. He then organized the company which now controls it, the stock being owned by people of all nationalities.

Mr. Gallagher has been ever since April 16 getting into Boise. First he embarked on a schooner at Chinnampo, crossing the Yellow sea to Chinnampo; thence by steamer to Kobe, Japan, thence by another steamer to Yokohama, and from there to San Francisco, and on to Boise by way of Ogden.

In coming out he was entrusted by the company with the transportation of about \$450,000 worth of gold bullion as far as Chemulpo, where it was delivered to the Japanese government to be coined into the coin of the realm.

The bullion was in 20 bricks weighing 2500 pounds. Much of the way he was accompanied by only two men, and this through a country constantly traveled by Russian and Japanese soldiers.

In speaking yesterday to a Capital News reporter about the mining industry in Korea, Mr. Gallagher said that it was a very promising country. Besides the company which he works for, the English, Germans, Italians and French have concessions and on all of the properties they are obtaining good values.

The ledges are very wide and carry values averaging about \$10 per ton. Owing to the cheapness of the Korean labor the ore can be mined at the least possible cost. Common labor costs from 15, 20, 25 and 30 cents per day. The highest priced labor is that of engineers who command the munificent sum of 37½ cents per day, and board themselves. Owing to the cheapness of labor all work can be done by hand cheaper than can be done in America with the most improved machinery.

The ore is of a sulphide formation, running about 50 per cent free gold, the rest being susceptible to cyanide treatment.

The company owning the concession has several mines in successful operation, having five stamp mills with 200 stamps in constant operation. These are to be materially increased in a short time. They have in the neighborhood of 10,000 Koreans in their employ, with about 50 white men acting as superintendents, foremen, etc.

Mr. Gallagher says that the Japs are rapidly settling in Korea, the commissioner of immigration reporting that something like 28,000 located in that country last year.

Supplies are taken into the camp in ox carts, but for transporting the more heavy machinery the company has its own heavy wagons.

During the low water they have to transport supplies for a distance of about 50 miles, but when the water is high boats get within a very few miles of the concession. The climate, he says is very much like that in Boise Basin, except that they have a rainy season for about a month during the middle of the summer.

Regarding the Russian-Japanese war Mr. Gallagher said that while they were near the scene of hostilities, and frequently saw troops marching through the country they did not hear as much of it as we do here. They frequently hear rumors of battles but never get anything authentic.

### FORCED VACATIONS.

Bank Clerks Must Leave Their Desks at the Noon Hour.

Bank tellers, bookkeepers and clerks in Hartford, Conn., have learned that hereafter not only will they be required to take annual vacations but must make use of the midday lunch hour privilege.

It is said that the State Bank Association will recommend also that it is advisable that all banks observe this precaution.

These regulations have grown out of the recent charges against a teller in a local bank who confessed recently that he had embezzled \$70,000 and covered the matter through remaining at his desk without a vacation for

a number of years and absent out during business hours.

### Some Good From Finland

The "Russification" of Finland, cruel, heartless and perhaps the most cruel, has had one good result according to Harold Draper. It is a decade since Norway was every sign of restiveness under the fish predominance, and is now demanding the right to manage its own foreign affairs, and to be rarely represented at foreign courts.

The treatment which Finland experienced from Russia has served as an object lesson to her and that country now realizes her only defense lies in a union with Sweden.

New York is wild with demands that the fleet of excursion boats in that city be remodeled and made fireproof. Most of them cannot be, and the Slocum horror will cost boatowners around there millions of dollars by tying up many expensive vessels indefinitely.
