NO MILL FOR ELGIN

SCOURING PLANT PROJECT IS A MERE RUMOR.

F. E. Judd Says Wool Baled at Elgin Will Continue to Be Sent Here—Transportation Facilities Forbid the Construction of a Plant There—Project of a Scouring Plant at Boise Was Killed by Failure to Get Rates—Pendleton Has Railroad Competition.

Rumors of the establishment of a wool scouring mill at Elgin, according to F. E. Judd, general manager of the Pendleton Scouring Mill, is perhaps without foundation. "I believe the erection of a scouring plant at Elgin to be impracticable," he said this morning. "There is but one road into Elgin and to succeed a scouring mill needs railroad competition.

"Here in Pendleton we have the Northern Pacific and the Harriman line and we get a rate. The same is true at The Dalles, where we have both water and rail transportation. Our company endeavored to start a plant at Boise, but the Union Pacific refused to make us a rate. It had our trade anyhow, but here it is different."

Mr. Judd says the talk of a scouring mill at Elgin may have been started by the farmers, who discussed a cooperative proposition. "Scouring plants," he continued, "cost money, and I am inclined to the belief that the Elgin story is merely a rumor." The Pendleton scouring mill has a wool press at Elgin and ship the product in the grease to this city. Mr. Judd said that the Pendleton Woolen Mills would resume opera-

AVOID CHAPS

If we knew anything better than

F. & S. TOILET CREAM,

for healing chaps, cracks and roughness, and keeping the skin smooth, soft and fair, we would have it. Those who try it say our Toilet Cream is the best proposition they ever used and we believe they are right.

Keep F. & S. Toilet Cream on hand and use it, and your face and hands will be free from summer skin discomfort. Daintily perfumed, pleasant to use, heals quickly, and costs little.

FOUNDATION CONTRACTS LET

SCHOOL BOARD ACCEPTS THE BID OF MOUSSU BROTHERS.

Three School House Foundations Will Cost \$7016 and Two Contracts Will Be Signed This Afternoon—East End Building Yet in Doubt—Plans of C. E. Troutman, Architect, Accepted by the Board—Weston Brick for Walls and Pendleton Stone for Foundations.

The city school board met yesterday afternoon and let the contract for the foundations of the three new school houses to Moussu brothers for \$7016. The other bidders' figures submitted were as follows: L. May, \$7305; E. Johnson, \$8340. A bond of \$3000 will be required of the Moussus.

This figure includes the completion of the basements ready for the joists of the first floor. This means the placing of the door and window frames and flue rings, and the complete inclosing of the flues. The basement walls will be made of bluestone from the Moussus' quarries, and the brick will come from the Weston yards. The flues will be partially of stone and partially of brick.

While the above figure includes the basement for the East End building, it is not known yet to a certainty where it will be located, and for this reason but two contracts can be made. They will be drawn up and signed this afternoon. A later session will determine to a finality just where the East End building will stand. It may yet be built on the old academy site. When its location is settled a special and separate contract will be drawn up, but the figures above given include all the foundation work for the three structures.

The contracts for the superstructures will probably be let next week, and everything possible will be done that is consistent with good work, to rush all three buildings to an early completion.

C. E. Troutman is the architect whose plans were accepted for all three buildings.

NEW WHEAT FILTER.

Invented and Patented by a Former Pendleton Man.

Alfred Holdaway, of Salt Lake City, has invented and patented a machine for treating wheat and other grain with vitriol, or any other preparation for making it immune against smut and rust. Hitherto the commonest process has been simple shoveling over of the grain in a bin or vat, a method that is superficial and unsatisfactory.

This is not the only mechanical device that has been contrived to do this work, by any means; nevertheless, it is believed to be the first that is successful. In effect, it is an agitator, and in an astonishingly short time will treat a large amount of grain and do it with absolute thoroughness and uniformity. The contrivance will be introduced into the wheat growing regions of the Northwest the coming fall, probably by Mr. Holdaway in person.

Alfred Holdaway is a brother of Charles Holdaway of Pendleton, and is quite well known to many people here, having spent several months here last year.

UNION SERVICES.

Appointment for Next Sunday—Schedule Not Completed.

The union services of next Sunday evening will be held in the Baptist church. Rev. Van Nuy officiating. Prof. W. D. Lyman, of the chair of history in Whitman College, is expected to be in town that day, and if he is, he will preach in the stead of Mr. Van Nuy.

The completed schedule for the union meetings is not yet made, as there are two or three uncertainties about place and individuals not yet determined. It is not known when Rev. Brooks, of the Christian church, will arrive, and the time of his arrival will influence the time and place of his preaching for a union meeting, and also the use of the Christian church, will arrive, and the time of his arrival will influence the time and place of his preaching for a union meeting, and also the use of the Christian church for a union service.

DELEGATES APPOINTED.

Mayor Matlock Names Prominent Citizens to Attend Portland Meeting.

Mayor W. F. Matlock this morning made known the list of delegates to represent Pendleton at the meeting of the Oregon Development League, to be held in Portland, August 2 and 3. Mr. Matlock personally saw nearly all the appointees and secured from them a promise to attend the sessions. The delegates are:

Stephen A. Lowell, George A. Hartman, Sr., Colonel J. H. Raley, Frank Clifton, E. T. Wade, Madison Jones, Jerry Despain, C. Platzoeder, John Baker, J. M. Ferguson, W. S. Byers, R. Laing, George Darveau and Dr. Lynn K. Blakeslee.

DON'T KNOW HER RESOURCES.

R. F. Guerin Says Oregonians Little Understand the Worth of the State.

"The people of Oregon, generally speaking," declared R. F. Guerin, secretary and treasurer of the Des Chutes Irrigation & Power Company, "have no more idea of what lands are contained in the central part of this state, than they have of the richness of Alaskan gold fields. This

vast territory comprises an area larger than the states of Massachusetts, Rhode Island and Connecticut combined.

It is the intention of the Des Chutes company to irrigate about 227,000 acres. Mr. Guerin was asked if his company was interested in any other irrigation project, and replied:

"No. We have all we can attend to where we are. There is enough land there to last for many years to come. I look for 20,000 new settlers in the Des Chutes country within a year after our big ditch is completed."

Mr. Guerin expects to be in Pendleton several days. "The liveliness of this town," he said, "is in great contrast with the Idaho cities I have recently visited."

The completion of the extension of the Columbia Southern from Shanko to Bend, Mr. Guerin declares, is expected not later than August 1, 1905. "A bet of \$5000," he said, "has been posted to that effect, but so far no one has come forward to cover it."

WHEAT PRICES.

E. W. McComas Believes 1904 Crop Will Be Poorer Milling Than That of Last Year.

"More wheat has been shipped to points in the eastern part of the United States from Oregon during the season of 1903 and 1904, than ever before," said E. W. McComas, local agent for the Northwestern Warehouse Company. "The sending of Oregon wheat to Minnesota may sound like shipping coal to Newcastle, but it is nevertheless true."

Just how much wheat has left the Inland Empire for the East, Mr. McComas says it is impossible to state.

He says that while the yield this summer will be very large the quality for milling purposes will not be as good as last year. "This is due," he explained, "because of the wet weather. It takes a dry year to make firm hard grain for milling uses."

"The new crop is fast seasoning and it will soon be classed with the old. Prices today are about 56 cents for club and 60 cents for bluestem, with the old crop a cent or two above that figure."

"Coffee Joint" Dismantled.

The little building which has for years done duty as the "coffee joint," first on one side of Main street and then on the other, has been torn down and removed from the corner of Main and Railroad. The institution has never been either "a thing of beauty or a joy forever." It had more angles than a work on geometry, and less architectural symmetry than a spangled dry goods box. It had been the tomb of many financial hopes and had been "in more hands" than a silver quarter of the first vintage coined.

Dr. Coleman August 21.

Dr. H. H. Coleman, president of Willamette University, will preach in the Thompson Street Methodist church on Sunday, August 21, morning and evening. The evening service will be the union meeting, one of the series now in progress. Dr. Coleman will at that time be on his way to the Idaho conference at Boise.

Campbell-Barker.

In the parlors of the Hotel Bickers at 10 a. m. today, Rev. Robert Warner officiating, William N. Barker, of Echo, and Miss Mary Campbell, of the same place, were united in marriage. Mr. and Mrs. Barker will continue to reside in Echo, where the groom is engaged in the livery business.

Grand Lodge of Redmen.

The sessions of the grand lodge of the Improved Order of Redmen for the state of Oregon, began at Seaside this morning. Pendleton people in attendance are: Great Chief of Records Roy Ritner, Mr. and Mrs. William Gogard, John Roche, J. Devlin and Thomas Murrell.

Rev. Diven's Health Better.

The community will be interested and pleased to learn that Rev. Diven's health is improving quite rapidly, though he will not be able to be up and around for some days. At the same time the condition of his eyes is rapidly improving. He has been confined to his bed for about 10 days.

Dr. McFall's New Residence.

Dr. McFall is having plans drawn by C. E. Troutman for a seven-room residence on the north side on Madison street, between Jackson and Washington. The contract will be let in time to have the building completed and ready for occupancy this fall.

Resigns as Game Warden.

A. W. Nye, florarian at the Commercial Association, has tendered his resignation as deputy game warden for the district of Eastern Oregon. Mr. Nye was appointed deputy game warden about a year ago.

Joe Robinson, a 12-year-old boy of Boise City, committed suicide Monday by taking carbolic acids.

IRRIGATOR ATTORNEY.

Clyde B. Atchison Speaks of the Forward Movement of the Irrigated District.

Clyde B. Atchison, attorney for the Oregon Water & Land Company, at Irrigon, was in Pendleton last night. He returned to Portland this morning. "Irrigon is rapidly coming to the fore," he said. "The results of the past year are beginning to show and new settlers are daily flocking in."

"The orchards planted last season are for the most part doing well. The death rate among the trees has been less than 2 per cent."

Mr. Atchison's offices are in Portland, in the trust department of the Title Guarantee & Trust Company.

The Dalles M. E. Conference.

The Columbia River Conference will meet at The Dalles August 21-September 6, inclusive, with Bishop Henry Spellmeyer presiding. Bishop Spellmeyer is about 50 years of age, and one of the younger bishops of the church. One hundred and fifty ministers will attend the conference.

Shoe Repairing

I have moved my shop to the second door east of the Savings Bank. Repairing of all kinds done in a workmanlike manner at reasonable rates. As I have been in business here 17 years, I need not speak of the quality of my work for it speaks for itself. My stock of shoes was somewhat damaged by water and the insurance company told me to sell them for what I could get, so I will sell them for less than wholesale price.

CHRIS RANLEY.

LOST, STRAYED OR

From my place at June 27, two mares; one a weight about 1200 pounds, branded CH on left shoulder crooked front feet.

The other is a 5-year-old weighing 1100, branded R on left hip and T within right shoulder.

I will pay \$10 for information leading to the recovery of both \$5 for either of them. A. Jensen
