IN OLD VANCOUVER

C. E. McLELLAN WRITES
OF THE HISTORIC SPOT.

Beautiful Climate of the North Pacific Coast Attracts Thousands From the Severe Winters of Eastern Canada—Entertaining Descriptions of the Town and the Business Progress—Scrap of History of the Hudson Bay Company—Its Goods Still Found on Sale in Old Vancouver.

Oh, it's winter in Vancouver, and the summer winds are blowing; Bud and leaf and blossom on shrub and bush and tree. Far a-down the western sky the Orient sun is glowing. Throwing golden glory on the heaving western sea.

The manufacture of poetry does not seem to be in any immediate danger of becoming one of the lost arts. The singers in every land still find inspiration, and of course, there is some excuse for spring poetry bursting out spontaneously in mid-winter in a climate like this, particularly as a visiting brother of the craft sometimes ago dubbed this country, "Our Lady of the Snows." A name which stuck and rather created the impression that for six months of the year this whole country from the Atlantic to the Pacific revelled in several feet of the beautiful.

Of course, Vancouver, "The Sunset Gateway of the Dominion" resents this impression; and the sojourner within her gates these winter months, noting the well-trimmed hedges, grassy lawns, flowering shrubs and singing birds, will be a little slow to question her right to do so.

This is a comparatively new town, only one house in it dating back further than 1886. In that year the whole town, excepting one house was destroyed by fire, but it rose from the ashes; and while there are not many skyscrapers as yet—ground room being still plentiful—it presents a fairly thriving appearance.

Canadian Pacific Dominates.

Of course, one of the first impressions the traveler is apt to receive is that one gigantic corporation, the C. P. R., owns the place. He lands from a C. P. R. train and finds C. P. R. waterfront, wharves, warehouses, steamboats and hotel, and although later he discovers quite a variety of private ownership, the first impression is liable to retain much of its force.

The Vancouverite regretfully admits the truth of the impression but points to the two other trans-continental highways pointing this way; which he thinks will give this city a chance for a heart to heart talk with the big corporation in the near future. Then he proceeds to marshal an array of reasons why this city must be reckoned with as among the big cities of the Pacific coast, and they are somewhat interesting.

The mineral output of this province—of which Vancouver is the chief city—for the year just closed, amounted to 20 million dollars. Equally impressive figures are quoted of its shipping, lumber and fishing industries. Three thousand boats find employment for the Fraser river canneries.

Electric lines extend out 25 miles, apparently doing good business. At the hotels are found many people from the eastern provinces of Manitoba, Ontario, Nova Scotia, inquiring about homes and locations in a more moderate climate than is found in those provinces.

Is Building Rapidly.

The residence portion is building up rapidly, one street which today is lined on both sides with handsome residences, three years ago did not have a single house.

Across the waters of Buzzard Inlet half a mile away, is North Vancouver, connected with the city by an hourly ferry, and which is destined to be the residence section, when the business district runs out of room.

Stanley park, the city playground, is a good sample of the forest primeval. Around the park a good roadway seven miles long, overlooking the waters of English bay and Buzzard Inlet and giving a good view of the straits of Georgia, has been made. Several other roads cross the park in various places, and these, with the

making of a few resting places, is about the only interference with nature's handiwork.

At the end of one of these cross-walks is the Narrows. The Narrows is a very narrow channel of deep water where English bay end and where Buzzard Inlet begins, and through which all the shipping which reaches this port must pass. Ocean liners, launches, fishing smacks, and every variety of craft follow each other here, and at this point pass so close to shore that the onlooker almost thinks he could take a jump and land on deck; it might not be safe to try it, however.

The Beaver, the first steamship to navigate the North Pacific was wrecked at this point, past which, when the tide is going out, the water rushes like (to quote a local authority) the mill tail of —

The Hudson Bay Company.

Mention has already been made of one powerful corporation represented here; but here, also, are the stores and warehouses of another company which, at one time in the country's history, exercised an influence and reaped profits which, in proportion to the capital invested, would make the dividends of the first named corporation look silly, and what a page of ancient history it recalls to find ones self facing a window in which the goods bear the legend: "Hudson Bay Company. The governor and company of adventurers of England trading into Hudson's Bay."

Perhaps a word or two about the formation of this company is as good a way as any to close this letter. The first Europeans coming to this country, says the historian, found it in possession of a people who made their living almost wholly by hunting, and these Indians were willing to sell for very small payment, the furs of the animals thus caught, which were eagerly desired in Europe.

A sagacious Frenchman seems to have been the first to perceive the advantages to be gained by a systematic prosecution of this commerce. He proposed the enterprise to his countrymen, but it failed to command their support. The baffled projector made his way to England, and laid his scheme before Prince Rupert.

A quarter of a century had passed since the fierce charges of Rupert's cavalry swept down the troops of the parliament at Naseby and Newark, since he himself had been chased from Marston Moor by the stern ironides of Oliver Cromwell.

The vehemence of his youth had mellowed down to a love of adventure, and he lent a willing ear to the ingenious Frenchman.

Started With \$50,000.

His influence with the public procured the formation of a company, whose paid up capital was a little over \$50,000. His influence with his cousin, King Charles II, sufficed to obtain a charter, the liberal monarch bestowed half the continent upon these speculators, on no more burdensome terms than that they should pay two elk and two beavers to the sovereign whenever he visited their territory.

Thus largely privileged the adventurers entered upon a career of unusual success. In a few years they paid a dividend at the rate of 50 per cent. A little later they trebled their capital out of profits and paid to shareholders 25 per cent upon the increased amount. Still later, the capital was once more trebled from the same source without diminution of the rate of dividend.

The savages who overthrew the Roman empire had introduced to Southern Europe the beautiful furs of the north. Great ladies sought eagerly for purposes of ornament, such furs as those with which the northern savage clothed himself and his children; sought eagerly but often unsuccessfully, for demand outstripped supply. The fur trade became one of the most lucrative which the world has ever known, which explains the origin of the legend found in this window today, "The Governor and Company of Adventurers Trading into Hudson's Bay." C. E. McLELLAN.

Hearing of Differential Case.

Washington, D. C., Jan. 25.—The interstate commerce commission today began a hearing on what is known as the differential case. This case is regarded as one of great importance, involving as it does the problem of the differentials in the relative freight rates to New York, Philadelphia, Baltimore, Newport News, Norfolk and other Atlantic seaboard points.

EXAMINATION OVER

EIGHTH GRADE HAS
JUST COMPLETED WORK.

Questions on United States History, Civil Government, Geography and Physiology—Prescribed Forms of Examinations Taken by All the Schools—Examinations Are Now Completed.

Following are the questions of the eighth grade examinations on the subjects of United States history, civil government, geography and physiology.

The examinations were concluded last week, all the public schools holding the regular prescribed form:

United States History.

1. Give ten dates and historical events associated with them.
2. When was Oregon organized as a territory? When admitted into the Union?
3. Name the 13 original states.
4. Explain the expression, "Fifty-four forty or fight."
5. Give an account of the event commemorated by the St. Louis exposition.
6. Give an account of the event to be commemorated by the Lewis and Clark exposition.
7. (a) Who owned the Northwest territory before the United States got possession? (b) What was the ordinance of 1787? (c) What states were formed from this territory?
8. Name: (a) five European nations that made early explorations in America; (b) one explorer from each nation; one region visited by each explorer.
9. Explain any two of the following terms: Mason and Dixon's line; squatter sovereignty; contraband of war; specie resumption; spoils system.
10. How did Alaska become a part of the United States?

Civil Government.

1. When do we first come under government?
2. What do you understand by co-operation in school government?
3. What is better than playing to win?
4. Write about cleanliness and order.
5. There are two classes of men: the strong and the weak. Why is this so?
6. Why are there two national parties?
7. What is a congressional district? In which do you live?
8. What do you understand by the term legislature?
9. How is congress made up? How many representatives to congress has Oregon? How many senators?
10. What is a veto?

Geography.

1. Define meridian, parallel.
2. Name five great and rich river valleys.
3. Name one country from which each of the following products is obtained: Cork, sponge, camphor, quicksilver, sulphur, tin.
4. Give two reasons why a ship canal across Central America would be of advantage to Oregon.
5. (a) What two river systems in North America are of the most importance commercially? (b) Name five cities located upon these rivers.
6. Give two proofs that the earth is round.
7. Trace a water route from Salem, Oregon, to San Francisco.
8. Select the four largest cities of this state and give the location of each.
9. Draw an entire map of Oregon, indicating (a) three railroads; (b) five cities.

Physiology.

1. Name two objections to breathing through the mouth.
2. Define artery, vein, capillaries.
3. Name three school practices that are not healthful.
4. How can you tell whether blood flows from a vein or an artery? What remedy should be applied in each case?
5. State the effects of alcohol on the stomach.
6. Describe the manner in which the blood is purified in the lungs.
7. Define hygiene.
8. Name the effect of cigarette smoking on the system.
9. Locate (a) the heart, (b) the lungs.
10. Give five rules for keeping well.

OS-TE-OP-A-THY

HOW PATIENTS ARE TREATED.

The erroneous idea of embarrassment, exposure and nudity, which many hold of Osteopathic treatment keeps many women away, who feel the need of its aid. Nothing can be further from truth. The custom of the masseur in having the skin for work, and the failure to distinguish between Osteopathy and massage is probably the cause of it.

The truth is the Osteopath prefers not to work on the bare skin.

Men remove the coat and vest and usually the outer shirt. Women remove corset, heavy outer garments, and put on a wrapper or kimono. The patient is then seated on stool or table, or in some cases lies on treating table. Thus it is seen there is nothing to embarrass the most modest woman or girl.

This is a preface to an article next week by Dr. Holington, Despain block, on the "Pelvic Diseases of Women," which all women, at least, should read and heed, and save many an operation on yourself and friends.

FOR SALE AT THE EAST OREGONIAN office—large bundles of newspapers, containing over 100 big papers, can be obtained for 25 cents a bundle.

THEY DON'T PRAY.

"Where are you going, my pretty maid?"
"I'm going to church, kind sir," she said.
"Will you pray for me, my pretty maid?"
"I can't, for I sing in the choir," she said.

"Gone to the Bad
Through Drink"
