**GENERAL NEWS.**

Between now and April 1 about 200 teachers will be appointed from the United States to the Philippine service. These positions pay salaries at the start from \$1000 to \$1200.

Twenty persons were injured, two seriously, in a collision in a fog between a freight train on the St. Louis & San Francisco railroad and a street car in Fort Worth, Texas.

Surveyors for the new Canadian Grand Trunk railway have found seven perfectly feasible routes through the Selkirk mountains between Yellowhead and Peace river passes.

Plans providing 70,000 school children of New York a warm meal at the beginning of each day, conceived by Commander Eva Booth, of the Salvation Army, were put into operation February 1.

The jury in the case of Henry Lundberg, former assistant inspector of steam vessels, charged with manslaughter in connection with the General Slocum disaster, disagreed and were discharged.

At Dogalea, Ariz., William Walton, a gambler, in a saloon row, shot and killed M. M. Conn, the proprietor, a monte man (name unknown) and "Cowboy" Johnson, a faro dealer, and then shot and killed himself.

It is believed a law will be enacted by this congress imposing imprisonment for two years and a fine of \$2000 upon any government official who makes the government liable for any expenditure in excess of the exact amount appropriated by congress for the specific purpose.

After 19 years of labor and the expenditure of \$9,000,000, the new Croton dam (which is to be the source of New York's city water supply) is completed. It is the largest piece of masonry in the world except the pyramids of Egypt. It will hold 30,000,000,000 gallons of water.

**NORTHWEST NEWS.**

By a vote of 62 to 2 Endicott, Wash., has voted to incorporate.

Strenuous efforts are being made to establish a beet sugar factory at Payette, Idaho.

The temperature at Miles City, Mont., reached 59 degrees below zero the night of February 1.

The tax levy for 1904 calls for \$140,000 cash from the taxpayers of Stevens county, Wash. This is \$20,000 more than last year.

Baker City business men and organizations are planning to buy a \$5,000 diamond drill for general exploration work. It will drill a 4000 foot hole.

William McNally, a laborer under the influence of liquor, became lost near Missoula, Mont., and before he was found was so badly frozen that both feet and his left arm must be amputated.

J. W. Haigh fell dead in Seattle as a direct effect of a blow received a week before in a saloon in North Seattle. He was editor of Forest Echoes, a periodical of the Woodmen of the World.

Mr. and Mrs. William Boyles, of Medical Springs, Or., have just celebrated the 44th anniversary of their marriage. They are 84 and 86 years old respectively and have lived on the coast 63 years.

M. Sherwood is dead at Billings, Mont., aged 87 years. He ran a locomotive on the Michigan Central railroad 50 years ago, and was a pioneer railroader, following the road in different capacities from his 18th year.

\$20 acre ranch. Four hundred acres on river bottom, 60 acres set to alfalfa. Well improved; good orchard; running water. One among the best in the county. Price is right. We have other and smaller propositions equally good.

**ROAD TO WALLOWA**

OLD STORY OF O. R. & N. EXTENSIONS REVIVED.

People of Wallowa County Clamoring Loudly for Better Facilities—If O. R. & N. Does Not Build Perhaps the Northern Pacific Will—Rich Region is Now Without Transportation.

A scrap for supremacy in the Wallowa country may result between the Northern Pacific and the O. R. & N., if the Hill interests attempt to carry out the project of extending the narrow gauge line from Walla Walla through the mountains into the Wallowa country, as it was intimated the time that the O. R. & N. and Northern Pacific exchanged trackage in Walla Walla and Columbia counties.

Close on the heels of the rumor that the Northern would use the narrow gauge as the first step toward building into the Wallowa from Walla Walla, comes a report from La Grande that the O. R. & N. is reviving its plans to extend its branch from Elgin, Ore., through the Wallowa on to Lewiston and Clarkston by way of the Grande Ronde river, a preliminary survey for which was made several years ago.

The Oregon Railroad & Navigation company has had a man through the Wallowa country checking up a survey made several years ago, when the O. R. & N. was at war with the Northern Pacific over the Clearwater country, and while it is almost sure the Elgin branch will be extended to the heart of the Wallowa country, it is possible that the extension will be continued to a connection with the Riparia road if that line was built.

For two years past the Wallowa people have been clamoring for a railroad and have sent a number of petitions to the O. R. & N. people, and relief is perhaps not far distant. During the Clearwater fight the O. R. & N. sent a large amount of ties and other building material to Elgin and the people for the first time realized then that the proposed Grand Ronde road had a bearing on the issues involved in the controversy between the roads regarding the business of those sections. The truce came, however, and since then no track has been built.

The survey of the Grand Ronde road shows that a grade of 20 feet to the mile was secured down the river. The road would serve a rich country all the way and would also provide the most direct route to the east for the produce of this region.

**TO SUPPORT NORMAL SCHOOLS.**

Senator Pierce Introduces a General Normal School Law.

Following is a copy of senate bill No. 197, introduced by Senator Pierce for a flat appropriation of \$50,000, for the support and maintenance of all the normal schools of the state:

A bill for an act entitled "An act for a continuing fund for the support and benefit of the State Normal schools of Oregon, and appropriating money for the same."

Be it enacted by the people of the state of Oregon:

Section 1. In computing the amount necessary for state purposes the governor, secretary of state and state treasurer acting jointly shall, in each year at the time they compute the amount of revenue necessary for other state purposes, also compute the sum of \$50,000 for the annual support and benefit of the state normal schools of Oregon, which shall be levied and collected in the same manner as other taxes for state purposes are levied and collected; and the fund arising therefrom shall be paid into the state treasury and kept separate from other funds, and shall be known as the "state normal school fund." This fund shall be paid out only on warrants drawn by the secretary of state on the state treasurer against said fund. This fund shall be a continuing fund, and if the amount raised in any year shall not be used for current expenses, etc., as herein provided during that year, the balance remaining in the hands of the treasurer shall be carried over to the next year and added to the fund for that year.

Sec. 2. The entire income of the normal school fund as provided for in this act shall be placed at the disposal of the board of regents of normal schools and the secretary of state shall audit all claims authorized by said board, certified to by the secretary and president of the board of normal school regents, and draw his warrant on the state treasurer for the amount found due thereon in favor of the person entitled thereto, and no money shall be paid out of the treasury for the use of the normal schools of the state except upon verified claims in the manner herein provided. Provided, that the salaries of instructors may be paid to the president of the school or person designated by the board of normal school regents upon payroll approved by the secretary of state.

**Labor Leader on Trial.**

Hartford City, Ind., Feb. 3.—Paul St. Peter, of Pittsburg, president of the national organization of window glass workers, was put on trial here today on a charge of shooting Ollie Walker with intent to kill. The fracas occurred last fall and was the outgrowth of a factional fight among the window glass workers. The faction of which Mr. St. Peter is the head has engaged eminent counsel for his defense and the trial promises to be one of intense interest.

Rev. John Reid, Jr., of Great Falls, Mont., recommended Ely's Cream Balm to me. I can emphasize his statement. "It is a positive cure for catarrh if used as directed."—Rev. Francis W. Poole, pastor Central Pres. church, Helena, Mont.

After using Ely's Cream Balm six weeks I believe myself cured of catarrh.—Joseph Stewart, Grand Ave., Buffalo, N. Y.

The Balm does not irritate or cause sneezing. Sold by druggists at 50 cents or mailed by Ely Brothers, 55 Warren St., New York.

Charles M. Schwab is making plans for a trip to Russia, where he has a deal pending with that government for the construction of 16 battleships, their accessories, and other armament costing \$100,000,000.

**OSTEOPATHY**  
Pelvic Discomfort of Women.

It is estimated that less than 10 cent of women are in perfect health. Why this alarming state? For answer to the greater part of these cases, or female troubles, is indeed to find a woman in the period of life entirely free from these ailments. Is it any wonder that these ailments are constantly degenerating of the human race, these must be the mothers of that in France and Germany death rate exceeds the births? any wonder that so many cases are heralded, and that for weeks have made their bed? With years of suffering, distress, aches in back, ovaries, uterus, with their reflex actions, bladder trouble, etc., is it any wonder that woman submits to being caustic, pessary, electric and finally the surgeon's knife, to find herself at last a nervous wreck and a hopeless lid? Such is the story of a woman in our own town. Cannot we do this awful tale? If not, a harder race must take the place. He who brings this story to a woman's pages. Such a one is striving hard for this glorious in the person of Dr. Andrew T. founder of osteopathy, field Senator Jos. B. Foraker, the founder of osteopathy does more in this life than what has done to relieve the suffering of men, his name will go down the ages as the greatest physician of any one and one of the benefactors of his race.

Is this theory merited? Let us examine his theory and see if it is reasonable, for we should reason, although we have never so. The body is not a mystery works by law, just as truly as other machine. So have a rational

The uterus and ovaries have abundant and delicate blood nerve and blood supply on which depend to function, or per their duty of life, procreation, cause of this abundance and of nerve and blood supply, the easily disturbed. At this point I began by asking, "How did this disturbance come about?" It is that no physician ever asked before, or if he asked, failed to answer. Dr. Still never stopped he had an answer.

The blood to the female organs well as to all parts is controlled by the spinal cord, which depends to function, or per their duty of life, procreation, cause of this abundance and of nerve and blood supply, the easily disturbed. At this point I began by asking, "How did this disturbance come about?" It is that no physician ever asked before, or if he asked, failed to answer. Dr. Still never stopped he had an answer.

You have been duped long enough. Hereafter proceed by reason and investigate. There are several towns who have been treated. Complete explanation and understanding the cause of the trouble. Pick the wheat from the chaff. Pretenders are numerous and infest our state until Senator Still's bill, now before the legislature, becomes a law and compels osteopaths to go before an examining board. Don't judge osteopaths what some pretender has been to give you. Would you judge a man from the work of a quack?

Frequently we hear, "I have uterine displacement so osteopathy can't help me." Does not the displacement come from the stretching of the ligaments, weakness of nourishment? What will support it up with a pessary, or the blood supply and nourishment back to strength?

Because you cannot correct slight displacements of bones, be positive there are no bones, fingers will find them and put them to your satisfaction. Many others, those who never were often assert. Any such we do invite to call, as we have excellent examples of all classes of displacements among our patients.

Osteopathy makes no claims in all cases. Some mild cases are curable, some very bad cases are cured. Most depends on whether it be a removable one or not. Then comes in the relative power of the body. The case is delayed the more co-operative power is lost.

Give Osteopathy a chance, you before submitting to the surgeon's knife, which must have destroyed you as a woman, and wreck your nervous system, you to the terrible irritation of near tissue and leaves you of motherhood, and untitled and mind for wifehood, as wreck on the sands of time, long because you have not been away.

There is a chance for you. Nothing to investigate fully with. Drs. Hoisington, Dr. M. M. Holton, Ore., who are graduates of Dr. Still, the founder. They will answer any questions.

General clean-up of all winter at prices that will surprise you.
