

THE IRRIGATION LAW

(Continued from page 3.)

terior, enter suit on behalf of the state of Oregon, in the name of the state, for the determination of all rights for the use of such waters and shall diligently prosecute the same to a final adjudication.

Parties and Costs of Suits.

Sec. 5. In any suit wherein the state is a party for the determination of a right to the use of the waters of any stream system, all who claim the right to use such waters shall be made parties. When any such suit has been filed, the court shall call upon the state engineer to make or furnish a complete hydrographic survey of the stream system as hereinbefore provided, in order to obtain all data necessary to the determination of the rights involved. The disbursements made in litigating the rights involved in such suit shall be taxed by the court as in other equity suits.

Decrees Adjudicating Water Rights.

Sec. 6. Upon the adjudication of the rights to the use of the water of a stream system, a certified copy of the decree shall be prepared by the clerk of the court, without charge, and filed in the office of the state engineer. Such decree shall in every case declare, as to the water right adjudged to each party, whether riparian, or by appropriation, the extent, the priority, amount, purpose, place of use, and, as to water used for irrigation, the specific tracts of land to which it shall be appurtenant, together with such other conditions as may be necessary to define the right and its priority.

State Engineer.

Sec. 7. A state engineer, technically qualified and experienced as an hydraulic engineer, shall be appointed by the governor upon the recommendation of the director of the United States geological survey and confirmed by the senate. He shall hold office for the term of four years from and after his appointment, unless sooner removed by the governor for cause and until his successor shall have been appointed and shall have qualified. He shall have general supervision of all the measurements, and records of appropriation, of waters of the state, and of all surveys and engineering work in which the state may be interested, and for which funds are provided, and shall perform all work in connection therewith. He shall receive a salary of \$2400 per annum, and actual and necessary traveling expenses while away from his office in the discharge of official duties, and shall not engage in private practice. He may employ assistants and purchase materials and supplies necessary for the proper conduct and maintenance of his office and department, in pursuance of appropriations as made from time to

time for such purposes. The salaries and expenses of the office of the state engineer shall be paid at the same time and in the same manner as those of other officers of the state. The office of the state engineer shall be located at the seat of government in the capitol building. The state engineer and his authorized assistants and agents, may enter upon any private property for the performance of their respective duties, doing no unnecessary injury thereto. The state engineer shall prepare and deliver to the governor, on or before November 30th of the year preceding the regular session of the legislature, and at other times when required by the governor, a full report of the work of his office, including a detailed statement of the expenditures thereof, with such recommendations for legislation as he may deem advisable.

Oath and Bond of State Engineer.

Sec. 8. Before entering upon the duties of his office the state engineer shall give bond to the state with sufficient sureties in the sum of \$5000 for the faithful performance of his duties, which bond shall be approved by, and filed in the office of the secretary of state, together with the following oath of office:

"I, _____, being first duly sworn, do say that I am the duly appointed state engineer of the state of Oregon, and that I will faithfully and honestly perform the duties of such office, and that I am not directly or indirectly, pecuniarily or otherwise interested with any person, association or corporation using or to use any of the waters of the state for any beneficial purpose, in such use thereof, and will not during my term of office become so interested therein, or receive any pecuniary aid or benefit therefrom, and shall not permit any assistant employed by me to be or become so interested or receive any pecuniary aid or benefit from such person, association or corporation while so employed."

Records of State Engineer.

Sec. 9. The records of the office of the state engineer are public records and shall remain on file in his office and be open to the inspection of the public at all times during business hours. Such records shall show in full all maps, profiles and engineering data, relating to the use of water, and certified copies thereof shall be admissible as evidence in all cases where the original would be admissible as evidence.

Fees of State Engineer.

Sec. 10. The state engineer shall receive the following fees, to be collected in advance, and to be paid by him into the general fund of the state treasury on the last day of March, June, September and December of each year:

- (a) For filing and recording notice of an appropriation of water, map, and field notes of the same, \$5.
- (b) For blue-print copy of any map or drawing, 10 cents per square foot or fraction thereof. For other copies of drawing or any data fur-

nished upon application, actual cost of work.

(c) For certifying to such copies, \$1 for each certificate.

(d) For such other work as may be required of his office, the fees provided by law.

Hydrographic, Topographic Surveys.

Sec. 11. The state engineer shall make hydrographic and topographic surveys and investigations of each stream system and source of water supply in the state, beginning with those most used, obtaining and recording all available data pertaining to the water supply of this state. He is hereby authorized to co-operate with the agencies of the United States government engaged in similar surveys and investigations, and in the construction of works for the development and use of the water supply of the state, expending for such purposes any money available for the work of his office.

For the purpose of making hydrographic and topographic surveys, there is hereby appropriated out of any moneys in the treasury not otherwise appropriated, the sum of \$2500 annually for such hydrographic, and \$2500 annually for such topographic surveys, such appropriations, however, being contingent upon the United States government making a like appropriation for such purposes to be expended within the state.

Disposition of State Lands.

Sec. 12. No lands belonging to the state, within the areas to be irrigated from work constructed or controlled by the United States, or its duly authorized agents shall hereafter be sold except in conformity with the classification of farm units by the United States, and the title of such land shall not pass from the state until the applicant therefor shall have fully complied with the provisions of the laws of the United States and the regulations thereunder concerning the acquisition of the right to use water from such works and shall produce the evidence thereof duly issued. After the withdrawal of lands by the United States for any irrigation project, no application for the purchase of state lands within the limits of such withdrawal shall be accepted except upon the conditions prescribed in that section. Any state lands needed by the United States for irrigation works, shall be conveyed to the United States without charge.

Right of Way Over State Lands.

Sec. 13. There is hereby granted, over all the unimproved lands now or hereafter belonging to the state, the necessary right of way for ditches or canals and reservoir sites for irrigation purposes constructed by authority of the United States or otherwise. All conveyances of state land hereafter made shall contain a reservation of such right of way and reservoir sites.

Appropriations.

Sec. 14. There is hereby appropriated out of the moneys in the general fund of the state treasury, not other-

Consults A Physician

But does NOT Tell Him All.

Few women confide fully in a physician. They simply will not tell him all. That's why many doctors fail to cure female diseases.

Every woman dreads the ordeal of the physician's consulting room. A sensitive, refined woman shrinks from the searching questions and the physical examination!

It is not so in writing to Mrs. Pinkham. Thousands of women owe their present health and happiness (yes, and their good looks, too) to the fact that they have told all their physical troubles to Mrs. Pinkham and followed her advice and been cured of female diseases.

Lydia E. Pinkham's Vegetable Compound

Cures more women every year than any other medicine in the world. If you are in doubt about your case, write in perfect confidence to Mrs. Pinkham, Lynn, Mass. You will receive in reply a personal letter of advice free.

DEAR MRS. PINKHAM:—For three months I was sick in bed with female trouble and had four doctors, who all agreed that I must undergo an operation and have my ovaries removed. My sister advised me to try Lydia E. Pinkham's Vegetable Compound before I submitted to an operation. I did so and am very glad to say that after I had used five bottles I was restored to perfect health, which I have enjoyed ever since. I am only too glad to recommend your medicines, as they saved me from an operation which might have proved fatal.

MRS. M. KUTTNER.
556 South Main St., Los Angeles, Cal.

Mrs. Hayes also profited by Mrs. Pinkham's advice.

DEAR MRS. PINKHAM:—Sometime ago I wrote you describing my symptoms (fibroid tumor) and asked your advice. You replied and I followed all your directions carefully and to-day am a well woman.

MRS. E. F. HAYES.
