

BUSINESS COURSE

WILL BE ADDED TO THE HIGH SCHOOL COURSE.

Will Cover Stenography, Bookkeeping and Related Branches—Board Is Now Seeking a Man With Special Qualifications—In the Employment of Teachers the Preference Will Be Given Local and Eastern Oregon Talent—A "Welfare Officer" as Well as Truant Officer.

Last night with the commencement exercises held in the opera house, another school year was brought to a close in Pendleton, and it has been a year probably the most successful in the history of the city. More students were enrolled than during any former year, more teachers were employed, more have completed the various grades, and it is said also that the instruction has been better.

However, the advancement made during the past year has in reality been but a repitition of what has occurred during previous years, for enlargement and improvement has been constantly necessitated. Pendleton, by the logic of its location, is a school town. It is the business, political and educational center of a large and prosperous territory, and, as stated yesterday by Jesse Felling, the venerable president of the school board, it has been such ever since the coming of the railroad in the early eighties, if not, in fact, ever since the county seat was brought here in the sixties when Pendleton was then but a village of seven shacks. To meet the demands made upon the schools of the city they have been gradually improved, and each improvement has been rewarded by an increased attendance until now the school element is a most potent element in the city, and the schools are recognized as one of its best resources.

However, next year is going to mark a new period in the history of the Pendleton schools for several reasons. Three new buildings, aggregating in cost, \$60,000, will be put into use, and according to Mr. Felling, who has been a member of the board "ever since he can remember," it will be the first time that there has been really adequate room for the pupils. Also, a new superintendent will be placed at the helm, and while one member of the board yesterday expressed as his highest hope that

according to Mr. Smith, to interfere in any way with the work of any business college, but it does want to provide a good, efficient training in the necessary business branches, such as bookkeeping, stenography and similar subjects.

Seeking Special Qualifications.
It is the wish of the board to secure a man for the high school who is qualified to teach the business branches, and Prof. Traver, in behalf of the board, is now seeking such a man. However, the business branches will be taught by all of the teachers of the high school, some of the subjects being taught in each year of the high school course.

Dr. Smith is of the belief that the Pendleton schools are now surpassed by those of any city in the state with the same population. The best teachers available are being secured, and they are being paid all that the funds at the disposal of the board will allow. These things, with the new equipment that will be in use

have been retained for next year have been thoroughly tried and found capable, and that it is also the wish of the board to establish a permanent corps of teachers, keeping the competent ones as long as possible. Also, he stated that hereafter the board will keep a waiting list of teachers, this being done at the suggestion of the state superintendent. Those on such list will be stated for vacancies when such occur.

Another matter in which the school board is determined to take a stand, is for the betterment of moral conditions in the city, especially where pupils are concerned. Mr. Teutsch gave as his opinion yesterday that the time is at hand in Pendleton for better conditions than have been existing, and that such will gradually be brought about.

In speaking of the above matter, E. L. Smith laid great stress upon the work that has been done in that direction by the board during the past year, and said that next year an

Prof. L. R. Traver, new city superintendent of schools, Pendleton.

Pendleton Graduating Class, '05.

Top row—From left to right: Louise Grey, Albert Warner, Mary Rust, Serita Howland, Josephin. Cameron. Lower row: Elva Turner, Edgar Smith, Mary Williams, Fred Milne, Effie Smith.

he would but give the same satisfaction as has been given by Prof. Conklin, the standing of the new man, Prof. Traver, is such that he cannot but bring great prestige and increased efficiency to the schools.

Will Add Commercial Course.

One improvement proposed by the board for next year is the addition of a commercial course to the high school curriculum. This, it is now practically assured, will be done, and in the view of Senator C. J. Smith, a member of the board, will meet a great need.

"It means," said he to the East Oregonian yesterday, "that the high school will be able to turn out students who will be able to take good positions in business houses, and consequently may make practical use of their training."

It is not the desire of the board, ac-

next year, will make the city's schools, in Dr. Smith's view, something of which the people of Pendleton may well be proud.

Preference for Local Talent.

"In employing teachers, the plan now being followed by the school board is to select people from this county and from Eastern Oregon as far as possible; not only because such is regarded as but just to the educators of this section, but also because it has been found from experience that better results are obtained from such teachers, and that the teachers themselves are better satisfied with the work."

The above statement was made yesterday by Lee Teutsch, one of the members of the board, and it but expresses the policy that is being carried out by the board. According to Mr. Teutsch, the old teachers who

officer would be employed all the time to look after the welfare of the students outside of the schools, as well as to enforce the truant law.

the city that has no business in a place where people come to make their homes and to educate their children.

The "Force" of Herpicide.

Even the first application of Newbro's Herpicide (THE ORIGINAL REMEDY THAT KILLS THE DANDRUFF GERMS) shows the hair saving and satisfying "force" that is in it. This "force" is the sum of two characteristics that are united in no other hair remedy.

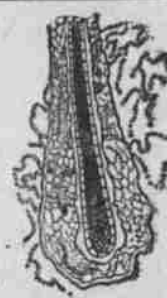

Herpicide has the ABILITY to destroy the dandruff microbe, and the QUALITY to delight those who wish a dainty hair dressing. It holds the secret of popularity and pleases every one who is discriminating enough to have a preference. It is not sticky. It will not stain the hair.

The curative effect of Herpicide is sometimes little short of marvelous, for after the dandruff germ is destroyed, and kept out of the scalp, the hair is bound to grow as nature intended. It stops itching of the scalp almost instantly.

A Healthy Hair.

"CREDIT WHERE CREDIT IS DUE."
I wish to give credit where credit is due. I purchased a bottle of Herpicide and only used one-half when all the dandruff had disappeared. I also recommend it to all my friends. I write these few lines of my own accord.
San Francisco, Calif. (Signed) A. J. BOOTZ.
FROM A PROMINENT PHYSICIAN.
I am highly pleased with Herpicide. Several cases of dandruff and falling hair have been promptly cured. It will surely prevent baldness if properly used.
Los Angeles, Calif. (Signed) OVID E. LAWS.
Send 10c in stamps for sample to The Herpicide Co., Dept. L, Detroit, Michigan.

An Unhealthy Hair.

One Home in Five

Has Someone Cured by Ligozone. Won't You Try It-Free?

We judge from our records that one home in five, the country over, has someone whom Ligozone has cured. Some have been cured of little ill, some know that their lives have been saved by it.

These homes are scattered everywhere. Your neighbors and friends live in some of them. If you will only ask about Ligozone there are plenty to tell you about it. It is wrong to stay sick with a germ disease while millions know that Ligozone can cure it.

And any sick one, anywhere, may try it at our expense. We will gladly buy the first bottle—a 50c bottle—and give it to any sick one free. You don't need to rely on those who were cured by it. You may test it, without a penny of cost, for yourself.

Won't you—for your own sake—do one or the other? Won't you let your friends tell you how it cured them, and how it constantly keeps them well? Or, won't you let us buy you a bottle and see what it does for you?

What Ligozone Is,

Ligozone is a product which, in the past two years has sprung into world-wide use in the treatment of germ diseases. It is now used by the sick of all nations; by physicians and hospitals everywhere. It is daily used in millions of homes in America.

The virtues of Ligozone are derived solely from gas, made in large part from the best oxygen producers. No drugs, no alcohol—nothing but this gas enters into it. The process of making takes 14 days, and requires immense apparatus. At the end of two weeks we get one cubic inch of Ligozone for each 1250 cubic inches of gas used. The attainment of this product has, for more than 20 years, been the constant object of scientific and chemical research.

The main result is, to get into a liquid, and thus into the blood, a

powerful, yet harmless germicide. And the product is so helpful—so good for you under any condition—that even a well person feels its instant benefit.

We Paid \$100,000

For the American rights to Ligozone, and the rights in other countries have sold for proportionate sums. We mention this fact to indicate the value of Ligozone—the value to you. Men have never before paid such a price for any discovery used in the cure of sickness.

We need not tell you that we proved Ligozone well before buying it. For years it was tested through physicians and hospitals, in this country and others. It was employed in every stage of every germ disease; in all the most difficult cases obtainable. With thousands of sick ones, considered incurable, we proved that it did what medicine could not do. Then, and then only, did we pay the price.

Since then we have spent nearly \$2,000,000 to make Ligozone known. We have bought the first bottle and given it free to every sick one we learned of. These people told others, and the others told others. The result is that Ligozone is now more widely employed than any medicine ever. Ligozone is a germicide so certain that it is doing more for sick humanity than all the drugs in use combined.

How Ligozone Cures

The greatest value of Ligozone lies in the fact that it kills germs in the body without killing the tissues, too. And no man knows another way to do it. Any drug that kills germs is a poison, and it cannot be taken internally. For that reason, medicine is almost helpless in any germ disease. Ligozone is a germicide so certain that we publish on every bottle an offer of \$1000 for a disease germ that it cannot kill. Yet it is not only harmless but of wonderful benefit—

better than anything else in the world for you. No one is so well that he cannot be helped by it.

The reason is that germs are vegetable, and Ligozone—like an excess of oxygen—is deadly to vegetable matter. To the human body Ligozone is exhilarating, vitalizing, purifying—the most needful, the most helpful thing possible. But to germs it is certain destruction; and these facts are true of nothing else in existence.

Germ Diseases.

These are the known germ diseases; all due to germs or to the poisons which germs create. These are the diseases to which medicine does not apply, for drugs cannot kill inside germs.

All that medicine can do for these troubles is to act as a tonic, aiding nature to overcome the germs. But those results are indirect and uncertain, depending on the patient's condition. A cure is always doubtful when drugs are used, and some of these diseases medicine never cures.

Ligozone alone can destroy the cause of these troubles. It goes wherever the blood goes, so that no germ can escape it. The results are almost inevitable. Diseases which have resisted medicine for years yield at once to Ligozone. "Incurable" diseases are cured by it. In any stage of any disease in this list the results are so certain that we will gladly send to any patient who asks it an absolute guaranty.

- Asthma
- Abcess—Anemia
- Bronchitis
- Blood Poison
- Bright's Disease
- Bowel Troubles
- Coughs—Colds
- Consumption
- Colic—Croup
- Constipation
- Cataract—Cancer
- Dysentery—Diarrhea
- Dandruff—Dropsy
- Depression
- Eczema—Erysipelas
- Fever—Gall Stones
- Hay Fever—Influenza
- Kidney Diseases
- La Grippe
- Leucorrhoea
- Liver Troubles
- Malaria—Neuralgia
- Many Heart Troubles
- Piles—Pneumonia
- Pleurisy—Quinsy
- Rheumatism
- Scrofula—Syphilis
- Skin Diseases
- Stomach Troubles
- Throat Troubles
- Tuberculosis
- Tumors—Ulcers

Gout—Gout
Gonorrhoea—Gleet
Women's Diseases
All diseases that begin with fevers—all inflammation—all catarrhs—all contagious diseases—all the results of impure or poisoned blood.

In nervous debility Ligozone acts as a vitalizer accomplishing what no drugs can do.

50c. Bottle Free.

If you need Ligozone, and have never used it, please send us the coupon below. We will then send you an order on a local druggist for a full-sized bottle—a 50c bottle—and will pay the druggist ourselves for it. This applies only to the first bottle, of course—to those who have never used it.

The acceptance of this offer places you under no obligations. We simply wish to convince you; to let the product itself show you what it can do. Then you can judge by results as to whether you wish to continue.

This offer itself should convince you that Ligozone does as we claim. We would certainly not buy a bottle and give it to you, if there was any doubt of results; you want to be well and to keep well. Then be fair enough to yourself to accept our offer today. Let us show you, at our expense, what this wonderful product means to you.

Ligozone costs 50c and \$1.

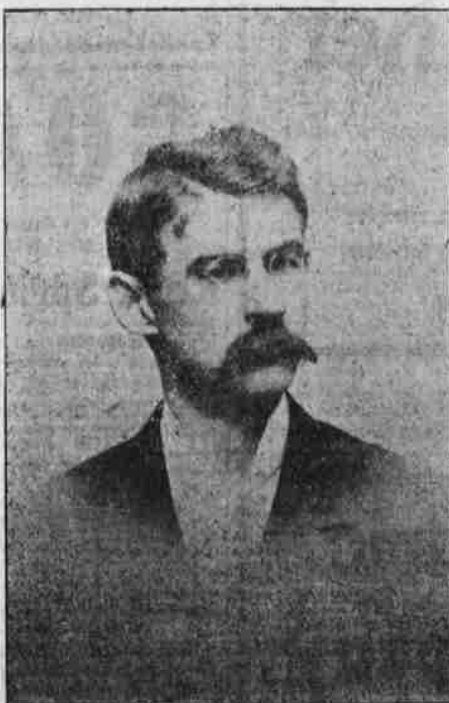

CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail it to the Ligozone Company, 428-44 Wabash Ave., Chicago.

My disease is... I have never tried Ligozone, but if you will supply me a 50c bottle free I will take it.

Give full address—write plainly

Any physician or hospital not yet using Ligozone will be gladly supplied for a test.

Prof. E. B. Conklin, retiring city superintendent of public schools of Pendleton.
