OWL TEA HOUSE

RETURNED FROM ANACONDA.

Called to Consult in the Famous Smelter Poisoning Cases.

Dr. D. C. McNabb has returned from Anaconda, Mont., where he spent several days last week on professional business for the Anaconda Smelting company, one of the largest concerns in that state. His services as a veterinarian were wanted by the company in connection with the suit that has been brought by stockmen in that section to recover alleged damages said to have been caused to their stock by the poisons from the smelters.

According to the doctor the company paid \$250,000 damages for such injuries last year, but they are resisting the suit this season, as they hold that no great damage is being done, now since the immense smoke stacks have been fitted with devices that are said to condense the poisonous gases resulting from the combination of the arsenic with the copper and other metals. While he was there, Dr. McNabb says that three carloads of arsenic were received for use in the smelters of Anaconda.

FAREWELL RECEPTION.

To the Conklins, by the K. of P. and the Rathbone Sisters.

At the farewell reception tendered Prof. and Mrs. E. B. Conklin last night by the Rathbone Sisters and the Knights of Pythias, a most enjoyable time was had by all present. The hall was decorated with palms and potted plants and music was rendered during the evening by McMillin's orchestra. Progressive whist furnished the diversion during the evening and at the conclusion ice cream, cake and fruit punch were served at the small tables. Then in behalf of the Rathbone Sisters Mrs. A. L. Knight presented Mrs. Conklin with a beautiful cut glass dish. Following this, T. G. Montgomery, chancellor commander of the Knights, in a witty speech presented Prof. Conklin with a Pendleton Indian robe for use in his Malheur county home.

At the conclusion of the entertainment a levee was held, and the 30 guests who were present took leave of the departing couple. Those in the line besides Prof. and Mrs. Conklin, were Mr. and Mrs. J. W. Maloney, Mr. and Mrs. T. G. Montgomery and Mr. and Mrs. A. L. Knight.

DECORATION DAY OBSERVED.

Business Suspended and Graves Decorated.

Decoration day has been observed as a holiday in Pendleton, practically all of the stores remaining closed all day, as did also a great many of the offices. During the morning members of the G. A. R. met in their hall and after the usual exercises there, all went to the cemetery where the graves of the dead were decorated. No

MILLS CLOSE DOWN

EXTREME HIGH PRICE OF WOOL RESPONSIBLE.

Will Only Manufacture Goods Enough to Fill Orders, and No "Working Up" of Business Will Be Done—Advance in Price of Scoured Wool of From 25 to 30 Per Cent Over Last Year—Traveling Salesman is Called In.

Tomorrow afternoon the Pendleton Woolen mills will be closed down and the statement made to the employees by Manager Ferguson is that the shut-down will be for an indefinite time.

To the East Oregonian Mr. Ferguson stated this morning that owing to the extreme high price of wool at the present time he will manufacture only such goods during the coming season as he receives orders for, and that even then he is not desirous of securing any new business. According to him the wool market is now in such a shape that he does not consider it safe to manufacture any more goods than he has actual orders for. First, because he feels that owing to the advanced prices the demand for woolen goods will fall off; and also, because he is afraid of a decline in the market with the stock upon his hands.

"Last year the price for scoured wool was in the neighborhood of 52 cents," said he, "while now it is ranging from 65 to 70. Consequently, it is necessary to advance the price of the manufactured goods, and this is a difficult matter to do. It would simply be a speculation should I keep the mill going and fill the warehouse with unsold stock as usual, and I am not in a position to plunge."

J. M. Spence, who has been covering the Northwest as a salesman for the mill during the past few months, has now been called home, and no effort will be made to secure any more business, according to Manager Ferguson. While he states that he regrets the closing, especially on account of the employees, he feels it is the only thing to do.

JAPANESE HAVE ADDED FOUR WARSHIPS TO THEIR FLEET.

(Continued from page 1.)

armored cruiser of 8524 tons displacement and 9000 indicated horse-power, giving her a speed of 16 knots. She had eight inches of compressed armor over her gun positions, carried eight eight-inch guns, 10 six-inch guns and about 20 smaller rapid-fire guns. She had a complement of about 567 officers and men.

The Dmitri Donskoi was an armored cruiser of 6200 tons, sheathed, of 7000 indicated horse-power, and had a speed of about 16 knots. She had an armored belt six inches thick, and had 10 inches of armor over her bulkheads and heavy gun positions. Her armament consisted of six six-inch guns, 10 4-7-inch guns and 16 quick-firing guns. Her crew numbered 510 officers and men.

The Vladimír Monomach was a sheathed cruiser of 5593 tons and 7000 indicated horse-power. She was completed in 1885, had a belt of compressed armor six to 10 inches thick, a protected deck of two inches, and carried five eight-inch guns, 12 six-inch guns and 18 quick-firing guns. Her crew numbered 550 officers and men.

The Admiral Oushakoff, a coast-defense ironclad, was of 4648 tons displacement and 5000 indicated horse-power. She was completed in 1895, and had an armored belt 10 inches thick, a protected deck of three inches of steel and from three to seven inches of armor over her heavy gun positions. Her armament consisted of four nine-inch guns, four six-inch guns, and six 1.8-inch guns, in addition to a number of smaller rapid-fire guns. Her speed was estimated at 16 knots and she carried 318 officers and men.

The Svetlana was a protected cruiser of 3562 tons displacement, had 3825 indicated horse-power, was completed in 1897, and had a speed of about 20 knots. She had a two-inch protected deck of steel and four inches of armor over her gun positions. Her armament consisted of six 5.9-inch (canet) guns and 10 one-eighth-inch guns. She had a complement of 360 officers and men.

The protected cruiser Jemtebug was of 2108 tons displacement and 17,000 indicated horse-power, giving her a speed of about 23 knots. She was completed in 1902, had a protected deck of two inches of steel and carried six 4.7-inch guns, six 1.8-inch guns, two 1.4-inch guns. Her crew numbered 340 officers and men.

The repairship Kamchatka was a most important unit of Admiral Rojstvensky's fleet. She is understood to have been fitted up with every scientific appliance available for the repair of warships, and was described as being a "floating workshop." She was launched at the new Admiralty yard, St. Petersburg, November 1, 1902. She was of 7200 tons displacement, was capable of carrying 3500 tons of coal, and mounted six small quick-fire guns. She had transport accommodations for 42 officers and 1000 men.

The Irissin was probably an auxiliary cruiser, but her name is not given in any of the naval lists available.

The battleship Orel is a sister ship of the Borodino, and the same complement of officers and men.

The battleship Nicolai I is of 96 1/2 tons displacement and 8000 indicated horse power, giving her a speed of about 14 knots. She is sheathed, and, although completed as far back as 1895, was thoroughly overhauled in 1900. She has a compound armor belt six to four inches thick, has a protected deck 2 1-2 inches thick of steel, and has six to ten inches of compound armor over her gun positions. Her armament consists of two

12-inch guns, four 9-inch guns, eight 4-inch guns and 12 quick-firing guns, in addition to a number of small rapid-fire guns. Her complement is 604 officers and men.

The coast defense ironclad Admiral Senavin is a sister ship of the Admiral Oushakoff.

Prior Losses During Present War.

Washington, May 30.—The official record of naval losses by both sides in the present war up to the conflict of May 27-28, is as follows:

Since the war began the losses in big ships to the fleets of the belligerents have been as follows:

Russia.
Sunk at Port Arthur—
Boyarin, blown up by a mine.
Retvizan, sunk by gun fire.
Poltava, holed and sunk.
Pallada, torpedoed and half submerged.

Peresviet, hulled by shell fire.
Pobieda, hulled by shells.
Petropavlovsk, blown up by a mine.
Sevastopol, hulled and half submerged.

Blown up at Chemulpo:
Varyag, first wrecked by Japanese shot.

Korieta, hulled by Uruis' ships.
Sunk in Korea Straits:
Rurik, one of the Vladivostok squadron.

Sunk off Saghalien:
Novik, one of the Port Arthur ships. Dismantled in foreign ports.
Czarevitch, now at Kiaochau.
Askold, in harbor at Shanghai.
Diapa, sheltered at Saigon. French Indo-China.

Japan.

Sunk by mines:
Hatsuse, sunk east near Dalny.
Yashima, sunk east of Port Arthur.
Miyaka, lost in Kerr bay.
Halyen, blown up October 9.
Rammed and wrecked:
Yoshino, sunk in collision by the Kasuga, May 15.

A number of smaller craft has been lost on both sides, but in this respect Russia is the heaviest sufferer. Japan lost five transports sunk by the raiding Vladivostok squadron, and lost 16 other vessels in the four attempts that she made to bottle up Port Arthur.

O. A. C. DEFEATS U. OF U.

The Former Now Holds Northwest Championship.

Cervalla, Or., May 30.—The O. A. C. track team defeated that of the University of Oregon yesterday afternoon at this place by the score of 78 to 42, and thereby won the championship of Oregon and of the Pacific northwest.

The university team had no show for the meet at any time, and had it not been for Cathey's fall in the hurdles and the disqualification of Greenhaw in the quarter mile, the score for O. A. C. would have been even larger.

In the half mile Greenhaw, O. A. C., lowered the northwest record by running the distance in 2:22. Also the time in the relay was lowered by 0:2.4. In this Smithson, O. A. C., finished almost a lap, 440 yards ahead of the U. of O. man.

In the quarter mile dash all three places were taken by O. A. C., but referee Frizzell disqualified Greenhaw, O. A. C. for alleged fouling of Veatch, and third place was given to Veatch. Eleven first places were taken by O. A. C., and three by U. of O.

Pumping Plant in North Dakota.

Engineers of the reclamation service have commenced investigations and surveys for an irrigation project south of Mandan, N. D., along the Heart river. It is probable that a pumping plant will be put in at the site of Fort Abraham Lincoln and water pumped over the hill into the valley. Several thousand acres can be irrigated there and the people interested have already formed a water users' association.

Electric Storm.

Reports from Camas Prairie and Butler creek are to the effect that quite a severe electric storm has been prevailing there, and telephonic communication was stopped with those places on account of the lightning. The storm came from the south and passed over the above portion of the county before reaching here.

Irrigation in Oklahoma.

The people of Southwestern Oklahoma are waking up to the importance and necessity of irrigation. The mass irrigation convention recently held at Snyder was attended by nearly 5000 farmers, and great interest was manifested in the movement to secure \$1,000,000 for reclamation work in that territory. Other meetings are to be held to further agitate the question of irrigation development and educate the people in regard to the benefits of the same to the end that there may be such unity of action as to insure success.

Cut worms are reported in the wheat south of Cheney, Wash.

Osteopathy

RANGE OF THE SYSTEM.

What diseases can be treated successfully by Osteopathy? Let the reader remember that every minute part of the body gets its nutrition from the circulating fluids, and the action of every part is controlled by the nerves, and he will at once see that Osteopathy is applicable to the treatment of diseases of all parts of the human body. Of course, no honest Osteopath will claim that all cases can be cured. In fact, there are very few diseases that cannot reach a stage beyond which cure is impossible. On the other hand, in the hands of a competent Osteopath there are very few diseases that, taken in reasonable time, cannot be cured. But be sure your Osteopath is competent. Because of the opposition of the drug doctors in Washington and Oregon, no laws regulating Osteopathy have been passed. Most of the states having laws, these two states are overrun with the pretenders driven out of the others. Always ask for an Osteopathic diploma before engaging his services.
