GENERAL NEWS.

Not only will Robert T. Lincoln not accept the presidency of the Equitable, but has resigned as a director.

A special session of the Minnesota legislature will be called to investigate charges against some of the state judiciary.

Rev. George Hodges of Cambridge, Mass., has been invited to become preacher for Stanford university. He is an Episcopalian.

The French colonial minister warmly commends the American administration in the Philippines and recommends it as a model.

Archbishop Moeller of Cincinnati has organized a choir of priests to render Gregorian music at the funeral of all priests in his diocese.

The Boston Steamship company of Seattle will again be given the contract for transportation of government supplies to the Philippines.

Would-be burglars wrecked a jewelry store, a shoe store and a bank building at Paris, Ill., while attempting to get into the vault and failed. They fled entirely bootless.

Unknown train wreckers, whose probable motive was robbery, removed a rail and derailed the engine and every car of a S. L. & S. P. passenger train at Sasakawa, I. T. No one was hurt.

An Indiana circuit court holds that it is unlawful to sell or give away cigarettes to that state, but not unlawful to use those bought in another state and imported into Indiana for individual use.

There will soon be patented to the Northern Pacific Railway company 10,705 acres of land in the Vancouver, Seattle and North Yakima districts, and 25,792 acres in the Coeur d'Alene district, Idaho.

The British ship Andes, laden with asphalt from Trinidad, shot into Antigua, British West Indies, on fire. The crew hustled to shore, and immediately thereafter an explosion obliterated the vessel.

During a row in the mayor's office at Chipley, Ga., Marshal White shot and killed Dr. John Hardy. Hardy had raised a row about the size of a fine imposed upon him for beating an old man. He shot at White twice ineffectively.

NORTHWEST NEWS.

The Union mills at Aberdeen, Wash., have been sold by W. B. Mack to E. E. Slade of San Francisco.

There are 3000 corporations in Oregon. Their annual reports are coming in at the rate of 100 a day to the secretary of state.

James Castello and William Harris were drowned just outside the Coquille river bar by the upsetting of a skiff, due to their own carelessness.

Sparks from a locomotive are said to have fired a hay warehouse at Forest Grove. Sixty-five tons of baled hay, valued at \$1500, burned. Insurance, \$500.

When President Gatch took charge of the State Agricultural college at Corvallis, eight years ago, 300 students were enrolled. This year there were 650 students.

The affairs of the defunct Gilbert bank at Salem, Ore., which closed its doors four years ago, are being brought to an end. It paid 30 per cent on all claims.

The first of this season's consignment of gold from Alaska, amounting to \$400,000, has reached Seattle. It was consigned from Dawson by the bank of British North America.

Mrs. Louise M. Ashe, 66 years of age, has lived in Snohomish county, Wash., 30 years, during which time she has had seven husbands, three of whom are dead and four divorced.

Sixty acres river bottom land, adjoining the city limits. Most all in an excellent state of cultivation. Good improvements on the place. Will return a big profit on the investment.

THIRD BALL GAME

DECIDING GAME WILL BE
PLAYED AT WALLA WALLA.

Expected to Be the Best Game of the Season, Both Line-ups Being Perfected and of Uncommon Strength in Every Detail—Excursion Will Leave Here on the Regular Morning Train, Returning on a Special Which Leaves Walla Walla at 7:30 p. m.

Tomorrow Walla Walla and Pendleton ball teams will meet for the third time this season and for the deciding game, the score so far being even. From the preparations that are being made by both sides it will undoubtedly be about the best game of the season, as both sides have made their nines as strong as possible and are expecting to win.

The line-up for Pendleton is as follows: McBride, c; Kennedy, p; Froome, 1b; Alexander, 2b; Grey, 2b; Crosson, ss; Castle, 3b; Lieualten, cf; King and small, rf. With the above aggregation Manager Cooley thinks that his team will be invincible, and that he is entitled to the game.

Tomorrow morning the excursion crowd will go to Walla Walla upon the regular 9 o'clock train, but in the evening will return on a special, which will leave there at 7:30. The game will be called at 4 o'clock, thus giving ample time for the people to come in from the Woodmen unweaving exercises.

Breed, who umpired the first game at Walla Walla, will act as umpire, and it is said that Parkes or Aubin will pitch for the Fruitpickers.

WHAT IS HUMUS IN SOIL?

Quality Which Comes From Certain Kinds of Crops.

Some of our readers do not seem to fully understand what is meant by the word humus, which is so often used in treating of the improvement of our old and worn soils. When vegetation of other organized matter has so completely decayed that it has lost its original structure, and has become a black or brown mass, we call it humus, says the Practical Farmer.

Everyone who has worked a new soil recently cleared from the forest has seen how much of this decayed matter is mingled with the remaining roots and trash that are not so completely decayed. They have also noticed that this new soil does not crust and bake like an old soil, that it retains moisture better than an old cultivated soil, and that its presence makes the soil more mellow and more easily tilled.

In some soils that have been reclaimed from swamps by drainage, the accumulation of humus is very large, making what are termed peaty soils. Such soils, while rich in nitrogenous matters and grown an immense stalk, have been found to be deficient in the mineral matters that are essential to the formation and ripening of grain, and need liberal applications of phosphoric acid and potash to balance the ration of plant food they contain.

But in all soils a due percentage of humus is an important matter, not only for the plant food that the humus may contain, but still more for its mechanical effect on the soil in making it mellow and easily worked, but above all, in the capacity of the humus to retain moisture in dry weather. A soil may have an abundance of plant food in a perfectly available form, as in commercial fertilizers, but if there is not moisture sufficient for its solution the plants cannot get it, and had as well not be there. The presence of a due amount of humus in the soil will often make all the difference between a failure and a success with the crop planted.

Several years ago we had two patches of sweet potatoes. One was on a piece of land on which cowpeas had been grown the previous year and left on the land. These added organic matter that made humus in its decay. Another piece was a thin, sandy soil, very deficient in humus.

Both were treated with commercial fertilizer in the furrows under the ridges. The season was extremely dry. At digging time, on the plot where the peas had been plowed under, there was a good crop, while on the other piece we had a small crop and could see the fertilizer still unused in the bottom of the furrows.

The peas had not only added fertility to the soil through the nitrogen they captured from the air, but they had tended to retain the moisture so that the fertilizer applied was all dissolved and used by the crop. The one application of decaying organic matter made all the difference between a good crop and a failure.

SPANISH JOURNALISM.

Madrid and Other Great Centers Give Evidence of Prosperity.

It is frequently noted in these days now, since "the late unpleasantness" with the United States, Spain has shown abundant evidences of progress and prosperity. It is interesting to learn that Spanish journalism is keeping step with other features of Spain's development.

In Madrid, the capital, at the present time, to say nothing of the other great centers, there are published monthly and weekly magazines that may well challenge comparison with similar publications in France, Germany and England. There are a number of cartoon weeklies, a fashion journal, a musical and theatrical review and publications representative of special interests.

Madrid is also very rich in daily newspapers. Among them are the Epoch, the Herald, the Impartial, the Mail and the Correspondence of Spain. The Liberal, a powerful daily, is published in five cities simultaneously. There is in the capital also a religious daily, called the Future Century, which is a party organ of great influence.

The FAIR DEPARTMENT STORE

The CHURCHES

Methodist Episcopal Church.

This being "Children's day," the services will be somewhat special. Sunday school as usual at 10 a. m., and at 11 a. m. the pastor will preach to the children and baptize any children presented for baptism. Also, any adults wishing to be baptized. The infant class of the Sunday school will sing a special song at this service, and Miss Olive Jones will sing a solo. Junior League, 3 p. m., and Epworth League, 7 p. m., and evening service at 8 o'clock. Miss Jones and Miss Baker will sing a duet. A cordial invitation is extended to all services. Robert Warner, pastor.

First Christian Church.

Sunday school, 9-10 a. m.; morning service, 11 o'clock; Christian Endeavor, 7 p. m.; evening service 8 o'clock. Prayer meeting Wednesday evening. Miss Fraker will sing at each service. Everybody cordially invited. N. H. Brooks, pastor.

Baptist Church.

Children's day will be observed throughout the entire day tomorrow. The pastor will preach a sermon to children in the morning, and in the evening there will be a specially prepared program in charge of the Sunday school. Spencer Simmons, superintendent Sunday school.

10 a. m., Sunday school, classes for all ages.

11 a. m., children's sermon.

3:30 p. m., boys' and girls' meeting.

7 p. m., young people's prayer meeting.

8 p. m., children's day program.

A special feature of the day will be the presence of our colporteur and his wife, Mr. and Mrs. L. W. Gowen. They will come with their Bible wagon and spend the day with us. Come and share the day's inspiration with us.

State Employees Want More Pay.

The board of trustees of the mute school have been confronted with a proposition which is not all to the liking of the members, as it places them in a position of more than ordinary responsibility, says the Salem Statesman. This proposition is in the nature of a request from Superintendent Clark of the mute school for an increase in the salary of himself and every employee of the institution to

the extent of 10 per cent of their present wages. There are about 10 employees at the mute school, including the superintendent, and their salaries range from \$1200 per year to \$30 per month. The matter was pretty thoroughly discussed at yesterday's meeting, but was taken under advisement by the board.

TUNNEL WAS UNSAFE

Workmen on Gunnison Tunnel Were Well Warned of Danger.

J. H. Quinton, supervising engineer for the government in this district, is authority for the statement that no federal investigation will be made into the Gunnison tunnel disaster of last week. Mr. Quinton holds that the ground was unsafe and that the men working there at the time of the catastrophe knew this and had been warned. He says that they undertook the work knowing of its dangers, and that, therefore, there is no necessity for investigation. It was but the natural thing," said he in conclusion.

An investigation is, however, being made by the deputy state mine inspector, M. J. McCarthy. He will report his findings to the state mine inspector.—Denver Post.

Special Eastern Excursion Rates to Chicago, St. Louis, St. Paul, Minneapolis, Duluth, Kansas City, St. Joseph, Leavenworth, Omaha, Council Bluffs and Sioux City, are one limited first-class fare plus ten dollars for the round trip. Dates of sale June 11, 15, 16, and 17. Going limit 10 days. Return limit 30 days from date of sale. Stop-overs will be granted in either direction within transit limit. For particulars call on or address E. C. SMITH, Agent, O. R. & N.

When You Are in Portland

Remember, that we have an exhibition in our booth in the ANNEX to the TRANSPORTATION BUILDING, one of our 1905 MODEL SIDE-HILL COMBINED HARVESTERS. We have had such a terrible rush of business this year that we will sell out all of our JUNIOR MACHINES and therefore it makes it impossible for us to place on exhibition one of our SMALL SIDE-HILL COMBINED HARVESTERS, but the REGULAR machines are identically like the JUNIOR, only larger. It is fitted with the latest improvements for 1905, and shows clearly what you can expect if you purchase one of these machines.

Make Yourself at Home in Our Booth

and always tell your friends to meet you at HOLT'S EXHIBIT in the ANNEX OF THE TRANSPORTATION BUILDING, and it is safe to say that you will see the ones you want to see if you drop around there once in a while.

It Is Wrong

To Suffer From a Germ Disease. Ask Us for Liquezone--Free.

Those who suffer from germ troubles, and who do not use Liquezone, are wronging themselves. You will know how much when you try it. Most of these troubles are so unnecessary—so easily cured—it is wrong to let them continue.

What reason can one find to hesitate? A trial of Liquezone costs not a penny. We will gladly buy the first bottle for any new user, and pay the druggist ourselves for it. Won't you—if you need it—accept that gift?

Liquezone is not unknown now—not untold. It has cured millions of germ troubles—troubles that drugs can't cure. There is no neighborhood hamlet so remote—that has not instances of what Liquezone has done. The cured ones are everywhere; doubtless some of your friends are among them.

You will regret these days of waiting when you learn what Liquezone does. You will wish you had abandoned wrong methods and tried the right one sooner. Please ask about Liquezone today.

Not Medicine

Liquezone is not made, like medicine, by compounding acids and drugs; nor is there any alcohol in it. Its virtues are derived solely from gas, made in large part from the best oxygen producers. The process of making takes 14 days, and requires immense apparatus. At the end of two weeks, we get one cubic inch of Liquezone for each 1,250 cubic inches of gas used. The attainment of this product has, for more than twenty years, been the constant subject of scientific and chemical research.

The main result is, to get into a liquid, and thus into the blood, a powerful, yet harmless germicide. And the product is so helpful—so good for you under any condition—that even a well person feels its instant benefit.

This is a product which, in the past two years has sprung into worldwide use in the treatment of germ

disease. It is now used by the sick of nine nations; by physicians and hospitals everywhere. It is daily used in millions of homes in America.

Two Million Dollars

Have been spent to make Liquezone known. We have bought the first bottle and given it free to every sick one we learned of. The result is that one home in five the country over, has some one whom Liquezone has cured. These homes are scattered everywhere. Your neighbors and friends live in some of them. If you will only ask what Liquezone does there are millions to tell you about it. And we paid \$100,000 for the simple right to make Liquezone—the American rights. The rights in other countries have sold for proportionate sums. We mention this fact to indicate the recognized value of Liquezone. Men have never before paid such a price for any discovery used in the cure of sickness.

Before we bought Liquezone, we had it tested for years, through physicians and hospitals in this country and others. We had it employed in every stage of every germ disease; in thousands of the most difficult cases obtainable. For two years, in many a disease called incurable, we proved that Liquezone did what medicine could not do. That was the reason for its price.

How Liquezone Cures

The greatest value of Liquezone lies in the fact that it kills germs in the body without killing the tissues, too. And no man knows another way to do it. Any drug that kills germs is a poison, and it cannot be taken internally. For that reason, medicine is almost helpless in any germ disease. Liquezone is a germicide so certain that we publish on every bottle an offer of \$1000 for a disease germ that it cannot kill. Yet it is not only harmless but of wonderful benefit—better than anything else in the world

for you. No one is so well that he cannot be helped by it. The reason is that germs are vegetables; and Liquezone—like an excess of oxygen—is deadly to vegetable matter. To the human body Liquezone is exhilarating, vitalizing, purifying—the most needful, the most helpful thing possible. But to germs it is certain destruction; and these facts are true of nothing else in existence.

Germ Diseases.

These are the known germ diseases; all due to germs or to the poisons which germs create. These are the diseases to which medicine does not apply, for drugs cannot kill inside germs.

All that medicine can do for these troubles is to act as a tonic, aiding nature to overcome the germs. But those results are indirect and uncertain, depending on the patient's condition. A cure is always doubtful when drugs are used, and some of these diseases medicine never cures. Liquezone alone can destroy the cause of these troubles. It goes wherever the blood goes, so that no germ can escape it. The results are almost inevitable. Diseases which have resisted medicine for years yield at once to Liquezone. "Incurable" diseases are cured by it. In any stage of any disease in this list the results are so certain that we will gladly send to any patient who asks it an absolute guaranty.

Asthma
Abscess—Anemia
Bronchitis
Blood Poison
Leucorrhea
Bright's Disease
Bowel Troubles
Coughs—Cold
Consumption
Croup—Croup
Constipation
Catarrh—Cancer
Dysentery—Diarrhea
Dandruff—Dropsy
Erysipelas
Eczema—Gall Stones
Hay Fever—Influenza
Kidney Diseases
La Grippe

Liver Troubles
Malaria—Neuralgia
Many Heart Troubles
Piles—Pneumonia
Pleurisy—Quinsy
Rheumatism
Scrofula—Syphilis
Skin Diseases
Stomach Troubles
Throat Troubles
Tuberculosis
Tumors—Ulcers

Gout—Gout
Gonorrhea—Gleet
Venereal Diseases
All diseases that begin with fevers—all inflammation—all catarrhs—all contagious diseases—a the results of impure or poisoned blood.
In nervous debility Liquezone acts as a vitalizer accomplishing what no drugs can do.

50c Bottle Free.

If you need Liquezone, and have never used it, please send us the coupon below. We will then send you an order on a local druggist for a full-sized bottle—a 50c bottle—and will pay the druggist ourselves for it. This applies only to the first bottle, of course—to those who have never used it.

The acceptance of this offer places you under no obligations. We simply wish to convince you; to let the product itself show you what it can do. Then you can judge by results as to whether you wish to continue.

This offer itself should convince you that Liquezone does as we claim. We would certainly not buy a bottle and give it to you, if there was any doubt of results; you want to be well and to keep well. Then be fair enough to yourself to accept our offer today. Let us show you, at our expense what this wonderful product means to you.

Liquezone costs 50c and \$1.

CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail it to the Liquezone Company, 435-44 Wabash Ave., Chicago.

My disease is _____
I have never tried Liquezone, but if you will supply me a 50c bottle free I will take it.

75c B Give full address—write plainly

Any physician or hospital not yet using Liquezone will be gladly supplied for a test.
