## INDEPENDENT VOTE

### LEAGUES BEING FORMED FOR BETTER POLITICS.

Independent Voters Will Be Appealed to Through Balance of Power Leagues Now Being Organized Throughout the County—Principles Set Forth in a Circular Which Is Being Widely Distributed.

The following circular now being distributed in Umatilla county, gives the principles of the balance of power leagues which are being organized for the purpose of encouraging more independence in politics in city, county and state elections:

**Rules and Principles.**  
1. The object of this Voters' League is to insure clean politics and good government by securing the nomination and election of the best available men to office, and through them to secure right measures and the enforcement of law.

2. This Voters' League shall be strictly non-partisan, and not commit itself to any political party as such, nor seek to overthrow any party organization; but to concentrate votes from all parties upon the best available candidates for those offices which involve the suppression of the saloon, gambling and the social evil. Each member shall be free as an individual to work outside of this league for the interests of any party.

3. The headquarters committee of the Anti-Saloon League shall appoint a state chairman to serve one year, or until his successor shall have been appointed. The state chairman shall call a mass convention in each county, to which each church and affiliated body in the county shall be asked to send three special representatives. The electors in this convention shall appoint a county chairman, and an executive committee of from five to 15, of whom the county chairman shall be ex-officio chairman, and of whom not more than one-half, if practicable, shall be members of the same political party. The executive committee shall be empowered to appoint a chairman for each precinct, or combination of precincts, and to employ a county organizer. The convention may appoint a municipal committee of from five to 15 for each incorporated town or city, or delegate this authority to the executive committee who shall act upon the nominations of the municipal precinct chairmen. The executive and municipal committees and precinct chairmen shall constitute the county committee. The county committee shall labor for the candidacy of the best available men at the primaries, shall pass upon the qualifications of those who may ask for suffrage, and shall recommend only such men as are honorable and will promise to enforce existing laws and promote moral measures. The basis of their decision shall in no sense be that of party, but entirely personal, governed by these essentials: (1) qualification, (2) character, (3) record.

4. As soon as all the parties shall have made their nominations, the county chairman shall call a meeting of the county committee, or the municipal chairman of the municipal committee, to decide what recommendations to make to members of this league.  
(a) No nominee for a state or county office shall be recommended unless he receive at least two-thirds of the votes of the county committee. In municipal elections the recommendations shall be made by at least a two-thirds vote of the municipal committee and chairman of the municipal precincts.  
(b) When opposing candidates are equally acceptable no recommendations shall be made.  
(c) When there are three or more candidates in the field and only part of them acceptable, preference shall be given to the one on the strongest party ticket among those that are acceptable.  
(d) When candidates are partially acceptable, the one most committed to desirable measures and of whose election there is the strongest probability, shall be recommended, rather than an unobjectionable candidate who has no reasonable probability of being elected.  
(e) When no acceptable candidate has been nominated by the dominant parties, the committee shall recommend the most acceptable candidate without regard to probability of election.

### CHINESE ARE ENRAGED.

Threaten to Boycott American Goods Because of Exclusion Act.

Seattle, June 17.—Local Chinatown as well as the whole Flowry Kingdom is incensed at the new Chinese exclusion act, and particularly the manner in which it is being enforced.

Leading Chinese merchants in Seattle state that the ill feeling is so intense that American goods may be boycotted in China, even if the Chinese and American governments are able to come to terms. The Chinese board of trade of Honolulu has already signified its intention to begin the boycott, and if the latter becomes extensive the local merchants realize that it is going to have an important effect upon the trade and prosperity of this city.

It is not believed that the Chinese government will declare a national boycott on American goods, but the merchants of China stand ready to begin a boycott that would be just as effective as a government one. They even threaten to fumigate the clothes of every American landing in China, and to adopt other retaliatory measures.

They believe that the Chinese minister at Washington has been insulted by the American government and that the whole Chinese nation has been outraged.

The main result is, to get into a liquid, and thus into the blood, a powerful, yet harmless germicide.

### WITNESS AGAINST HUSBAND.

#### North Yakima Woman Held in Seattle's Filthy Jail.

Found almost dead from fright and hysterics in the receiving cell of the city jail this morning, it took Drs. Buckley and Johnson almost two hours to bring Mrs. Grace Mobley, a society woman of North Yakima, back to life, says the Seattle News. A delicate woman, exceedingly refined, and prominently known in North Yakima, she was arrested yesterday by Sheriff Grant of that city and placed in the city jail. She is wanted as a witness in a case in the inland town in which her husband is charged with rape. She is a woman of wealth and refinement, charged herself with no crime and was about to board the train for North Yakima when arrested, the sheriff claiming she intended getting out of the state, in order to escape being compelled to testify against her husband. When she was taken to the city jail, the officials here remarked that the woman seemed too delicate to be put in the filthy hole that is called the Seattle city jail. Sheriff Grant insisted that she be locked up. As a result, Mrs. Mobley nearly died. The crawling roaches, the vermin and rats, combined with the indescribable odor, brought on an attack of hysteria.

# Three Million Homes

## Know What Ligozone Can Do. Who Else Will Try it Free?

We judge from our records that one home in five, the country, over, has some one whom Ligozone has cured. Some know that their lives have been saved by it. And most of those homes still use Ligozone daily, as we do, to keep well.

Those homes are scattered everywhere. Your neighbors and friends live in some of them. If you will only ask about Ligozone there are plenty to tell you about it. Why will you suffer with any germ disease while millions know how to end it? Don't you realize that a product which is used like this must have remarkable merit? We have never asked a soul to buy Ligozone. We have published no testimonials, no evidence of cures. We have simply asked the sick to let us buy the first bottle—to let the product itself prove what it can do. And we ask that of you, if you need it. If you are still using drugs to cure germ troubles, let us, at our expense, show you something better.

**What Ligozone is.**  
Ligozone is a product which, in the past two years has sprung into world-wide use in the treatment of germ diseases. It is now used by the sick of nine nations; by physicians and hospitals everywhere. It is daily used in millions of homes in America.

The virtues of Ligozone are derived solely from gas, made in large part from the best oxygen producers. No drugs, no alcohol—nothing but this gas enters into it. The process of making takes 14 days, and requires immense apparatus. At the end of two weeks we get one cubic inch of Ligozone for each 1250 cubic inches of gas used. The attainment of this product has, for more than 25 years, been the constant object of scientific and chemical research.

The main result is, to get into a liquid, and thus into the blood, a powerful, yet harmless germicide. And thousands were dying whom Ligozone could save. What was the right way—the best way—to quickly let those sick ones know it? We decided to buy the first bottle and give it free to every sick one we learned of. And we published this offer in 2,500 papers. The result is that millions know Ligozone almost as well as we do. And half the people you meet, wherever you are, know some one whom Ligozone has cured.

**Germ Diseases.**  
These are the known germ diseases; all due to germs or to the poisons which germs create. These are the diseases to which medicine does not apply, for drugs cannot kill inside germs.

All that medicine can do for these troubles is to act as a tonic, aiding nature to overcome the germs. But those results are indirect and uncertain, depending on the patient's condition. A cure is always doubtful when drugs are used, and some of these diseases medicine never cures. Ligozone alone can destroy the cause of these troubles. It goes wherever the blood goes, so that no germ can escape it. The results are almost inevitable. Diseases which have resisted medicine for years yield at once to Ligozone. "Incurable" diseases are cured by it. In any stage of any disease in this list the results are so certain that we will gladly send to any patient who asks it an absolute guaranty.

**Kills Inside Germs**  
When we purchased the rights to Ligozone, the great problem was how to let the sick know its power. For years we had watched it cure diseases which medicine could not cure. We had proved that, in germ troubles, its results were almost inevitable. We were using it daily in our own homes, as a preventive of sickness, and we knew that every home should have it. In every neighborhood, all over America, there was sickness which nothing but Ligozone could cure. There was everywhere suffering which Ligozone alone could stop.
