Northwestern Gas & Electric Company

F. W. VINCENT, MANAGER.

TO MAKE SURVEYS

LEWISTON JUBILANT OVER RAILROAD PROSPECTS.

O. R. & N. Engineers Are Now on the Ground and a Northern Pacific Party Is Going There at Once—Great Activity in Railroad Building Is Promised in That District Within Next Few Months.

Lewiston, July 5.—Yesterday one of the O. R. & N. surveying crews engaged in work on the Lewiston-Riparia road was brought by the steamer Lewiston from Almonta to a point three miles below the city at the J. H. Evans place, where the crew will start work today.

This afternoon the steamer Spokane will bring a second crew to this end of the line. The surveying work is being carried out with the greatest possible expedition, this fact illustrating the purpose of the company to as early as possible award the construction contracts.

From information secured yesterday it is also learned that within a very few days the Northern Pacific will be in a position to make an announcement as to the route that has been selected for the prairie line.

It is reported that Chief Engineer Pearson will soon visit here to make a final, personal investigation of the situation and consult with Engineer Crosswell and the field men when a decision will be reached.

There are conditions that favor the making of Lewiston the terminal of the line and there are other conditions which favor the proposed Culemac route. Several days ago, when the crew a work on the Culemac survey reached Culemac, it was announced that a satisfactory grade to the latter point had been found. This being the case, the construction of the line from that point would entail less cost than if built from Lewiston and entrance to this city could be secured over the Lewiston-Culemac line.

On the other hand, if the line is built to Lewiston more territory would be directly served, while the expense of the road would be somewhat greater. The benefits that would result to Lewiston by this point being made the direct terminal can quickly be appreciated by every citizen.

In this connection it can be stated that a strong local effort through certain influential sources has been made and is being made to have the Northern Pacific bring the line directly to the city, and it is hoped this splendid effort will be backed up and be successful.

Y. P. S. C. E. CONVENTION.

Twenty-Second International Meet is at Baltimore.

Baltimore, Md., July 5.—The Fifth Regiment Armory was crowded almost to suffocation this afternoon at the big welcome greeting that signaled the formal opening of the 22d international convention of the Society of Christian Endeavor.

The welcoming hand for the churches and the local committee was extended by Rev. Oliver Huckel, D. D., and Chairman Atwood, while Governor Warfield spoke for the state and Mayor Timanus for the city. Suitable responses were made by representative delegates, after which President Clark of Boston, delivered a brief address. The initial session was brought to a close with the annual review of the field by General Secretary Von Ogden Vogt. This latter set forth that the growth of the society during the last year has kept pace with that of previous years.

The number of young people's endeavor societies throughout the world now approaches 45,000, with an aggregate membership of 4,000,000, chiefly in the United States and Canada, and in Australia, Great Britain, China, India, Japan and in all missionary lands. It exists in about the same proportions in all the great evangelical denominations and in all their subdivisions.

Tonight in the armory there will be an international festival of praise with a chorus of 2500 voices, led by Richard A. Harris and Rev. Carey Bonner of London, England.

MOHAIR SELLING LOW.

Goat Raisers Not Sharing the Prosperity of the Sheepmen.

Domestic mohair is lower at the present than it has been in several years. In fact, comparatively speaking, it is decidedly cheaper than wool, says the New York Commercial.

Prices range all the way from 25c for the lowest grades, up to 40c for the finest clips.

For rough-faced goods it offers, under present condition, excellent values, which the domestic cloth manufacturer does not, as yet, seem to realize. Buyers claim that stocks are large and steadily piling up, while those thoroughly in touch with the situation are holding firmly to whatever stock they have, feeling assured that there will be no lack of demand for it.

The demand for mohair dress goods has been very good this spring and summer, whittles being excellent sellers for summer wear. The felt trade is counted upon to take fairly liberal supplies this fall, while carpet mills are grinding quite a little for bright finished rugs. Additional firmness has been added to the domestic market by an advance of one penny per pound on Turkish and other foreign grades of mohair.

EPWORTH LEAGUE AT DENVER.

Will Listen to a Chorus of Five Hundred Voices.

Denver, Col., July 5.—The seventh international convention of the Epworth league is proving to be as big a religious demonstration as the most sanguine had expected. Many of the bishops of the Methodist church, both

North and South, are here. More than a score of special trains have arrived with delegates from every state and territory in the union and from nearly all of the Canadian provinces. Thousands of visitors are already on the grounds and trains bearing thousands more are on the way.

Denver is proving herself equal to the emergency. Visitors are being assigned to comfortable quarters as fast as they arrive. Special excursion trains carried hundreds of visitors today to Colorado Springs, Glenwood Springs and other points of interest nearby.

The formal opening of the convention took place this afternoon. An inspiring song, led by a chorus of several hundred, started the great convention to work. There were formal greetings, roll call, reports and other business of a routine character. Tonight the Hallelujah chorus will be rendered by a choir of 500 voices.

THOUSANDS OF TEACHERS.

Gather at Ashbury Park in Their Annual Convention.

Ashbury Park, N. J., July 5.—There was another interesting and busy day for the thousands of teachers who are attending the annual convention of the National Educational association. The attendance was increased over that of yesterday by the arrival of a number of belated delegations. The greater part of today was devoted to sectional conferences of which there were more than a dozen for the discussion of questions relating to instruction and music, drawing, manual training and other branches of education.

The teachers reassembled for a general meeting tonight at which "Child Labor and Compulsory Education" will be the topic of discussion. The visit of President Roosevelt tomorrow is looked forward to with keen interest by the delegates.

STOLE TONS OF SUGAR.

Denver Thieves Carry Away 140,000 Pounds Which Was Sold at Half Price.

Denver, July 5.—Sugar to the amount of 140,000 pounds stolen from the Benedict Warehouse & Storage company's warehouse down by the railroad tracks was the cause of the arrest today of W. E. Shields of 1751 Arapahoe, charged with receiving the stolen goods, and Charles O'Donnell, George Walker and a negro, Harum Dingman, charged with having stolen the sugar.

The sugar has been disappearing from the public warehouse for some time past and suspicion at last led to the arrest of the four implicated. It is charged that the stolen sugar was sold for 3 cents a pound, while the wholesale price is 6 cents.

The men were taken into custody by City Detectives White and McNeill, who have been on their trail for some time, and a confession, it is said, has been wrung from one of the men admitting his own and the others' guilt in the matter.

SEA-GOING SANITARIUM.

Steamer Laden With Invalids Will Cruise 4000 Miles.

Berlin, July 5.—The steamship Fuert Bismarck, recently built by the Hamburg-American line for a floating sanitarium, is to start tomorrow on her first "health cruise." The cruise will cover nearly 4000 miles and will include stops at Guernsey, Bantry Bay, Stornoway, Leith, the Shetlands, Trendhjem and Bergen.

The cruises are to be chiefly for convalescents and those in need of rest and recreation. Dr. Schwelinger, who was physician to Prince Bismarck, will be in personal charge. The ship is equipped with a gymnasium, electric baths, massage rooms and all other accessories of an up-to-date sanitarium.

CATHOLIC SUMMER SCHOOL.

Fourteenth Annual Session Lasts Two Months.

Chiff Haven, N. Y., July 5.—The Catholic Summer School of America began its 14th annual session here today and will continue until September 5. During this period there also will be a four weeks' meeting of the Summer Institute for Teachers, under the direction of the New York State Department of Education.

The lecturers who will discuss the varied program of topics provided by the summer school include the Rt. Rev. Mar. Loughlin, of Philadelphia, the Rev. John T. Creagh of the Catholic University at Washington, the Rev. J. T. Driscoll of Albany, and Professor J. C. Monaghan, of the department of commerce and labor, Washington.

Northwestern Photographers.

Duluth, Minn., July 5.—Photographers of all the larger cities of the Northwest are taking part in the annual convention of the Photographers' association of the Northwest which began here today. The proceedings will last through the remainder of the week and will consist of papers, discussions and demonstrations dealing with the latest discoveries and methods in the art of photography as well as the commercial side of the business. An elaborate exhibition of photographs and photographic supplies is being held in conjunction with the convention.

Tom Lawson Goes West.

Boston, July 5.—Thomas Lawson, copper magnate and arch-foe of the Standard Oil crowd, left Boston today en route to Kansas where he is scheduled to speak at several Chautauqua gatherings on the methods of the Standard Oil trust and those at the head of the combine. Prior to his departure, Mr. Lawson announced that he would travel west by way of Canada for fear that some action might be taken as he passed through New York to delay his arrival in Kansas.

Lehman Springs Stage.

The Lehman Springs stage will start Saturday, June 30, and will run till October 1, and carry passengers and the mail. It starts from Lindsay's stable, on Cottonwood street.

MIMS IN TROUBLE.

Former Pendleton Man Makes a Gun Play in Goldfields.

A special from Goldfields, Nev., to the San Francisco Examiner, speaking of a recent embargo and gun play by E. L. Mims, formerly of this city, says:

After a day of more or less sensational incidents, including several gun plays that at times looked decidedly serious, another chapter in the Mims-Sutro Bleakmore Lang contest for possession and control of the affairs of the liquidated brokerage firm of Mims-Sutro company, was this afternoon concluded in the discharge of E. L. Mims, at his preliminary examination on a charge of having broken into the office of Bleakmore and stolen the books and papers belonging to the latter.

Early this morning Mims entered the office, on Main street, and engaged in an altercation with W. L. Lang and others of the office force. He and Lang soon came to blows, and a shooting affray was avoided only after extreme measures by bystanders. Later Mims and two of his employees returned and for a time there was the gravest danger of a general battle between the opposing forces. Firearms were in general evidence, and it was expected that a tragedy would occur before the day had passed.

At the trial the attorneys for Mims tried every trick of the law to prevent the issuance of an amended complaint. During the examination the prosecution presented eight witnesses to show that on the morning of June 17 Mims had entered the place of business, and, at the point of a revolver, cleared it out, afterwards looting the safe of books and papers, which were later secretly expressed away.

Mims' defense was that an agreement, entered into on June 13, for the purchase by Bleakmore of the office and business of the old firm, was consummated without authority although Emil Sutro, who conducted the deal, and received \$5000 as part payment, presented a statement signed by Mims authorizing him to act for the firm.

An effort on the part of the attorneys for the state to prove ownership of the premises and the validity of the transfer was ruled out as incompetent evidence by Justice Bell, who refused to admit any testimony relative to the sale of the firm's property. This gave the defendant's attorney a decided advantage in contending that Mims was taking only property belonging to himself.

Tonight the atmosphere is somewhat clearer as Mims and his followers chartered an automobile and left for Tonopah.

Shipping Copper From Oregon.

Two six-mule teams of the McIntyre Transportation company arrived at Grants Pass Thursday with 2,500 pounds of matte from the Tealima copper smelter, says the Grants Pass Courier. The teams loaded back with coke for the smelter, two cars having arrived from Wyoming. The smelter, which was blown-in on Thursday of last week, is turning out matte steadily, and soon there will be work for all the teams that can be secured in hauling matte and coke. Captain McIntyre was in Grants Pass Tuesday from the smelter and he stated the Maybell, on which there is a 120-foot shaft, is to be pumped out at 200 feet and the mine put in operation along with the Queen of Bronze and Little, from which ore is being taken for the smelter.

Giving a little is better than wishing you could give a great deal.

ITS MERIT IS PROVED

RECORD OF A GREAT MEDICINE

A Prominent Cincinnati Woman Tells How Lydia E. Pinkham's Vegetable Compound Completely Cured Her.

The great good Lydia E. Pinkham's Vegetable Compound is doing among the women of America is attracting the attention of many of our leading scientists, and thinking people generally.

Mrs. Sara Wilson

The following letter is only one of many thousands which are on file in the Pinkham office, and go to prove beyond question that Lydia E. Pinkham's Vegetable Compound must be a remedy of great merit, otherwise it could not produce such marvelous results among sick and ailing women.

Dear Mrs. Pinkham:—About nine months ago I was a great sufferer with womb trouble, which caused me severe pain, extreme nervousness and frequent headaches, from which the doctor failed to relieve me. I tried Lydia E. Pinkham's Vegetable Compound, and within a short time felt better, and after taking five bottles of it I was entirely cured. I therefore heartily recommend your Compound as a splendid uterine tonic. It makes the monthly periods regular and without pain; and what a blessing it is to find such a remedy after so many doctors fail to help you. I am pleased to recommend it to all suffering women. Mrs. Sara Wilson, 31 East 83 Street, Cincinnati, Ohio.

If you have suppressed or painful menstruation, weakness of the stomach, indigestion, bloating, leucorrhoea, flooding, nervous prostration, dizziness, faintness, "don't-care" and "want-to-be-left-alone" feeling, excitability, backache or the blues, these are sure indications of female weakness, some derangement of the uterus or ovarian trouble. In such cases there is one tried and true remedy—Lydia E. Pinkham's Vegetable Compound.
