HOT LAKE'S GAME

SCORE FIVE TO THREE IN SEVEN INNINGS.

Hottest Day of the Season and But Few Witnessed the Game—No Other Games Now on the Schedule and Enthusiasm Is at Low Ebb.

Hot Lake, 5: Pendleton, 3. Yesterday was the hottest day this summer in Pendleton and evidently the players from Hot Lake were right in their element, judging from the score. Owing to the extreme heat only about 100 spectators were present at the game yesterday afternoon, although it was generally known to be the last chance to see a ball game here this season.

Scores were made by both teams early in the game and for a time it stood two to two, after which three more were finally bagged by the Union county aggregation and one by the home boys. Only seven innings were played.

For Pendleton Knapp was in his old place as catcher and Small filled the pitcher's box, while King held down first base. Roy Alexander was in his old place as second baseman. Fred Hartman played third, Brown short stop, while Lissauer, Castle and Williams watched the field. Wilner acted as umpire in a very capable manner.

No more games are now on the schedule for Pendleton and none will be arranged as the season is late and the enthusiasm about all gone as a result of the series of defeats which the team encountered almost from the very beginning.

BIG CAVE EXPLORED.

Monster Subterranean Chambers First Seen by Man.

For the first time in the inmost recesses of an immense and terrifying cave under Santa Cruz Island in the channel group have been penetrated by man, says the San Francisco Examiner. Provided with powerful automobile lamps, George Voorhees, a prominent business man of this city, explored the cave yesterday. Two days were necessary to the search, because it is dangerous to remain in certain portions of the big cavern except at extreme low tide.

No one but Voorhees had ever followed the cave to its extreme end. The place is known as the great "Painted Cave" of Santa Cruz. Through an opening in the sheer side of a bluff a boat may be run into the cave which opens into a vast domed chamber, in which the Pacific Coast Steamship company's biggest vessel might be turned. The water is deep

and fish of all size may be seen in it. The main chamber narrows to a long arched passage, which opens into a lesser chamber. From this second chamber on the cave has hitherto been unknown, but Voorhees followed through gradually narrowing passages with a turn at right angles to the very center of the island.

The whole roof of the cave is colored with a growth of fungi in yellows, reds and greens. The coloring is remarkably beautiful. Never for a moment does the weird yelping of seals, of which there are hundreds in the cave, cease to blend with the hollow roaring of the swells, and with the splashing of huge volumes of water from "blow holes" where the swell washes into the chambered openings from the main cave compresses the air and is blown out with an explosion and in sufficient volume to swamp a boat.

Voorhees explored several branches, although the undertaking was a most dangerous one. A year ago a party of several men spent some hours in a boat in a chamber, the opening to which had been closed by the rising tide.

DECISION IN CHINESE CASE.

Louie Ngon, After 23 Years' Residence, Allowed to Remain.

Judge Beatty Friday handed down a decision in the case of Louie Ngon, accused of residence in this country in violation of the exclusion act, the order of deportation by the commissioner being reversed, says the Boise Statesman. The defendant has been a resident of this country for 23 years, according to evidence, for a number of years as a minor, his father having been a merchant. He became a merchant himself in 1890, but has been a laborer since 1897, and was sought to be deported because of that fact.

"The distinction must be remembered," says the opinion of Judge Beatty, "between the cases of those who were merchants in this country during the period of registration (1892-3) and subsequently became laborers, and those who came here as merchants after such period of registration and subsequently became laborers. It is now the holding in this circuit that this latter class must be deported, but the former cannot be."

Rest for Mail Clerks.

By orders of the second assistant postmaster general, the railway mail clerk on the Tekoa-Wallace branch of the O. R. & N. will be relieved six days each month by an extra man, who will also relieve two other railway postoffices working under similar conditions, says a Spokane dispatch. The postal business has increased to such an extent and the duties of the railway mail clerks have become so burdensome, the decision was made to allow six days monthly for rest and preparation for the annual examinations. The proposed relief has been recommended for several months by officials of the railway mail service.

Tabloid.
He—Do you remember your old school friend Sophie Smith? She—Yes, indeed I do. A most absurd looking thing. So silly, too! What became of her? He—Oh, nothing. Only—I married her.—Illustrated Bits.

A scientist at Buffalo says that he has discovered that working around high voltage electrical machines ruins the digestion.

No Dessert More Attractive

Why use gelatine and spend hours soaking, sweetening, flavoring and coloring when

Jell-O produces better results in two minutes! Everything in the package. Simply add hot water and set to cool. It's perfection. A surprise to the housewife. No trouble, less expense. Try it today. In Four Fruit Flavors: Lemon, Orange, Strawberry, Raspberry. At grocers. 10c.

OFFERED DRINK TO INSPECTOR

LESTER HICKS CARRIED WHISKEY TO RESERVATION

Young Sport From Pendleton Piled His Trade With the Wrong Man—Inspector Valentine Didn't Take the Proffered Drink, But Ordered the Offender Arrested—Private Secretary to Indian Commissioner Studying Condition Very Successfully.

When R. G. Valentine, private secretary to the commissioner of Indian affairs, arrived here, he stated that it was his intention to become familiar with the Indians of the reservation and the white renters as well as to investigate certain charges that had been filed by different people. This was nearly a week ago, and judging from the following story, which is told here today, he has been highly successful as far as the "whites" are concerned, at least.

According to the story, Lester Hicks, brother to the famous "Skipper" Hicks, rode to the reservation yesterday and was casually viewing the Indian camp ground, when he chanced to fall in with a certain young man of neat appearance, who was apparently about 25 years of age, was smooth shaven, small in stature and wore a pair of brown leggings.

Evidently the stranger made a hit with young Hicks, for after a short time the latter, with a knowing smile, tapped his hip pocket and asked his new-found acquaintance to step to a secluded spot and have a drink.

This offer was accepted, but no sooner had the bottle of "firewater" been produced when the stranger called an Indian policeman and had his "friend" arrested for bringing liquor on the reservation. The young stranger who had so impressed Hicks was none other than Inspector Valentine, engaged in "meeting the Indians and others of the reservation."

PURCHASED SHOE STOCK.

Lee Teutsch Buys Out Dindinger & Wilson—Involving Now in Progress.

Lee Teutsch has purchased the stock and the good will of the Dindinger, Wilson & Co. shoe store, the deal having been made Saturday afternoon. The stock is now being invoiced and as soon as that work is completed the goods will be moved to the Teutsch Department Store and placed on sale there. The stock of Dindinger, Wilson & Co. is generally regarded as an exceptionally good one and is said to have been purchased by Mr. Teutsch at a very reasonable price.

As soon as Messrs. Dindinger and Wilson can close their affairs here, which will require most of this week, the former will leave for Portland, where he expects to remain during the remainder of the summer. Mr. Wilson will leave for Alberta to join his family there and engage in wheat farming in that country.

DAMAGED WOOL RESCUED.

Loss by Fire in Wool Cars Last Week Amounted to \$30,000.

The scouring mills have finished the work of scouring the remaining wool from the fire that destroyed two carloads at Baker City recently. The loss is much greater than was at first reported and will amount to \$30,000. There were 35,000 pounds of secured and 31,000 pounds in the grease in the consignment and of this amount but 10,000 pounds were saved. The wool was returned to Pendleton for scouring and will be shipped to Boston tomorrow.

FERGUSON WINS MEDAL.

Interesting Shoot by Pendleton Sportsmen Yesterday.

Another good meet was held yesterday by the local trap shooters, there being two manufacturers' agents present, Frank Howe and C. H. Collier, both of whom are excellent marksmen. Emil Holling, who participated in the meet a week ago was at Walla Walla yesterday, and shot with the sports there.

Yesterday was the regular monthly medal shoot of the Pendleton association and the honor was carried off by C. J. Ferguson, while the Vincent trophy, the loving cup, was won by Walter Markham.

RUSH O. R. & N. BRANCH.

General Manager O'Brien Wires to Lewiston That Road Will Be in Operation Within Six Months.

General Manager J. P. O'Brien, of the O. R. & N., has wired to Lewiston people that contracts for the Lewiston-Riparia branch of the O. R. & N. would be let at once and work on the same would be begun soon.

He estimates that without any unexpected delays the branch will be completed within six months. Much of the material is now on the route of the branch, especially at Riparia, as the company has been storing ties and rails there for the past year.

WOOL WAREHOUSE FULL.

Furnish Warehouse Contains More Than at Any Time During Season.

There is more wool in the Furnish warehouse at the present time than has been at any time during the wool season. The entire floor space is occupied and for the past several weeks it has been coming in faster than it has been shipped out.

Cars have been arriving at the rate of 15 per day and the management is of the opinion that this will continue for at least two weeks longer. The wool handled at the present time is all from Baker City and Elgin and has been sent here by Koshland & Co.

and will be graded and sent by that firm to Boston.

According to Manager Sutherland the house will be full for six weeks longer and the wool will be entirely out by the end of August and way will be made to handle a part of the grain yield of the county. There are at present 16 men employed at the house, there being six at work on each of the two presses, and four continually employed with the trucks.

DEMENTED PASSENGER.

A. Cornick, of Assumption, Ill., Leaves O. R. & N. Train and Wanders to Reservation.

Wandering aimlessly about in a wheat field on the Pierce-Tweedy place on the reservation, a man who gave the name of A. Cornick, was found yesterday morning. When approached by the parties who found him the man was found to be demented and could give no satisfactory explanation of himself or of how he came to be there. However, a railroad ticket from Assumption, Ill., to Seattle, which was found on his person, showed that he had been a passenger on one of the westbound trains and had gotten off either at Pendleton or some of the stations just east of here. The ticket had been punched to this place.

Soon after being found Cornick was brought to town and here turned over to the sheriff's office, where he was more closely examined. From letters and papers on his person it was learned that he is a harness maker by trade and has a wife and grown sons at Assumption, Ill. The latter have been written to and informed of the old gentleman's condition. In appearance he is somewhat undersized and has a brown moustache and is apparently about 50 years of age. He is a member of the order of Odd Fellows and the local members of that organization are looking out for him here.

HEADING BEGINS.

Henry Lorenzen's Large Crew at Work on Reservation.

Three threshing crews owned by Henry Lorenzen pulled out into the field this afternoon and will commence operations this evening. The first grain that will be cut and threshed will be on the reservation about seven miles from the city. The crew of Mr. Lorenzen is one of the largest stationary steam threshers in the county.

Two headers and eight header beds are used in cutting the wheat and the handling of the grain is expedited by the use of nets in the boxes. Thirty men are employed to run the different parts of the machine and 75 horses are used on the different wagons in the outfit.

To Change Association Rooms.

Architects Howard & Swingle are now at work upon plans for the alterations to be made in the rooms of the Commercial association, when the addition to the Milarky building is all completed. It is proposed to make the library room larger by extending it to the rear so as to take in another window and also by moving the north wall closer to the door, thus lessening the room in the hall. The rear wall of the billiard room will also be moved backward so that the size of that room will remain about as at present.

Delicacies Are Multiplied.

Blackberries and cucumbers appeared on the market this week in sufficient quantities to admit of local commission men notifying their customers that orders can be filled promptly within a few days, says the Walla Walla Statesman. Quotations are still high, cucumbers wholesaling at \$1.25 for a six inch and blackberries at \$2 per crate for the first receipts.

In Police Court.

In the police court this morning Rob Rankin, Tilligat, an Indian and John Wilson were each given \$5 or three days for being drunk on the streets, while John Doe was given the same sentence for having been drunk and disorderly.

Indian Child Died.

The infant child of James Billy, a Umatilla Indian, died last night on the reservation and will be buried at the Presbyterian mission tomorrow.

To the Beach.

Mr. and Mrs. J. W. Mumford, Mrs. George Mosker, and Mrs. Al Cheslen leave tonight for Ocean Park, to remain for six weeks.

Sufficient sherry wine to supply the world's demand for a quarter of a century is said to be contained in the storehouses of Jerez de la Frontera, in Spain.
