- Graniteware
- White Enamelled Steel
- Tin Spoons
- Cheap Knives and Forks
- 1½ pounds Coffee 25c
- 1 pound uncolored Tea 40c

OWL TEA HOUSE

EXCERPTA COFFEE POT.

TOOLS WERE STOLEN

THREE COMPLETE KITS TAKEN FROM CARPENTERS.

They Were Locked in Chests in the New Lockley Residence in the Southwestern Part of Town—Locks Were Broken and a Large Number of Excellent Tools Taken—Believed Now That There Can Be Little Doubt But That the Thieves May Be Apprehended.

Four carpenters who have been working on Fred Lockley's residence in the south part of town, are idle today because \$100 worth of choice carpenter tools were stolen from the tool chests left in the unfinished house last night.

The stolen tools belonged to T. M. Lowe, Tony Hemm and George Hamblen, who were employed by Contractor M. R. Yates in building the Lockley house, and consist of hand saws, levels, squares, chisels, braces and bits, planes, aprons, adzes, hammers, and every imaginable kind of small but useful tools found in well selected sets of carpenters' tools.

Three large chests were left in the house last evening when the crew quit work for the night, and this morning the locks were found to be broken, the chests turned on their sides where the contents had been emptied out on the floor, and nearly three entire sets of tools were missing. One box in which some of the tools were locked up was also taken and a wheelbarrow track from the house to the O. R. & N. depot was found to give a clue to the direction taken by the thieves. The box of tools was checked as baggage on the west-bound O. R. & N. train, and it is thought that it will be an easy matter to locate the tools and probably the thief.

At the depot last night just before the train left, the box was opened in the presence of the baggage master and the tools adjusted, when the lid was replaced and the box lashed up with rope and checked, so there is no doubt about the direction taken by the thief, but it cannot be ascertained whether he went to Spokane by way of Umatilla, or to Portland.

The tools were all high grade, and had been selected with care by the owners, and it is evident from the choice made by the thieves that they were also judges of good tools, as the only saw left in the chests was the oldest and poorest saw among the sets.

Thief Is Arrested.

This afternoon a man giving the name of Arnold was arrested in Umatilla with the box of tools in his possession.

Umatilla with the box of tools in his possession. He had transferred his baggage from the main line of the O. R. & N. at Umatilla and had bought a ticket to Pullman, Wash. Deputy Sheriff Joe Blakeley and M. R. Yates went down on the delayed train this afternoon and will bring Mr. Arnold to this city on the evening train.

INDIANS ARE FISH EATERS.

Enormous Amount of Fish Now Sold on the Reservation by Pendleton Butchers.

From 400 to 500 pounds of fish per day is consumed on the Umatilla reservation, the larger portion of this amount being furnished by Pendleton butchers, who run beef wagons into the reservation.

If it is possible to get Chinook salmon they will buy no other kind of fish, but if Chinook is out of season or not to be had then they will buy any other kind available.

It is not known generally that if it were not for the Indian trade in Pendleton butcher shops that but half the present number of shops could be maintained here. The hotels and restaurants buy nothing but the joints of beef and mutton leaving all the rougher portions of the carcasses to be sold to the other trade and the Indian is the chief purchaser of this coarser and cheaper kind of meat.

Aside from the large amount of fish sold on the reservation there is a still greater amount of beef sold every day. The Indians are regular customers of the beef wagons and have monthly or indefinite accounts with the butchers, which are paid with about the same punctuality that marks the white customers' dealings.

Office at Bingham Springs.

Manager Charles J. Ferguson, of the Pendleton woolen mills, has moved his office and typewriter to Bingham Springs, from which place he will answer all his immense correspondence and conduct his business during the summer months.

One Vote for Mayor.

At the last city election in Pendleton, E. P. Dodd, editor of the Tribune, received one vote for mayor, presumably his own vote, as a \$10 reward offered by a prominent citizen for the man casting that lone vote has failed to bring out the desired information.

To St. Anthony's Hospital.

Paul Lederle, a pioneer tailor of La Grande, was brought to St. Anthony's hospital last night, accompanied by J. M. Hiltz of that place. Mr. Lederle has been ill for several months, and is now in a serious condition.

Mr. and Mrs. Robert Ray of Hood River, arrived here last night. Mr. Ray is an experienced bookkeeper and accountant, and is in search of a position, as he is desirous of locating in what he has long heard called the best city in the Inland Empire.

Cut on Hand Saw.

W. H. Hooper received a bad cut on his hand from a hand saw this morning, and while it is not dangerous, it is a painful injury. Drs. Smith and Dick dressed the injury.

SCIENCE PREVENTS BALDNESS.

The Fatal Germ and Its Remedy Now Facts of Science.

It is the rarest thing in the world for a man to be necessarily bald. No man whose hair is not dead at the roots, need be bald if he will use Newbro's Herpicide, the new scalp antiseptic. Herpicide destroys the germ that cuts the hair off at the root; and cleans the scalp of dandruff and leaves it in a perfectly healthy condition. Mr. Mannett, in the Maryland Block, Butte, Mont., was entirely bald. In less than a month Herpicide had removed the enemies of hair growth, and nature did its work by covering his head with thick hair an inch long, and in six weeks he had a normal suit of hair. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich. A. C. Koepfen & Bros., special agents.

LOOK TO UMATILLA

MANY NON-RESIDENTS ARE SUPPORTED HERE.

Great Harvest Fields Attract Laborers From All Adjoining Counties—Many Small Farmers and Stockmen From Grant, Morrow and Malheur Counties Shear Sheep Here in the Spring, and Harvest Here in Fall.

Umatilla county perhaps furnishes employment and subsistence to more non-residents than any other Eastern Oregon county.

In the herds of harvesters now arriving in the county are dozens of small farmers and stockmen from Grant, Morrow, Harney and Malheur counties in Oregon, and Franklin, Klamath and other counties in Washington, who are forced to work away from home a portion of the season in order to meet their expenses and keep their hearth fires burning.

On the street yesterday four men from Grant county were seen in a group, telling each other where they had secured work and how long they expected to remain here.

They each had a home and family 100 miles to the south and each had come to this mecca of the working-man to work for two months in harvest and grain hauling to earn enough ready money to carry them through the winter.

Each of them has a small bunch of cattle running on the range, but the income from the little hay ranch and the small bunch of cattle is not sufficient to keep the family the entire year, so the wife and babies run the ranch and husband and father takes his team and goes out for the summer to earn the winter's supplies.

In the springtime the same class of small farmers and stockmen may be found here either shearing sheep or plowing for a couple of months to earn money with which to pay taxes and lay in the summer's supplies. They cannot secure work at such good wages nearer home for the reason that the country in which they live is settled up largely with men in their own circumstances and what few big ranches there are near them have a sufficient supply of hired help the year round to keep the work moving.

When these farmers start home after harvest this fall each will load his wagon with supplies for the winter and thus Umatilla county becomes the constant trading point for a large number of non-residents, who learn to look to this county for a large part of their support, although they live and claim residence in other distant counties.

AUTO CAUSED RUNAWAY.

Frank Snyder Sustains an Injured Leg and a Demolished Wagon by Act of Chauffeur.

Frank Snyder, who lives three miles north of here, while returning from town yesterday afternoon with a tank of water for his farm, was met by the Gordon automobile in the county road just over the hill north of the city, and his team became frightened and ran away demolishing his wagon, injuring his own leg and severely injuring one of the horses.

When the horses saw the machine they began to shy and instead of stopping to allow the team to pass the chauffeur kept going, and finally the team plunged to one side breaking the reach of the wagon, overturning the tank, throwing Mr. Snyder to the ground and injuring him, after which they ran away with the front wheels of the wagon and when caught one of the horses had sustained severe injuries.

Mr. Snyder says he beckoned to the chauffeur in the auto to stop until he could pass but instead of heeding his signals the machine kept moving toward the team in the middle of the road, causing the accident and consequent damage.

NEW ENGINES ARRIVING.

O. R. & N. Company Receiving Fine Equipment at La Grande.

Engines 195 and 196, two of six monster passenger engines just received by the O. R. & N. at La Grande, are now on the Umatilla-Huntington passenger run and the others are being made ready as fast as possible. They are known as the balanced compound type and are the only ones of the kind on the Pacific coast.

The locomotives cost about \$150,000. Each one weighs 250,000, in addition to the tender, which weighs 110,000 pounds loaded with coal and water for a 100-mile run. The tender capacity is 15 tons of coal and 3000 gallons of water. The engine will run at a speed of 50 to 85 miles pulling an ordinary passenger train of 10 cars.

POOR ENGINE EXHIBIT.

Very Little Machinery in the Lewis and Clark Transportation Building.

Railroad men who are interested in transportation machinery are disappointed with the exhibit of railroad machinery at the Lewis and Clark fair.

The exhibit of locomotives consists of but three engines, one a new model compound, just like those now in use on the Mountain division of the O. R. & N. between Umatilla and Huntington, one logging engine and a switch engine like those in use in the O. R. & N. yards at Albina, La Grande and Umatilla.

The Westinghouse, nor New York airbrake equipment are neither one on exhibit, and the semaphore and telegraphic equipment is entirely absent from the exhibit.

WHO WILL BE SECRETARY?

Successor to James H. Gwinn Has Not Been Selected by Woolgrowers.

Although James H. Gwinn has been absent from the state for two months

and is now permanently located in his new position as secretary of the National Livestock association, the Oregon Woolgrowers' association has not yet selected his successor as secretary of that organization.

The next meeting of the Woolgrowers' association of Oregon will be held in Portland on September 12, and it is likely that the executive committee will not elect a temporary secretary, but will wait until the regular meeting when a secretary will be elected.

Now that the association has been greatly strengthened by the success of the wool sales dates fixed and maintained by it, the membership is more deeply interested than ever in promoting it and adding to its strength and influence and a strong and active man will be selected as secretary.

Arm Injured in Machinery.

Fremont Arnold, one of the proprietors of the Pendleton iron works, was severely injured this morning by being caught in the machinery of the lathe while working at the foundry. His right arm was severely twisted and bruised but no bones are broken. It is not known how severe the injury is until it develops somewhat. Drs. Smith and Dick attended to the injury and he is at home entirely disabled from work.

Car of Melons Tonight.

The Columbia Produce company will receive the first car of melons to arrive in the city tonight. The melons are shipped from Cochilla, Cal., and are the first and earliest melons to be produced on the Pacific coast. Manager John B. Benson, of the Columbia Produce company, says that melons will be plentiful from this time on as the general crop in Southern California will be on the market in a short time.

Shipping Clerk Busy.

Charles Bennett, shipping clerk for Pendleton woolen mills, is busy filling orders being received from different parts of the world for the different products of the mills. Not only are they receiving orders from all customers, but orders from entirely new fields are being received, showing the increasing demand for the output of this unique institution.

Friends From Arkansas.

Three friends of Wood Pasley, the popular clerk in the clothing department of the Peoples Warehouse, passed through from Forest City, Ark., on the delayed train today en route to the Lewis and Clark fair. They were Ray Bonner, Paul Pope and Tom Horney, and all are old neighbors and friends of Mr. Pasley.

Heavy Barley Yield.

Tom Atkinson, who lives 10 miles southeast of this city, is said to have one of the best crops of barley in the county. While it is not yet harvested, it is said that it will yield 75 bushels to the acre.

Hunters Out of Order.

Complaint is made that hunting is being done along the Umatilla river west of the city out of season, and against the law. Farmers complain also of carelessness and promiscuous shooting, endangering life and livestock.

Lemon Famine Broken.

The temporary lemon famine which prevailed for a few days last week, has now been broken and a sufficient supply is being received to meet the local demands. The retail price is now 20 cents per dozen.

Ill With Typhoid.

The 9-year-old daughter of Bob Templeton of Foster was brought to St. Anthony's hospital this morning suffering with typhoid fever.

Engineer Reinstated.

Engineer J. W. Hampson, of the La Grande division of the O. R. & N., who was recently suspended, has been reinstated and is on his old run again.

The Gilliam County Milling company will erect a 300-barrel a day flouring mill at Condon.

DRINK HABIT PERMANENTLY CURED BY ORRINE

A SIMPLE HOME TREATMENT

Physicians pronounce drunkenness a disease of the nervous system. No "will power" can heal the stomach, nerves which have been burned and seared by alcohol.

Orrine permanently removes the craving for liquor by acting directly on the affected nerves, restoring the stomach and digestive organs to normal condition, improving the appetite and restoring the health. No sanitarium treatment necessary. Orrine can be taken at home without publicity.

Orrine is prepared in two forms. No. 1 is a tasteless and odorless powder, and can be given without the knowledge of the patient, in tea, coffee or milk. No. 2 is a pill form, and should be taken by those willing to be cured.

All correspondence confidential. PRICE, \$1.00 PER BOX.

Orrine is sold on a positive guarantee to cure. If it fails, we refund the money.

Book on "Drunkenness" (sealed free on request. Orrine mailed (sealed) on receipt of \$1.00 by The Orrine Co., Inc., Washington, D. C.

Sold and recommended by Brock & McComas Co., Pendleton, Or.

WORMS Best For The Bowels

"I had for years suffered from what medical men called Dyspepsia and Catarrh of the Stomach. In August I purchased a box of Cascarets and was surprised to find that in ten days my system was completely restored. I feel like a new man. Judge our doctor's surprise when I showed him thirty feet, and in another day the remainder about the same length of a tape worm that had been sapping my vitality for years. I have enjoyed the best of health ever since. I trust this testimonial will appeal to other sufferers." Chas. Blacklock, 1111 Erie Place, West Philadelphia, Pa.
