

INTERESTS UNITED

ALL SECTIONAL FACTIONS SHOULD PULL TOGETHER.

Columbia River Enthusiasts Should Remember that "There Are Others"

—Yaquina and Coos Stays Have Legitimate Needs Which Must Be Attended to—Senator Piles of Washington is Friendly to Columbia River Improvement.

Expressions from residents of the Willamette valley and the inland empire indicate that the movement for the further improvements of the Columbia river will have the hearty cooperation of the entire northwest and California, with senators and representatives in congress of other states ready to assist. Senator C. W. Fulton in the effort to induce the appropriation of sufficient money to keep the work going for the coming summer, says the Oregon Daily Journal.

"I judge from my observation at home and in other towns south from here," said J. S. Cooper, mayor of Independent (Polk county), today, "that there will be hearty co-operation between Portland, Astoria, The Dalles, Pendleton and all the towns in the inland empire in the movement to induce congress to provide for the further improvement of the Columbia. We people realize that in the improvement of rivers and harbors lies in large part the assurance of proper development of this northwest. It is a question that concerns the entire northwest.

Must Stand Together.

"Furthermore, the necessity of all western states standing together doubtless will make senators and representatives of neighboring commonwealths join with Senator Fulton and the delegation that is to go to Washington to further the appropriation.

"We must engender a spirit of loyal co-operation; must handle these things on a nonpartisan basis, and remember that the issue goes to the interests of all persons irrespective of party alignment.

"Another thing, the residents of the Columbia river valley should remember that reciprocity is the soundest foundation for all such enterprises, and that, if the people south from here in the state of Oregon help them, they in turn should help the western and southwestern Oregonians to procure appropriations from congress for the improvement of the Willamette river and Coos and Yaquina bays.

Should Concentrate Forces.

"We are not making the mistake of forgetting that these matters must be taken up one at a time and that we should not scatter our forces among several federal enterprises so as to lose them all. Hence, we are disposed to help the Columbia valley to get its appropriation for the deepening of the bar at Astoria and the removal of obstructions at Celilo. We believe that the people of the Columbia valley will not forget the assistance we render them now and therefore will aid us in procuring needed improvements."

The meeting of the Oregon Development league that is to be held in Pendleton in a few days to forward the Columbia river enterprise is expected to add much force to the movement. The plan is to assemble there prominent men from Oregon, Idaho and Washington, and unite them in presenting to congress the

PSORIASIS AND ECZEMA

Milk Crust, Tetter, Ringworm, and Scalded Head, and Every Form of Torturing, Disfiguring Humors from Infancy to Age.

CURED BY THE CUTICURA REMEDIES

The agonizing itching and burning of the skin, as in eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalded head; the facial disfigurement, as in pimples and ringworm; the awful suffering of infants, and anxiety of worn-out parents, as in milk crust, tetter, and salt rheum—all demand a remedy of almost superhuman virtues to successfully cope with them. That Cuticura Soap, Ointment, and Pills are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy have made them the standard skin cures and humor remedies of the civilized world.

CAPT. GRAHAM'S CURE

Of Distressing Humour.

Captain W. S. Graham, 1321 Eoff St., Wheeling, W. Va., writing under date of June 14, '04, says: "I am so grateful I want to thank God that a friend recommended Cuticura Soap and Ointment to me. I suffered for a long time with sores on my face and back. Some doctors said I had blood poison, and others that I had barbers' itch. None of them did me any good, but they all took my money. My friends tell me my skin now looks as clear as a baby's, and I tell them Cuticura Soap and Ointment did it."

Cuticura Soap, Ointment, and Pills are sold throughout the world. Foster-Lowe & Co., Cuticura Remedies, Boston, Mass. Send for "How to Cure Every Humour."

demands of this northwest country. Assurances have been received from many senators and representatives in congress that they will help in inducing congress to provide for continuing the work at Celilo and Astoria.

Senator Sam Piles, of Seattle, has been quoted as saying that while he could hardly be expected to divide his effort in a way to endanger the projects of his own state, he sees no reason why he should not lend his influence to Oregon at this time in getting the appropriation for the Columbia's improvement.

The well known cordiality that exists between Senator Piles and Senator Levi Ankeny, of Walla Walla, and the understanding that they will work in harmony in Washington this winter during the session of congress, leads men here to believe that they will find Senator Piles in line for the movement that has been started, for Senator Ankeny strongly favors the improvement.

That strong representation will be sent to Washington to support the efforts of T. B. Wilcox is a certainty. The enthusiasm that has been manifested here and in all towns of the northwest appears to insure that all potential energy will be expended and that success will attend the efforts.

MOTHERS HOLDING CONGRESS.

Juvenile Science Discussed in All Its Phases.

Atlantic City, N. J., Nov. 10.—The annual session of the New Jersey Congress of Mothers opened here today at the Free Public library, corner Pacific and Illinois avenues. About 100 delegates, representing Mothers' clubs in all parts of the state, were in attendance, when the conference was called to order. Besides the regular delegates there are many men and women, interested in the work of the Mothers' clubs, also teachers and others present.

The subjects to be discussed will pertain to literature for children, care of junior citizens and conferences for teachers and parents. Mrs. Alexander Marey, Jr., of Riverton, is the president of the congress and Mrs. J. Linton Engle, of Haddonfield, the secretary. The guests of honor of the congress are Mrs. Frederick Schöff, president of the National Congress of Mothers, and Mrs. Edwin C. Grice, honorary president of the New Jersey society. Among the prominent speakers are Mrs. Herman H. Birney, of Philadelphia; Dr. Alkman, probation officer of Atlantic City, and Mrs. Murray, of Washington.

The Visiting British Squadron.

New York, Nov. 10.—Probably never before was this city so full of blue-jackets as now and in some parts of the city, particularly on the Bowery, they are as thick as mosquitoes on Staten Island. There are at present over 8000 bluejackets of the American and the British navy in this district and most of them are on shore leave during the visit of the British squadron. The most cordial relations are existing between the officers and men of the two navies and it is not an uncommon sight to see American and British sailors strolling through the streets arm in arm, talking in the sights and making determined efforts to impart a rosate hue to things in general.

New Donation to Trinity College.

New York, Nov. 10.—Within a few days the Ancient Order of Hibernians will confer upon Trinity college, the Roman Catholic university of Washington, D. C., the sum of \$10,000 to establish a chair for the higher education of women members of the order. This will be the second donation made by the Hibernians to the Catholic institution in Washington. The first was made about 12 years ago, when the Ancient Order of Hibernians established a chair for the propagation of the Irish language and literature at a cost of \$50,000. The donation about to be made will be the first ever made for the special benefit of women.

Hetty Green in Trouble.

Chicago, Ill., Nov. 10.—Both the health department of the city and the building department have condemned the old and dilapidated building known as the "house of blazes," which is the property of Mrs. Hetty Green of New York, who is considered the richest woman in America and also the most stingy. Suit has been brought against Mrs. Green and her agents to compel them to demolish the building, which is considered one of the most dangerous and unsanitary structures in the entire stockyards district.

Kentucky Equal Rights Association.

Newport, Ky., Nov. 10.—The annual state convention of the Kentucky Equal Rights association opened here today in the Spiritualists' temple on Overton street. Delegates from all parts of the state are in attendance, as well as a large number of visitors from other states. The principal figure of the convention is the Rev. Anna Shaw, of Providence, R. I., one of the most prominent advocates of woman's suffrage in the country. She will be the principal speaker at the meeting this evening.

Celebrating Luther's Birthday.

Fort Wayne, Ind., Nov. 10.—The Lutherans of this city are celebrating the anniversary of the birth of Martin Luther today by services in all Lutheran churches of the city and special exercises which will include all local congregations, at St. Paul's church. The program arranged for the special services includes devotional exercises, and an elaborate musical program, besides a special sermon by the pastor of St. Paul's.

Expenditures for the Canal.

Washington, D. C., Nov. 10.—The Isthmian Canal commission has issued an official statement of the receipts and expenditures under the appropriation of \$10,000,000 for canal construction. To this appropriation is added \$92,959 coming over from former appropriations. The statement is a summary of expenditures from June 28, 1902, to June 30, 1905. It shows a balance on that date of \$6,082,415; making the total expenditures to that date \$4,009,573.

FABULOUS WEALTH

POPOFF ISLAND BEACH RICH IN PLACERS.

Louis Herman Arrives at San Francisco With Marvellous Tales of the North—Panned Out Enough Nuggets From the Beach Sand to Make Him Rich—Has Located All Available Land Far Inland.

Like a modern Croesus, Louis Herman, a miner and hunter who has traversed the icy domain of the land the water front last night and as-tounded many an eager listener with his story of fabulous wealth that lies hidden on the beach of Popoff island, western Alaska, says a San Francisco correspondent.

Herman, according to his statements, has mined and hunted all over the vast Alaskan territory. He has visited many a mining camp in his day and seen the wealth being extracted from the bowels of the earth. But not until the spring of 1904 has he ever encountered such great wealth as was his fortune to locate in a district where no living soul ever dreamed there were the richest of diggings.

Herman is a man of intelligence and not given to wasting words in the tale he unfolds of his great discovery. He was very reticent regarding his experience on the Popoff beach and it took great urging before he would consent to narrate his story. In order to make it convincing, Herman produced a small bottle filled with pure gold dust which he said he secured on the Popoff beach with very small exertion.

Herman said he had been prospecting all along the coast for years and casually strolled along the beach of Popoff island one day when he noticed signs of gold on the beach. This at once started him looking further and in a short time he managed to pick up gold enough to make a tenderfoot miner think he was a real millionaire.

Herman kept his discovery to himself and continued prospecting. He panned and washed away and met with good success. He says his day's work averaged from \$15 to \$25 and that the gold was to be had in good quantities all along the beach. He finally got tired of the diggings there and wandered farther inland, where he says he made discoveries that will prove to be wealthy far beyond the placers of the Klondike.

The miner says he could not stake the beach claims, but he quickly took up all the available land along the shore, and this he expects will put him on an equal with J. P. Morgan. Nobody helped him in his work and he has no profits to share with any one, and all the claims are in his own name.

Herman avers that when he first made his discovery he went to a storekeeper in the vicinity named Scott and asked for a magnet. The shopman handed it out and did not even ask what Herman wanted it for. When it was returned the storekeeper simply took it and never went to the trouble of asking Herman what he had been doing on the beach. The people seem indifferent to the yellow metal.

According to Herman the gold on the surface of the beach is of high grade. He believes there is a greater wealth still in the quartz claims back of the beach. Herman thinks this will run enormously high, though he has not assayed it yet and therefore cannot determine its true value.

Judging from his manner and speech, Herman is a practical miner and a man who has had much experience in seeking the precious metal in the region of ice and snow. He says he roamed around Alaska for 20 years and during that time was out of the country only once, when he came here about five years ago. He claims to have been one of the first men on the famous Nome beach when gold was discovered there in 1901. He mined there for a while and then drifted away again, hunting and prospecting in various parts of the country. He says he will return to Popoff island in about a month to work on his claims.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in using its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by all druggists, 75c.

QUARANTINE CONFERENCE.

Also Discusses Southern Immigration Question. Chattanooga, Tenn., Nov. 10.—This is the second and closing day of the Southern Immigration and Quarantine conference, which is considered one of the most important gatherings ever held in the south.

The morning session today was devoted to a general discussion of the subjects of immigration and quarantine and was followed by an address on "Citizenship, Its Duties and Responsibilities," by Robert S. Fulton, chancellor of the University of Mississippi. While the general meeting was in session, the governors attending the conference held a separate meeting, in which several interesting addresses were delivered. Just before adjournment a number of committee reports were received.

You Cannot Buy Purer Whiskey

than HAYNER, no matter how much you pay or where you get it. We have been distilling whiskey for 39 years. We have one of the most modern and best equipped distilleries in the world. We know of nothing that would improve our product. Perfection in the distiller's art has been reached in HAYNER WHISKEY, which goes direct from our distillery to YOU, with all of its original purity, strength, richness and flavor. It doesn't pass through the hands of any dealer or middleman to adulterate. You thus save the dealers' big profits. You buy at the distiller's price, at first cost. Don't you see the economy in buying HAYNER WHISKEY, as well as the certainty of getting absolutely pure whiskey?

United States Senate, Washington, D. C. "I have used HAYNER WHISKEY for medicinal purposes in my family and have found it very satisfactory. I believe it to be a number-one medicinal whiskey." Thomas S. Martin, U. S. Senator from Virginia.

HAYNER WHISKEY

4 FULL \$4.00 EXPRESS QUARTS PREPAID

20 FULL \$15.20 FREIGHT QUARTS PREPAID

Send us the above amount and we will ship in a plain sealed case, with no marks to show contents. Try the whiskey, have your doctor test it—every bottle if you wish. If you don't find it all right, ship it back to us at OUR EXPENSE and your money will be promptly refunded. How could any offer be fairer? You save money by ordering 20 quarts by freight. If you can't use so much, get a friend to join you. You can have either Rye or Bourbon. Remember we pay the express or freight charges.

IRRIGATING WITH UNDERGROUND FLOW

Washington, Nov. 9.—Upon the adoption and applications of successful methods for utilizing the two great classes of ground-waters, which are found in the great plains, rests the prosperity and stability of an area of fertile and productive land greater in extent than several eastern states. Naturally, this vast region has possessed a peculiar fascination for geologists and water experts, and for many years investigations, more or less desultory in character, owing to lack of funds, have been conducted therein.

After the passage of the national irrigation act, and the formation of the reclamation service, these investigations were taken up in a more practical and thorough manner, and extended over greater areas. The underground waters of the great plains belong to two general classes, and are divided with reference to the geological character of the formations in which they are found.

The first of these is found in Dakota sandstone, and occurs under sufficient pressure to cause it to rise an appreciable distance above the level at which the drill meets it, thus forming artesian wells.

The other is known as underflow or sheet water, and is found in sands and gravels. Its occurrence is very general all over the great plains at various depths, and the problem of utilizing it for irrigation, if successfully solved, means the reclamation of extensive areas of wonderfully productive soil, which are today worthless for any purpose save the grazing of cattle and sheep.

The reclamation service has concluded a series of careful studies of the underflow of the Arkansas valley in western Kansas and has recommended the construction of a large pumping project, which will be supplied from a number of wells tapping this underflow.

The results of another interesting investigation conducted in the valley of the South Platte, in Nebraska and Colorado, will appear in the forthcoming annual report of the reclamation service. This investigation was begun the middle of July, 1905, and extended from Sterling, Col., to South Platte.

The work was in charge of Professor Charles S. Slichter and a corps of assistants. Its purpose was to determine what resources, if any, existed in the underflow water of that valley, and whether it was practicable to make use of such waters if they were found to exist in suitable quantities for irrigation. In the section investigated the valley varies in width from two to eight miles, and the river occupies a very sandy stretch from 1500 to 2500 feet in width.

Briefly summarized, the reconnaissance of the South Platte valley indicates that there is an ample supply of ground-water for the irrigation of suitable lands in the bottoms along the valley, but that it is impracticable in this section to divert any of the ground-water from the valley of the stream upon the high lands which border it.

There remains, however, a very considerable quantity of bottom lands in the valley of the river proper, of such

a quality and so situated as to be especially inviting for irrigation purposes. The entire valley is traversed by the main belt of an important railway system, and there seems no reason to doubt that it is capable of supporting a very considerable population if engaged in intensive farming on small irrigated tracts.

The quality of the gravels is especially favorable for the construction of wells of large capacity. Indications being that pumping plants can be very economically constructed, and proved profitable. At locations where the valley reaches a considerable width it would seem practicable to construct a central power station, and transmit power to numerous small pumping plants, located in the small holdings of irrigable land.

It would seem practicable at Sterling to secure such power from the large sugar factory, which has been built at the place. At other points in the valley these factories could be established, and the powerful and expensive engines utilized during the irrigation season to generate electricity which could be transmitted over a large section of the valley, adjacent to the factory to pump underground waters upon lands planted in sugar beets.

Under present conditions, during a large portion of the year, the engines in the factories remain idle. In fact, they are never in operation until after the irrigation season is closed.

One of the favorable conclusions from work in this valley is the fact that private capital can probably develop the water resources existing, without the necessity of constructing large plants, requiring large capital or government aid. The situation seems to call for numerous small pumping plants rather than for a single large plant. The discovery that water in the valley of Birdwood creek has a considerable artesian head may prove of great value to lands near North Platte, as the lands near Birdwood creek with the exception of a very narrow strip in the valley, consists of sand hills of little value for agricultural purposes.

By the construction of numerous 12-inch wells, about 100 feet deep, along the west fork of Birdwood creek, the low stage flow of the stream could be nearly doubled, and the water taken from the creek near its mouth and placed upon lands in the valley of the Platte river. Good lands in the valley of the South Platte are in large part still lying idle, and the immigration of people able to make the best use of the present water resources is very much desired.

A Disastrous Calamity.

It is a disastrous calamity, when you lose your health, because indigestion and constipation have scaped it away. Prompt relief can be had in Dr. King's New Life Pills. They build up your digestive organs, and cure headache, dizziness, colic, constipation, etc. Guaranteed at Tallman & Co., and Brock & McComas' drug stores; 25c.

FOR WOMEN

of all ages there is no safer or more reliable remedy than the Bitters. It has been used by women all over the world for over 50 years and hundreds of them have testified to its goodness. If you suffer from any ailment peculiar to your sex get
