AMONG THE EXCHANGES OF THE INLAND EMPIRE

New Irrigation Project.

What is to be an irrigation project of no mean proportions is about to materialize by the utilization of the Palouse falls to develop power for pumping stations along the orchard lands of the Snake river.

By the utilization of the Palouse falls thousands of acres which are now lying in an unproductive state along the Snake river between Lewiston and Wallula can be placed under irrigation at a much less cost than any of the present means in use. The falls are admirably situated for the purpose to which they are to be put, being only four miles from the confluence of the Snake and Palouse rivers which is about 10 miles below Riparia, and occupying a central position to a large arid area up and down the river. The cataract is 198 feet high and the volume of water is sufficient to develop almost unlimited power.

The intention is to place an electric power plant at the falls and establish a high electric line over which power will be transmitted to numerous pumping stations established along the river. The plan apparently is very feasible and should it be brought to a successful termination will transform many of the non-productive bars into a highly fertile state.—Lewiston Tribune.

Grant's Delinquent Taxes.

Quite a neat sum was realized last week through the payment of delinquent taxes at the sheriff's office, the close of the week finding the sum of $376.80 in the hands of the officer ready to be turned into the treasury of the county. The principal part of this sum came from the Eastern Oregon Land company, being taxes on land recently patented to that company.

The sum paid to the county treasurer was composed of the following items: County fund, $566.35; school fund, $120.72; bridge fund, $10.93; road fund, $32.94; penalty, $74.21; interest, $60.19; school district No. 1, $8.80; No. 2, 75 cents; No. 4, $1.65; No. 8, 26 cents.—Blue Mountain Eagle.

Anti-Trading Stamp Ordinance.

The ordinance passed by the city council at the last meeting will become a law after its publication in the official newspaper of the city without Mayor Fechter's signature. Thursday was the last day of grace for that official to attach his signature to the ordinance, but he let it become a law without such action. Mayor Fechter is opposed to such an ordinance, but he did not feel like making a veto his last official act.

The ordinance compels every business house in the city using trading stamps to pay a license of $500 a year. It also provides for licensing every person soliciting business at private residences. The last license will cost $200.—Yakima Daily Republic.

No Second Daily at The Dalles.

After all The Dalles is not to have another newspaper, the project having died a-bornin'. The idea of the incorporators was to start a weekly paper about the first of the year and in a short time to make of it a daily.

After looking over the situation the projectors determined that the field was well covered by the Chronicle and that another daily would be but a luxury to the people. Mr. Bohan will therefore continue his job printing office with which H. S. Swenson, another of the incorporators, is connected, and E. H. Brown has decided to locate at Echo.—The Dalles Chronicle.

Apple Growers' Union.

The Apple Growers' Union announces that it will keep open door the year round. This is a very wise step and places them in a position to keep in touch with both the grower and the market. They will arrange to furnish members of the union and others with all the necessary spraying materials and other things pertaining to the fruit business. It is up to the members to make all their wants and wishes known so they can be met by Manager F. H. Shepard. This will be an easy matter now, that there will always be found some one in the office to meet the members.—Hood River News-Letter.

Will Look Into Water Power.

H. H. Andrews of Nebraska, accompanied by an engineer of national prominence, arrived in Baker City yesterday and at once went to Eagle creek, where they will examine and report on the condition of the power of that stream. Mr. Andrews in the past has done much work there and it seems will be associated with the new company recently incorporated by J. K. Romig to develop that water power and throw electric power and light all over the community.—Baker City Democrat.

HAWAIIAN ISLANDS

MID-OCEAN EMPIRE OF THE UNITED STATES.

Area Is But 6640 Miles, But it Yields an Enormous Revenue to the Government—Total Indebtedness of the Territory Is Now $2,185,000—Population of 155,000 People—Assessed Valuation $123,898,504.

The secretary of the interior in his recent report, says of Hawaii.

Hawaii, though small, being composed of but eight principal islands, with an area of 6640 square miles, contains natural phenomena and physical aspects that make it wonderful. Probably in no similar area of the world are such contrasts of nature or such wide extremes to be found in close proximity.

Snow-clad mountains within a short distance of a warm seashore, which arrests the sparkling waves of tropical seas; a volcano which for centuries has constantly manufactured raw material, the disintegration of which supplies the rich and fertile soil of the island; a land where the pine tree is found beside the palm; broad fields, rugged mountains, high cliffs surrounded by the sea, all embrace a country literally the meeting point between the occident and the orient, with a population including representatives of the different tribes or races of mankind.

The greatest change of the year has been brought about through the passage by the last legislature of a county act, by which there has been a subdivision of various functions of the government through the establishment of a county system. The territory is divided into five counties, but the powers granted are not so wide or so complete as those usually existing on the mainland. The measure, in a way, was experimental, not carrying with it the power of taxation, so that for the present the situation is unique in that the work undertaken by these counties is provided for by allotment of what has heretofore been territorial income.

The territory's finances are in excellent condition, and the great reduction made in expenditures during the special session of the legislature in 1904 is now being appreciated.

The fiscal year ended June 30, 1905, shows a most favorable balance, and for the second time since annexation the expenditures have been kept within the income. Another very important change is that the tendency that had developed of overdrawing or exceeding appropriations made by the legislature has been checked; this, it is stated, is due to good judgment displayed by the legislature and better methods adopted by heads of departments.

The assessed value of taxable property on January 1, 1904, was $123,898,504, divided as follows: Real estate, $63,816,579; personal property, $60,081,525, while the assessable value of the property on January 1, 1905, was, real estate, $67,509,036, personal property, $56,419,004, aggregating $123,924,100, showing an increase over the previous year of $10,025,596.

The total revenues of the territory, including a cash balance on July 1, 1904, of $56,613.29, aggregated $2,411,426.31 on the 30th of June, 1905. The total disbursements during that period amounted to $2,988,057, leaving a net current indebtedness July 1, 1905, of $576,630.79.

During the 12 months covered by the report it is stated that the current receipts of the territory have exceeded the obligations incurred during that period by $86,849.91 and, figuring on a conservative basis that the floating indebtedness of $576,630.79 outstanding at the close of the above mentioned period will all be paid during the present year, it is believed that on June 30, 1906, there will be a cash balance in the treasury.

In this connection, the government states, it is but just to Hawaii to point out that since annexation the contributions made by this territory to the federal government from customs revenues alone have amounted to $6,059,171.51. This is more than half as much again as the entire debt of the republic of Hawaii which the United States assumed at that time.

Considering that the area of the territory is only 6640 square miles, occupied by 155,000 people, it is difficult to realize how Hawaii has been able to stand such a strain upon its resources. Under these circumstances the people urge their claims for liberal appropriations for public buildings, improvement of harbors, and for lighthouses as being just. Any improvements requested in the interest of harbors and lighthouses are for the islands, which are becoming more and more an important factor in the growing development of trans-Pacific trade.

The bonded indebtedness of the territory on June 30, 1904, was $2,185,000. During the past year this was further increased by the sale of 1000 4 1-2 per cent $1000 bonds.

A Grim Tragedy

Is daily enacted, in thousands of homes, as Death claims, in each one, another victim of Consumption or Pneumonia. But when Coughs and Colds are properly treated, the tragedy is averted. F. G. Huntley, of Oaklandon, Ind., writes: "My wife had the consumption, and three doctors gave her up. Finally she took Dr. King's New Discovery for Consumption, Coughs and Colds, which cured her, and today she is well and strong." It kills the germs of all diseases. One dose relieves. Guaranteed at 50c and $1.00, by Tallman & Co. and Brock & McComas Co., druggists. Trial bottle free.

Notice is hereby given that my wife, Lillian E. Carnes, having left my bed and board without cause or provocation, I will not be responsible for any debts hereafter contracted by her.

Dated December 28, 1905.

GEORGE E. CARNES.

Spoiled Her Beauty.

Harriet Howard, of West Thirty-fourth street, New York, at one time had her beauty spoiled with skin trouble. She writes: "I had Salt Rheum or Eczema for years, but nothing would cure it, until I used Bucklen's Arnica Salve." A quick and sure healer for cuts, burns and sores; 25c at Tallman & Co.'s and Brock & McComas Co.'s drug stores.
