2350 MILES TO MAKE A RESCUE

THREE HUNDRED MEN ARE IMPRISONED TWO YEARS.

Hudson Bay Factor and Party Will Take Medicines and Other Badly Needed Supplies to the Whalers Who Are Marooned on Herschel Island, 250 Miles North of the Arctic Circle—Scurvy and Starvation Beset Them.

Winnipeg, Manitoba, May 19.—Chief Factor Anderson of the Hudson Bay posts, Mackenzie River district, left this evening on a long journey to the Arctic circle. The interesting part of his mission is the conveyance to imprisoned whalers whose homes are in San Francisco of the news of the terrible catastrophe which befell San Francisco. These men are 300 in number, and are in six whaling steamers. They have been there two years, imprisoned in the ice, unable to get through the passage owing to the severity of the seasons.

The Canadian mounted police from Dawson City, on their annual trip last summer, visited the imprisoned men. Since then no news from the outside world has reached them, and it is not known what epidemics have struck them, as at the time of the police visit scurvy was threatened. Chief Factor Anderson has taken up six complete files of local newspapers containing a running account of the terrible visitation.

From Edmonton he goes 2100 miles by canoe and portage to Fort Peel, on the Mackenzie river. From there it is 250 miles within the Arctic circle to Herschel island. From there Eskimos and Catholic missionaries will be employed to take the welcome newspapers and medical supplies. With Anderson goes Steffasen, a Cambridge, Mass., physician to the polar party, which goes in by the Pacific coast to join him at the mouth of the Mackenzie river. Anderson will not reach his destination until August.

STRAWBERRY PEST.

Prof. Cordley Writes Concerning Pest That Threatens Plants.

Howard Evans, county fruit inspector, has just received the following letter from Prof. Cordley, entomologist of the state agricultural college at Corvallis, regarding a strawberry pest which is now threatening the strawberry industry of Oregon.

The letter is explanatory and is as follows:

Corvallis, Ore., May 15, 1906.

Mr Howard Evans, Fruit Inspector, Freewater, Ore.

Dear Sir:—The large grub which accompanied your letter of the 10th inst, is the larva of the strawberry root borer, Sesia rutlands. This is our most serious strawberry pest. It annually destroys thousands upon thousands of plants in the western portion of the state. This is the first record I have of its appearance in the extreme eastern portion of the state.

There is no satisfactory remedy for it other than to dig up and burn all infected plants with the idea of preventing the moths from issuing. The moths from these grubs will issue in May, June and July and deposit eggs upon other plants, hence any destruction of old plants should be done at once. In badly infested plantations practically nothing can be done but to plow up the entire patch, and in fact the most practical way to control this, as well as the other pest which you send, is to practice frequent rotation of crops.

The smaller grubs are apparently those of the strawberry root worm, Otiorhynchus ovatus. It is a European species which was introduced into the United States many years ago, but which has attracted very little attention as a pest of economic importance. Some two or three years ago it appeared in this state in the vicinity of Mt. Tabor, where it has continued to spread and does serious injury to strawberry plantations. No methods of checking its ravages are known other than rotation of crops.

Very truly yours,
A. B. CORDLEY.

WALLOWA COUNTY'S NEW TOWN.

Is at the Junction of the Wallowa and the Minam.

City Engineer L. A. Pickler arrived home Saturday evening from Wallowa bridge, where he was engaged a week in surveying a new townsite, says the La Grande Chronicle. M. W. Lasley accompanied Mr. Pickler as assistant.

The site includes about all the level ground on the west side of Wallowa river between the bridge and the junction of the Minam. Altogether there are 54 lots, and the main streets run north and south, practically parallel with the river. The lots are 50 feet in width, but vary some in length. This tract belongs to Attorney Edwin Snow of Boise.

Just across the river the railroad company will establish a depot, and it is expected that this place will assume some importance a a shipping point, as it will be the nearest railway station for farming districts on each side of the Wallowa river. An extensive lumber output will also contribute to the railroad traffic. It is believed in some quarters that in case the grade is not completed to Joseph before the winter season, this will probably be the terminal of the branch until next year.

DEATH OF EXPLORER PIKE.

Noted Explorer Killed on Strawberry Mountain.

D. H. Dimmick of Granite, was acquainted with Lieutenant Pike, and gives this account of his death, the circumstances of which he is quite familiar with, says the Granite Gem.

"Lieutenant Pike was stationed with the government troops at Camp Logan, in the summer of 1866. Camp Logan is on Strawberry mountain, near the head of Strawberry creek, south of Prairie City.

"The day of his death he had been out with a scouting party after Indians, and it was upon his return to Camp Logan that the fatal shot was fired, and it was from his own revolver. He was dismounting from his horse when his revolver was accidentally discharged causing his death. The body was buried at Camp Logan, where it remained until taken up to be moved to Walla Walla.

"This occurred in the summer of 1866. There are a number of other circumstances that could be mentioned to prove this, if necessary."

It is possible to obtain relief from chronic indigestion and dyspepsia by the use of KODOL FOR DYSPEPSIA. Some of the most hopeless cases of long standing have yielded to it. It enables you to digest the food you eat and exercises a corrective influence, building up the efficiency of the digestive organs. The stomach is the boiler wherein the steam is made that keeps up your vitality, health and strength. Kodol digests what you eat. Makes the stomach sweet—puts the boiler in condition to do the work nature demands of it—gives you relief from digestive disorders, and puts you in shape to do your best and feel your best. Sold by Tallman & Co.

WYOMING WOOL PRICES. ...

Sales Start Off at Prices Ranging From 21⅝ to 22⅞.

The following from Wyoming shows how wool sales are starting off in that state this spring:

Representatives of Boston and Philadelphia wool houses met at Cheyenne last week with the woolgrowers in the first attempt to make deals for the southern Wyoming wool clip. Bids ranged from 21⅝ to 22⅞. Many bids were accepted. The bids are considered as probably fixing the market price of Wyoming wool for this season.

Rawlins, Wyo., May 19.—No wool sales have been made here except by the Jack Creek company at 22⅝.

He Had 40,000 Stolen Stamps.

Harry Stewart, ex-convict and possessor of many aliases, companion of "Iowa Blackie," was convicted in the United States district court at St. Loius Monday on a charge of "bringing stolen government property into the eastern district of Missouri." Stewart was arrested with a bundle of 40,000 postage stamps in his possession following the robbery of the Shelbyville, Mo., postoffice in December. The authorities say Stewart and "Iowa Blackie" committed the robbery.

Fined for Not Tying Teams.

Judge Doust fined a man Wednesday for leaving his team united on the streets. The judge says that he will fine any one who is brought before him on a complaint of this kind. "The runaways, which are so frequent in this city, is due to the carelessness of the dricers," said the judge, "and the only way to remedy the situation is to bring 'em into court and assess a fine against those guilty of the practice."—Yakima Republic.

Hot Summer Predicted.

Hot weather is coming, and coming soon enough, say some of the old-time Indians who have lived in this country for generations.

This summer will be one of the warmest ever known if the predictions of some of the Indians prove true. It is said that whenever the Yakima valley experiences a cold snap in the middle of May the heat of July and August is almost unbearable.—Yakima Republic.

The Cause of Many Sudden Deaths.

There is a disease prevailing in this country most dangerous because so deceptive. Many sudden deaths are caused by it—heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, causing catarrh of the bladder, or the kidneys themselves break down and waste away cell by cell.

Bladder troubles almost always result from a derangement of the kidneys and a cure is obtained quickest by a proper treatment of the kidneys. If you are feeling badly you can make no mistake by taking Dr. Kilmer's **Swamp-Root,** the great kidney, liver and bladder remedy.

It corrects inability to hold urine and scalding pain in passing it, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases.

Swamp-Root is pleasant to take and is sold by all druggists in fifty-cent and one-dollar size bottles. You may have a sample bottle of this wonderful new discovery and a book that tells all about it, both sent free by mail. Address, Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

Some Interesting Figures

In the operation of HEADERS and THRESHERS 7 men and 15 horses will cut from 20 to 25 acres per day, and then the work is but half completed.

The THRESHING BILL with a 30-bushel crop will average $1.80 per ACRE.

The WASTE in HEADING and REHANDLING from Header Box to Stack, from Stack to Separator, and finally that left in the STACK BOTTOM, is enormous. It is safely estimated from THREE to FIVE BUSHELS PER ACRE by the most conservative farmers.

See This Comparison and See What We Can Save You Each Year

COMPARATIVE COST of operating Header and Thresher and HOLT BROS.' Combined Harvester on 500 acres of land:

HEADER AND THRESHER

7 men wages	$14.00
7 men, board	3.50
15 horses, hire	7.50
15 horses, feed	3.75
Cost to Head 25 acres	$28.75
Cost to H ad 1 acre	1.15
Cost to Thresh 1 acre, 30 bushels at 6 cent	1.80
Cost to Head and Thresh 1 acre	$2.95

HOLT COMBINED HARVESTER

4 men, wages	$11.00
4 men, board	2.00
20 horses, hire	10.00
20 horses, feed	5.00
Cost to Harvest 25 acres with a HOLT BROS. COMBINED HARVESTER	$28.00
Cost to Harvest 1 acre	$ 1.12
Saving per acre with Combined Harvester	1.83
Saving on 500 acres with Combined Harcester at $1.83	$15.00
Saving 3 bushels Grain per acre on 500 acres at 60 cents (1.80 per acre)	900.00
Grand total saved one season on 500-acre crop	$1,815.00

These are facts we have proved scores of times, and we can refer you directly to the FARMERS who have saved the PRICE of THEIR MACHINE IN ONE YEAR. WRITE US FOR THEIR NAMES, and DO IT NOW.
