LIBEL SUIT IN PAPER'S FAVOR.

Complainant Against Spokesman-Review Loses His Claim for Damages.

The Spokane Spokesman-Review has won in a suit for damages for libel instituted against it by M. H. Whitehouse, a Spokane pioneer, says a Tacoma item.

The suit was based on an article appearing in the newspaper July 14, 1904, relating that Mr. Whitehouse had obtained a license to wed Clara S. Reed, but that something had arisen to prevent the marriage. The newspaper made a mystery out of the situation and gave the article considerable prominence.

The action was dismissed in the lower court and the supreme court affirms this judgment. One cause of action was dismissed on the ground that the article contained nothing libelous.

More Expert Handwriting.

The feat of writing 6431 words on a postal card with a pen and ink, performed by James W. Bowers of this city, as told in the East Oregonian last evening, has brought out another handwriting expert of even greater skill than that of Mr. Bowers. Mrs. J. L. Carroll of this city, is in possession of a booklet giving illustrations of the handwriting feats of an old schoolmate, Mrs. Lillie E. Taylor of Des Moines, Iowa. According to this booklet Mrs. Taylor wrote 10,538 words on a postal card and 420 words on a nickel, or five-cent piece in 1897. Mrs. Carroll highly prizes the work of her friend and feels that it is unequaled in this class of art.

PRAISES FIGHT ON BUGS.

Spokane Man Says W. S. C. Has Done Good Work in g Exterminating Pests.

The most successful work in destroying the two great dangers to the fruit industry, the San Jose scale and the codling moth, in the United States has been done by the Washington State college. This statement, which contains a high compliment to the efficiency of the department of horticulture of the Washington State college, was made by C. L. Smith of Spokane in a talk to the business men of the United States, were not only fruit trees but shade and ornamental trees have been killed by the scale, and the apple crop ruined entirely by the codling moth. He assured the fruitgrowers that Washington is fortunate in this respect.

Mr. Smith declared that the fruit crop of the inland empire, where the instructions issued by the college in pamphlet or bulletin form have been followed, is more free from worms than any section of the United States and the result has been that Washington apples are getting a fine reputation in the markets of the world.

Will Use Thousands of Boxes.

J. L. Taylor of Delta, Colo., has been in La Grande the past few days looking up the prospects here for the fruit box supply for his section of the country for the coming year, says the La Grande Star. Mr. Taylor is a representative of the fruit growers' associations of Delta and Grand Junction, two of the largest organizations of the kind in western Colorado. His people estimate that they will require for the orchardists and canneries between 90 and 100 carloads of box material for the coming season.

His trip through the west is to see where an order for this large quantity of boxes can be secured. He has been in conference with the local mills for the purpose of securing estimates, prices and other details in regard to the placing and filling of an order for the material required.

Administrator Appointed.

T. B. Wells has been appointed administrator of the estate of the late James H. Wells.

We will know that spring is approaching just as soon as some one tells us that the peach crop is ruined.

BIG RUSH TO RAWHIDE.

Miners Flocking Into New Gold Field in Vag Numbers.

Reno, Nev., Mar. 4.—Rawhide, the new bonanza mining camp, has today a population of 8000 and is growing.

Over 50 automobiles are now working night and day taking prospectors into the camp and freight teams are streaming along the roads from Fallon and Schurz to Rawhide, loaded with lumber and building materials and provisions.

The eastern contingent is now beginning to arrive from New York and Philadelphia, having journeyed here to represent mining magnates in the new field. Denver and Colorado operators have been in the field for a week or more and some have leases working already.

By actual count there are 150 substantial wooden buildings and 2700 tents in use for dwellings and business purposes. Fully 200 more wooden structures are in course of construction.

The excitement over Rawhide has grown to such magnitude during the past week that the movements to the new camp in the northern end of the Esmeralda county now transcends any rush in the history of gold mining in the west, not even excepting the spectacular stampede to the Klondike.

Goldfield, Tonopah, Bullfrog and all other southern Nevada mining camps are being almost depopulated by frenzied gold-seekers who are leaving for Rawhide.

What makes the camp a certainty is that the signs of permanency are manifest.

On the west side of the camp sulphide rock has been found. This is on the Blakesley lease. The rich ore on Balloon Hill is in rhyolite. A streak of telluride of silver has been found in the Tiger and Royal.

The airship traction on Balloon Hill between the Murray and Kearns lease, has struck what is believed to be the contact vein. Every mining man will know what that means.

The placers, of which much has been said, are situated five miles north of the main part of Rawhide, and are proving very rich.

A mill will be ready in three weeks. Work on its construction is going on now. When it is completed the camp is to go on a payroll basis.

Mrs. Selkirk Norton, Teacher of Voice

Is open for engagements for concerts, oratorios, teas, receptions, club, public and social functions. For terms apply at studio, Room 10, Schmidt building.

Stephane Lauzanne, editor in chief of Le Matin, Paris, has arrived in New York. He will remain in this country four months, studying newspapers, American life and American politics.

SENSIBLE HOBBY.

Well-Known People Devote Spare Time to Upholding Health.

There is no excuse today for any person, unless tainted with an incurable disease, remaining sickly, with the great advance in medical discoveries and the growing popularity of physical culture.

In the diseases of digestion and nutrition, for example, an acknowledged specific treatment has been found in Mi-o-na. It is relied upon as a certainty in relieving the worst troubles of digestion and assimilation, and making a complete cure.

People suffering with headaches, palpitation, sleeplessness, bad taste in the mouth, coated tongue, distress after eating, specks before the eyes, nervousness and general debility, and any other of the many distressing results of a weakened stomach, should profit by the discovery of Mi-o-na stomach tablets.

Tallman and company have seen so many cures by Mi-o-na of stomach and general rundown state of health that they are firm believers in the power of this remedy to cure practically every case and they show this faith by giving a guarantee with every 50-cent box of Mi-o-na to refund the money unless it does all that is claimed for it. They take the whole risk, and Mi-o-na will not cost you a penny unless it cures.

FREE LECTURE TONIGHT

Should This Couple Marry? Could They Agree?

"Love in Dead Earnest" and be Happy Together Throug Life.

Or would the intimacy of marriage reveal opposing tastes and aspirations, likes or dislikes that would render domestic felicity impossible.

Don't Fail to Hear

Mrs. Jean Morris Ellis

At the Christian Church, Thursday Night, in her celebrated lecture on

MATRIMONY

as it is and as it should be.

No sensational silliness, but practical common sense.

Mrs. Ellis will explain how to tell the signs of love in the head and face, how to tell a flirt, a jealous minded or a real loving, motherly person; will explain courtships wrong and right, and how to manage your mother-in-law. Couples paired on the stage at close of lecture—match-making scientific, amusing, but not binding.

ADMISSION 25 CENTS.

Phrenological Examinations given daily in the Christian church parlors from 1 to 6 p. m.

New Horticultural Insurance.

T. L. Dunsmore, formerly of this city but now of The Dalles, and John Pemberton, president of the Horticultural Fire Relief association, a new insurance association recently

started in Salem, are in the city this week in the interests of the new company. The new company makes a specialty of insuring horticultural products and it is possible that a local agency will be established here.
