

MOTHER BELIEVES IN PERUNA.

Mrs. K. Kane, of Chicago, Uses Pe-ru-na in her family of five children, Grace, Myrtle, Edward, Reeves and George.

GRACE

Pe-ru-na in the Home.
After all, experience is the best teacher. Some doctors may write in favor of Peruna. Other doctors may write against it. But it is the testimony of the mothers and fathers who are rearing families, who love their children, who must economize as to doctor bills, who are raising little boys and girls into men and women of the future, it is the testimony of such people that really counts.

There is no way to positively ascertain how many families in the United States rely upon Peruna for the many climatic ailments to which the family is subject. The number must be a great one. Several millions perhaps. They have learned how to use Peruna for ordinary ailments, and in that way are guarding their homes against more serious diseases.

Such ailments as coughs and colds, sore throat and catarrh, croup and colic, indigestion and loss of appetite, anemia and nervousness, all these ailments are promptly relieved by a few doses of Peruna at the right time.

Millions of provident mothers and fathers are guarding the interests of the home by using Dr. Hartman's great remedy, and priding by his medical booklets and personal advice.

MYRTLE

Catarrhal Croup.
Few people realize how frequently croup is caused by catarrhal congestion of the throat. Probably nine cases out of ten of croup is of the catarrhal variety. The medical profession recognizes three forms of croup. The spasmodic variety, membranous croup and catarrhal croup. Nearly every case is of the catarrhal variety, and a few doses of Peruna taken at the first appearance of the catarrhal symptoms is generally sufficient to avert the attack of croup altogether. Croup is a frightful disease. No disease of children so alarms the household.

EDWARD

REEVES GEORGE A HEALTHY FAMILY

Kept the Children Well.

Mrs. K. Kane, 196 Sebor St., Flat 1, Chicago, Ill., writes: "Peruna has been used so long in our family that I do not know how I could get along without it. I have given it to all of my five children at different times when they suffered with croup, colds and the many ailments that children are subject to, and am pleased to say that it has kept them in splendid health. I have also used it for a catarrhal difficulty of long standing, and it cured me in a short time, so I have every reason to praise Peruna."

It is impossible to estimate how many homes have been protected against croup by the proper use of Peruna.

Household Remedies.

There is no remedy in the world which has proven so popular for catarrh as Peruna. It has been used for more than thirty years and cured thousands of cases, as proven by our testimonials. In the early history of this country every family had its home-made medicines. Herb teas, bitters, laxatives and tonics were to be found in almost every house, compounded by the housewife,

sometimes assisted by the apothecary or the family doctor.

Furnishing medical compounds direct to the people, through the druggists, is simply the extension of the practice begun by the people themselves.

Nervous System a Wreck.

John G. Hirdler, Garfield, Kas., writes: "On December 2, 1896, I was injured by a fall on the Santa Fe R. R., and my entire nervous system was impaired by the same. The help of a physician was useless. I believe I tried every one in the vicinity, but all were alike and I

FATHER AND CHILD.

MR. J. M. STANSBERRY AND DAUGHTER

Catarrh of Stomach.

Mr. John M. Stansberry, Amarillo, Tex., writes: "For several years I had catarrh of the stomach. I was hardly able to do anything, and could not eat with any satisfaction. When I commenced using Peruna, I weighed only 110 pounds. I took six bottles, commencing in the spring, and by the following winter I had gained 63 pounds. I owe it all to Peruna. It cannot be praised too highly. I am forty-five years old, and my occupation is that of architect and builder."

remained without strength.

"I then tried Peruna, and after using it for three months was totally well. I am seventy-one years old, and my work on the railroad is hard and tedious, but I can work like a young man in all kinds of weather, heat, cold, rain, snow or storm alike.

"Peruna is the purest and best medicine, and if used according to directions, it will help any person and cure any disease for which it is recommended. I recommend this medicine by my own experience to any one suffering from an ailment on the order of mine."

For Himself and Children.

Mrs. Aline DePasse, 778 E. 165th St., New York, N. Y., writes: "It gives me pleasure to testify to the curative qualities of Peruna and Manalin."

"I was afflicted for over seven years with catarrh of the head, throat and digestive organs. I consulted many physicians, but they did me no good.

"One day I happened to read some testimonials in your Peruna almanac. I decided to try Peruna and Manalin. I bought a bottle of each and after taking them for a week, I noticed a change for the better. So I kept it up and after using twelve bottles I was perfectly cured.

"I also gave the medicine to my children and they had the same beneficial result. I would never be without these remedies in the house."

"I highly recommend Peruna and Manalin to all my friends, and, in fact, to everybody."

Thousands of families have learned to trust and believe in Dr. Hartman's judgment, and to rely on his remedy, Peruna.

The night has a thousand eyes,
And the day but one;
Yet the light of the bright world
Dies
With the dying sun.
The mind has a thousand eyes,
And the heart but one;
Yet the light of a whole life
Dies
When love is done.
—Francis W. Bourdillon.

WHEAT.

Umatilla county is now arrayed in her gorgeous emerald gown, the shimmering emerald of her miles of wheat.

Wheat, the queen of the soil, in whose meek smile are hidden untold fortunes. How sweetly it smiles in the spring sunlight, how gracefully it waves before the caress of the zephyr!

Modestly it spreads over the fields, multiplying and gathering strength and color. One kernel bursts into half a hundred stems, each stem bearing a hundred other kernels, and thus with prolific productivity it yields a thousand fold to the husbandman.

Wheat, wheat, on every hand. Ride through the wheat belt and look east, west, north and south. Miles of wheat, green, shimmering, beautiful, lifting its head higher and higher to greet the beckoning sunshine and sending its roots deeper and deeper

to greet the inviting moisture and soil forces below.

No picture is more beautiful, unless it be the same vast fields white in harvest.

It is Umatilla's bridal gown, the richest ever worn by queenly woman. Verdant, rich, beautiful wheat.

AN OREGON MODEL.

The new state of Oklahoma is modeled after Oregon in many ways and even surpasses Oregon in a number of features. Her banking law, for instance, in which every state bank contributes to a fund which is kept in reserve to guarantee deposits, has brought her millions of dollars in deposits from adjoining states.

On Thursday, May 7, the people of Oklahoma will vote upon three proposed amendments to the federal constitution, to-wit: Popular election of United States senators, authorization of an income tax and an employer's liability law.

There is every reason to believe that the people of the new state will adopt every one of the measures, requesting congress to enact such legislation.

Oklahoma has the spirit of progress and has taken advanced ground on every subject. Her state constitution is a model charter of liberty for the people of a commonwealth and she has rebuked many older states by her courageous defiance of trusts, corruption and skulduggery.

IS OREGON FOR TAFT?

Because the republican state central committee advocated the nomination of Taft for the presidency, is no sign that all the republicans of the state are for him. The Fulton following may be for Taft, but the Fulton following is not the strongest following in the state by long odds, as was shown by the recent primary election.

The people of Oregon are for Roosevelt, if a ballot could be taken showing the actual sentiment of the state. If Roosevelt would not become a candidate, it is honestly believed that Oregon's next choice would be La Follette.

Outside of a few leaders in Oregon, the state has never "warmed up" to Taft. He does not fill the popular measure of a president to succeed Roosevelt.

The country is making unprecedented progress under the Roosevelt administration, and Oregon would con-

tinue this progress by having either Roosevelt or a man like him in the presidential chair for another term. Taft is not like Roosevelt. He has but little initiative and less energy. Because he wants to be president is no reason that he should be.

ON A HIGH BUSINESS PLANE.

Speaking of business, it is picking up its raveled ends and readjusting itself to the new condition, says Goodwin's Weekly. The nation had on too much momentum a year ago; business, the piebald, if he had money and there was a bad wreck, and when the signals of the disaster were wired to the land there was a general putting on of the brakes.

The country is recovering, but there is a change. It goes deeper than business. The rich men had their way until the impression came about that, after all, nothing counted but money. News jumped the track, so to speak, enough, had the say over the finest patriots, and character, high lineage, divine accomplishments, or unsullied name counted for nothing against money, no matter how coarse and vulgar its presentations. But that predatory wealth which has been ruling the land for 20 years, has had a setback. When the wealth was swept away it was found that nothing was left, and the nation has recoiled before the emptiness which the panic and depression revealed.

And when one corporation after another was called up and analyzed, and the people realized how coarse and vulgar were the underlying impulses which controlled so many who were held to be impregnable in their positions, there was a still and pronounced recoil from them.

The country will recover, all right, but many of the ancient methods will be rejected. About the time of Lord Hastings and Lord Clive, England was corrupt to the core, but she had the strength to reform herself. So will our own country.

Corporations and men will decide pretty soon that it is better to never run counter to the laws, and out of the present trouble a more satisfactory idea of what should govern than has been realized for years, will govern.

PENDLETON HEADQUARTERS.

Tom Richardson tried to make the people of this city believe that Pendleton abroad, is not identified with the irrigation movement, that people look upon this city as the wheat cen-

ter, but that irrigation and Pendleton are not associated together in the public mind.

If this statement has prevailed to any extent heretofore, it should be dispelled now. Every irrigation project in the west end of the county has an office in Pendleton and this is the active sales headquarters for all of them.

The projects represented in this city comprise about 50,000 acres of rich arid and semi-arid land and every company now represented here is advertising Pendleton as the headquarters for irrigated land. It seems that the fact that Pendleton is the center and headquarters of the great irrigation belt in the west is now thoroughly advertised and widely known.

The Columbia Land company, handling the Furnish-Coe lands, has fitted up fine offices here and is conducting an active publicity campaign and is selling land every day. The Umatilla Ranch company maintains offices here and is doing a good business with Pendleton as headquarters. The land under the government irrigation project is represented in this city and now the Hinkle Ditch company will establish offices here, and place its land upon the market through the Pendleton agency.

This does not look as though Pendleton is a stranger to irrigation. With 50,000 to 60,000 acres of the finest irrigated land in the north-west on sale in Pendleton offices, and with Pendleton advertised far and wide as the center of these projects, it seems that this city occupies a well fixed position in the public mind as an irrigation center.

The lands represented in the offices maintained here are valued at more than \$5,000,000, and will support 20,000 people.

ONE LESSON FOR ALDRICH.

The house and the senate, after trying to force on the business interests of the country a piece of shiftless currency legislation, is now completely at sea on the currency problem. The would-be financial Moses of the nation, Senator Aldrich, has found his bill almost universally repudiated.

Aldrich and Cannon, after their announcement that it would be the Aldrich bill or nothing, have been taught that the people's servants must, at times, be servants indeed, and not the masters.

Aldrich forced his measure through the senate, but the opposition of the

people to his bill made itself felt in the house, and he has been forced to admit that the people's representatives are not mere ratifying machines.

A POWERFUL DREDGER.

Consul John L. Griffiths sends from Liverpool the following description of an improved dredging machine being built for operation in that harbor:

It is claimed by leading English experts that the dredging since 1890 of the River Mersey and its approaches has been one of the most continuously successful undertakings of that character in the history of marine engineering. As the port of Liverpool is used by vessels of the deepest draft it is very important that the entrance channels at the bar and approaches to the docks and the landing stage where the ocean liners embark and disembark their passengers should be maintained at all stages of the tide.

The Mersey docks and harbor board for the purpose of overcoming the sand accumulation in 1890 instituted suction dredging, which has been so satisfactory that the board has since then largely increased the size and powers of their dredgers, and recently has given an order for the construction of a dredger which will be the largest and most powerful ever built. The dimensions of the dredger will be as follows: Length, 478 feet over all, 69 feet beam, and 30 feet 7 inches in molded depth.

The dredger is now nearing completion and when finished will have a hopper capacity of 180,000 cubic feet, which is to be filled from a maximum depth of 70 feet within 50 minutes, and as the total load displacement will be about 18,000 tons exceptional strength will be prominent feature of the hull and jointing of the dredger, and the shell plates will be three-quarters of an inch thick, 28 feet long, each weighing 2 3/4 tons, and the butts will be quadruple riveted.

This dredger will have four centrifugal pumps, each of which will be driven by an independent engine, and when driven they will together lift the great quantity of sand indicated. The propelling machinery will be of 3500 indicated horsepower, and will consist of two sets of inverted vertical direct-acting triple-expansion engines, with cylinders 22 1/2, 37 and 61, and a stroke of 45 inches.

SNAKE POISON FOR MADMAN.

Scientists are today discussing the vastly important operation performed in the Bronx zoo, where Curator Raymond L. Ditmars, challenging death in the performance, took from the fangs of a snake 173-4 grains of deadly fluid which is believed invaluable in the treatment of insanity, epilepsy and kindred diseases—the amount obtained being sufficient for more than 17,000,000 doses, says a New York item.

It is agreed by the scientists who witnessed the operations that the

slightest slip of the curator's hand would have caused his death. Alienists say that it has been shown that the poison when properly diluted is instantly effective in the treatment of mental diseases, but they have been unable to get enough of it. The last was secured in 1838. The scarcity of this virus is due to the fact that the natives of Brazil, where the "dance head" reptile lives, dare not capture them. The one operated upon yesterday is one of the very few ever caught.

After the attendants got the four feet six inch snake out of a glass cage, the curator seized it by the neck and squeezed out 173-4 grains of the deadly poison into a jar. The poison will mix with 99 per cent of sugar and will until it reached the consistency of fine powder. From this sugar, which measures less than a third of a teaspoonful, the world's supply will be drawn.

A SONG OF WORRY.

What's the use to sit an' worry if you lose, who thought to win?
Kick the worry out the window—let the livin' sunshine in!
Time ain't sigh'n!
He's a-fly'n!
Worry'n is half a sin!

What's the use to work for worry?
Ain't there any hope in sight?
Kick the worry out the window, in the blizzard an' the night!
Time don't worry—
Too much hurry!
Swifter than an eagle's flight!

—Exchange.

Needed on Panama Canal.

Bids will be received until May 11, 1908, by the Isthmian Canal commission, Washington, D. C., says a government, for the supply of ranges, sanitary fixtures, iron pipe and fittings, lead bends, brass solder nipples, hose bibbs, valves, pipe brackets, steam trap, steam whistle, steam siphon, gaskets, pipe covering, machine and stove bolts, reamers, blacksmith's tools, anvils and forges, boiler-maker's clamps, bilge pumps, chain hoist, condenser tubes, hinges, painter's brushes, flue brushes and cleaners, dishes, kitchen utensils, water boilers, butcher blocks, cuspidors, milk cans, laundry nets, mop heads, toweling, napkins, waiter's jackets, needles, office tables and desks, chairs, filing cabinets, loose leaf and arch files, pantograph, writing paper, tracing paper, carbon paper, pens, paper clips, paper weights, typewriter brushes, pencil protectors, parallel rulers, metallic tapes, twine, ink, typewriter oil, gasoline, molasses, etc.

The joint scale committee of the soft coal operators and miners, in session at Springfield, Ill., voted to report in favor of the closed shop; that is, that union men should stay out of non-association mines. The scale is the same as last year.

A lot of men lose character trying to live up to reputation.
