

PECULIAR PROPERTIES OF NEW MEDICINE

Cooper Preparation Attracts Widespread Attention by Expelling Internal Parasites.

The interest created in leading cities during the past year by young Mr. Cooper, with his new preparation, is largely accounted for by a peculiar quality possessed by this medicine, which he calls his New Discovery.

Mr. Cooper believes that internal parasites, or tapeworms, are responsible for much ill health, and it is an undoubted fact that his medicine has expelled immense numbers of these creatures in various cities visited by him. The young man also believes that stomach trouble is the main cause of all ill health. He claims that few can have poor health with a good digestion. He further claims that his New Discovery medicine does nothing but tone up the stomach, yet it not only expels the parasites, but relieves many other ailments not as a rule associated with stomach trouble.

Little Jessie Birdsall, daughter of Mrs. Ida Birdsall, living at 2138 Carroll Avenue, Chicago, is among many relieved of a large parasite by Mr. Cooper's preparation during his stay in that city. In speaking of the matter to Mr. Cooper, the mother said: "My child Jessie, who is fourteen years old, has been suffering with this trouble for over seven years. Until this morning we did not know what

the trouble was. She was extremely nervous; the least little thing would upset her; her tongue was coated, and at times she would have a good appetite, then again could not bear the sight of food; she was restless at night, had a bad breath, especially when she got up of mornings. We tried everything to relieve her, but met with no success. We were just on the point of giving up trying anything else, when we began to read of Cooper's New Discovery. Several days ago we purchased this medicine. Jessie has been using it regularly, and this morning this parasite left her system. I don't wonder that she has always felt bad, and nothing we would give her seemed to relieve her. Now that she is relieved of this tapeworm I feel sure that she will grow better each day, and enjoy perfect health.

Mr. Cooper, your medicine is worth a thousand times more than you charge for it. I know of a number of people troubled the same way as Jessie has been, and I certainly expect to tell them personally to try your medicine."

We would advise anyone who has been troubled for some time with general poor health to try this great medicine. We are agent for it in this city. —Pendleton Drug Co.

NEW LANDS READY

**MINIDOKA PROJECT TO
OPEN ABOUT JULY 1.**

Over 70,000 Acres of Rich Sagebrush Land in Southern Idaho to Be Thrown Open to Settlement This Year—Enormous Electric Power Plant Will Be Installed and Electric Lines Will Cover the Project.

The Boise Capital News says of the opening of the Minidoka government irrigation project, in southern Idaho:

Water will be turned into the canals and laterals on the south side section of the Minidoka project, which includes some 40,000 acres of land, under the supervision of the government before July 1, of this year. It is confidently expected that all the work will be completed by that time, which is the limit according to the contract, and several large crews of men and teams are now rushing the building of the canals and the completion of the big power plant, located 13 miles from the town of Rupert.

The government engineers, who have charge of this project, are now contemplating the irrigating of several other large tracts of elevated land adjacent to that of the Minidoka project and for that purpose will generate an unlimited amount of electricity, which will be transmitted to electric pumping stations located at intervals along the tract, which will be used to force the water from the lower canals onto the elevated plateaus and turn it into the canals which will be constructed there and from which water will be taken to irrigate the land.

This is probably the newest feature in irrigation in southern Idaho and is considered a great stride towards solving the problem of irrigating those lands which are located so high above the various tracts that they have in the past been worthless except for grazing purposes, and considered impossible to water.

The Minidoka project is one of the most substantial of its kind ever attempted in this state and being built along the same lines as that of the Payette-Boise project. It will irrigate when completed, 70,000 acres of some of the best land in the state. About half of this amount is already under water and is included on that part of the project which lies to the north of the Snake river.

In the center of this tract are a number of thriving towns namely, Rupert, Minidoka, Heyburn, Jackson and Acequia. Rupert is located in the center of the tract and therefore all of the other towns are tributary to it. There are few towns of any importance on the south side of the project at the present time, but it is expected that as soon as the water is turned on communities will rapidly spring up.

Will Generate Great Power.

One of the biggest electric power plants ever erected in the state is now in the course of construction 13 miles northeast of Rupert on the Snake river.

It is estimated by the government engineers that 50,000 horse-power can be generated at this point of the river and that this will be sufficient to furnish power for light, transportation and fuel to the various towns on the tract as well as to every ranch house, and also supply power for the operation of the electric pumps to elevate the water to the land located above the tract.

If the plans of the government materialized this power will be transmitted just as soon as the power plant is in operation and plans will be immediately taken up to build electric lines over both sides of the river. It also may be possible to transmit power to points outside of the tract.

Over 1200 Farms.

There are 1200 farms of the regulation unit of 40 and 80 acres on the north side tract and this unit will also be the same of those farms set out on the south side. The ranches on the north side are all occupied and farmed by easterners who recently came into the country eager to obtain land which is watered by the government project.

Many of the farms are modern in every respect and the nature of the soil, which is of volcanic ash underlaid with fine sand, makes it possible through irrigation, to produce marvelously large crops. By dry farming alone one of the ranchers of the tract raised 60 bushels of wheat to the acre and it is claimed that this will give some idea of the amount of wheat that can be raised on irrigated land.

The president of the Benton water company, which is seeking a franchise from the government to build a dam across Snake river at Five Mile rapids, has signified the willingness of the company to accept the amendment proposed by President Roosevelt. This amendment provides that a charge shall be made for all power not used for irrigation purposes.

Consider Mining Bureau.

The governing board of the Commercial club will meet at noon today when steps will be taken relative to the matter of organizing a mining bureau, says the Lewiston Tribune. It had been arranged for the matter to receive consideration at the last meeting of the board, but no quorum was present at that time. The board has invited mining men to be present to express their views. It is probable that at the meeting today the subject will be referred to a committee, having authority to establish the bureau as an adjunct of the club's publicity work.

At the meeting today the governing board will also consider the matter of making a donation of \$100 to the Lewiston band to assist in the purchase of new uniforms. The matter of making a regular monthly donation to the band will also be acted upon.

Insist upon DeWitt's Witch Hazel Salve. It is especially good for piles. Sold by Tallman & Co.

Nominees for June Election

J. Hudeman

DEMOCRATIC NOMINEE

FOR COUNTY COMMISSIONER

At the election to be held June 1, 1908.

Ralph Folsom

AMUSEMENTS

In the Big Tent.

Beecher & Stanley will present a grand revival of T. S. Arthur's temperance gem—"Ten Nights in a Bar Room." A new, big, grand revival that excels any ever before attempted. All special scenery, elaborately constructed and painted by the best scenic artists in America, solo band and orchestra. Free street parade at noon. Don't miss it. The Revelers' Quartet in a repertoire of choice songs and choruses. An ideal production of this universally admired temperance drama, endorsed by the press, clergy, public and the Christian people of all creeds and sexes. A life lesson for the young. In the big tent Thursday, May 14.

Eagle Show Shop.

The Eagle show shop has a fine lot of moving pictures on at this time. New, in beautiful colorings, and up to date. Among the new attractions are "The Devil's Three Sins," "The Workman's Revenge," "The Cabman's Delusion," "Baby Show," and the illustrated song, "Alice, Where Art Thou."

Pastime Pleasures.

The "Pastime" announces an excellent change of moving pictures for today. New and beautiful. The program the past few days has pleased the large crowds, and the present program is equally as good as any shown here yet. Today's program will continue over until Sunday, there will be another excellent change.

Dime Pictures.

The "Dime" has been pleasing the usual large crowds the past few days with a fine set of new pictures, and the management announces an excellent change today, which will continue over until Sunday, when there will be another good change. These pictures are all new, attractive and beautiful.

FAMILY OF PERFORMERS.

**Great Circus Attraction Coming With
Norris & Rowe.**

When the Greater Norris & Rowe circus exhibits in this city Thursday afternoon and night, May 14, a family of circus performers will be seen by the name of Orton. There are eight members of this family which includes young men and women.

Their father before them was in the circus business and conducted a rather pretentious circus in the New England states under the name of the Myles Orton circus.

This family are indeed versatile, for they are clowns, wire walkers, jugglers, trapeze artists among them, and their bicycle riding on a very slender wire at the very tip of the tent, and diverse other hazardous and thrilling feats are astounding.

During the run of the Norris & Rowe circus in San Francisco last spring of 60 performances, 279,873 persons paid admission to the big show. The Orton family were among the distinct hits of the big program, which contains the names of performers of world-wide reputation; performers from every clime in the civilized world.

Nathan Wolff's Estate.

Nathan Wolff left an estate valued at \$15,000, which will be inherited by his widow, Mrs. Esther L. Wolff, and their four children, ranging in age from 5 to 11 years, says the Oregon Daily Journal. Acting on a petition filed in behalf of the widow by Dolph, Mallory, Simon & Gearin, County Judge Webster this morning appointed Mrs. Wolff executrix of the estate. She is required to give a bond of \$15,000. The estate consists solely of the stock of jewelry and other goods kept in the pawnbroker shop at 165 First street, where Wolff met his tragic death. The widow is 5 years of age and the children are Aline, 11 years old; George, aged 8; Ruth, aged 7, and Jeannette, aged 5. Joseph Diakel-spiel, Jacques F. Reinhardt and Herman Marks have been appointed to appraise the estate.
