OREGON'S NEW TEXTILE FACTORY TOWN

The Portland Oregonian's story of the new textile manufacturing town on the Columbia river at Gordon Falls, to which place it is proposed to remove the Pendleton woolen mill, is as follows:

Between a railroad and a river with an unlimited water power latent in precipitous falls immediately at hand, and with ideal weather and geographical conditions, the first textile town on the Pacific coast and west of the Mississippi river, is to be established at a point 2 1/2 miles east of Portland, a short distance from Bridal Veil falls.

The town will be established and the immense manufacturing plant will be operated by the Gordon Falls Electric & Manufacturing company, recently organized with a capital stock of \$225,000. The capital stock, however, does not indicate the total cost of this huge manufacturing enterprise.

Employees to Share Profits.
An Utopian idea is to be followed in connection with the numerous employees who will be required in the big manufacturing settlement. Plans are to be worked out which will permit all deserving employees to acquire an interest in the company, so that each may participate in the profits accruing from his own labor. Each family will be provided with a home and sufficient land for a garden. The company will donate a suitable plot of land for park and recreation purposes also for a gymnasium.

Will Be a Dry Town.
Another feature of unique and modern interest is the prohibition of the sale of liquor in the town. "The company has determined," according to its official statement, "to prohibit the sale of intoxicating liquors upon its premises, or the use of such premises for immoral purposes, and all realty transfers or leases will be made subject to such restrictions, it being a fact beyond controversy that social and business conditions will be greatly benefited thereby."

The Gordon Falls property begins at a point 2 1/2 miles east of Portland on the line of the O. R. & N. railroad and the Columbia river, near Bridal Veil, and runs eastward a distance of three miles, and from the river on the south to the summit of

the mountain and on to a point south of the source of the stream known as Gordon Falls. The source of the stream is in a large basin not far from the precipice, which is 1000 feet high.

Project Long in Forming.
Three years ago Charles Cooney, a Portland enthusiast on the subject of textiles, had his attention directed to Gordon Falls as a favorable location for woolen mills and scouring plants. He visited the place, discovered conditions to be ideal, and immediately set about to secure not only the falls but enough adjacent land upon which a city might be built.

By his individual efforts he almost accomplished his purposes, and with the formation of a business partnership with George L. Peaselee, of Peaselee Brothers company, this city, the object was finally attained.

The organization and incorporation of the Gordon Falls Electric & Manufacturing company was the result. It is incorporated under the laws of Oregon and has a capital stock of \$225,000.

The company proposes "to develop and utilize the water power known as Gordon Falls on its property, to sell and lease lands belonging to the company for manufacturing, commercial and residential purposes, to erect and sell or lease buildings for residential purposes, to engage in the manufacture of woolen and worsted textiles, and in such other enterprises as from time to time may be determined to be feasible and profitable."

Fine Facilities for Shipping.
The company's property consists of 840 acres of land situated on the south bank of the Columbia, and on the line of the O. R. & N. railroad; three miles of water frontage rights on the river; the absolute right to streams and waterfalls on the property of the company, which are sufficient for the development of 1200 horsepower, and for all domestic, manufacturing and other uses; the company also owns several smaller streams making an additional horsepower of 1000. The company also owns supplies of building timber.

The company proposes to expend \$20,000 the first year in erecting a hotel and cottages for its employees

and laborers. Also for the first year it proposes to expend \$39,192 for an electric light and power plant; \$37,700 for a woolen mill, and a large sum for an excelsior manufacturing plant.

Work Soon to Begin.
Work on the various details of the big undertaking is to begin as soon as possible. It will provide employment for hundreds of men and will mean the establishment of another enterprise in the immediate vicinity of the city.

E. Y. Judd of Pendleton, Ore., and of Hartford Conn., a big wool buyer of the firm of Judd & Root, and T. Oliver Dowd, a Massachusetts capitalist, are stockholders in the company.

COOKE REFUSES BAIL.

Baker City Man Accused of Land Fraud—He Is Silent.

Baker City, Ore., July 16.—Arriving in Baker City at noon yesterday Deputy United States Marshal Nicholson took in custody H. E. Cooke, who has been in the Baker county jail since last Saturday without any charge against him on the records of this county.

It was not long after the marshal arrived that the charge of attempting to defraud the government was made known and Cooke was arraigned before United States Commissioner C. A. Moore of this city. He waived his right for examination and his bond was fixed at \$5000. He refused to try to obtain bondsmen and tonight he was taken to Portland and from there will be immediately delivered to the federal officials in New York city.

Up to the time of arrival of the federal officer Cooke maintained that he knew not why he was detained. After his arraignment he had nothing to say.

At a local hotel is a party of 15 people from Elmira, N. Y., who are reported to have purchased stock in the Oregon Ranching & Timber company, of which Cooke was the moving spirit. Until Cooke was brought before the commissioner these people maintained that his transactions with them had been straight and square.

There is more or less concern over the fact that this city is alive with federal officers tonight. Every man who has proved up on a timber claim is going over the transaction in his mind endeavoring to trace every detail so as to be sure that he has not compromised himself with the law. It is said that the presence here of federal officers means there will be a general shake-down of all timber transactions in Baker county.

Land Entries Irregular.

La Grande, Ore., July 16.—H. E. Cooke, arraigned in Baker City on land fraud charges, is believed to have instigated the filing of 39 alleged fraudulent applications in the United States land office in this city. Federal detectives have been in this city for several days investigating the entries.

ASH HOUSTON A SLUGGER.

Man Pendleton Let Go Helped Clinch Big Point.

Ash Houston, Kotterman and Lodell have returned home after helping La Grande win the pennant of the Inland Empire league, says the Portland Telegram. Houston and Kotterman will rejoin the Frakes Sunday and Lodell will probably play first base for the Vancouver Pioneers of the Tri-City league. Five or six other players from the Inland league are expected here in a few days. They will be scattered among the Tri-City teams and the class of ball of that organization will be raised considerably.

Houston made a great batting record on his first trip from home as an out-and-out professional. He was one of the leaders of the league in hitting and without a peer as a slugger. He hammered out six home runs.

"Bill" Kotterman was the star of the La Grande twirlers and is reported to have improved wonderfully in his pitching this year. He has several tentative offers for tryouts with Northwest league teams and will probably cast his lot with one of those clubs next season.

Will Dry His Cherries.

S. P. Kimball has a cherry drier with a capacity of 300 bushels daily ready to start working Wednesday, says the Capital Journal. The rest of his large crop will be pitted and dried. It is believed to be a solution for the over-production problem so far as canneries are concerned, as there is a large market for dried pitted cherries. He has a machine pitter that will run with power and pit as fast as the drier will take them, and can probably take cherries besides his own crop. Cherries can be handled by driers, long after they are unfit to go to the cannery, and the best results are obtained after they are so ripe as to be sticky.

Injured by Explosion.

A loud explosion shortly after noon today created considerable speculation in the residence portion of the city. The cause of the noise was the ignition of gas accumulated in an empty barrel, some time ago containing wood alcohol. The loud explosion was louder than serious Frank Floyd of the Newlin drug store, had lighted a match in too close proximity to the barrel, which lay in the back yard, and instantly he was in the midst of an accident, the result of which is causing him some pain. His hand was badly burned, but he is able to be at his work this afternoon. Otherwise there was no harm done.—La Grande Observer.

BIG LUMBER CUT FOR YEAR 1907

DESPITE FINANCIAL PANIC THE OUTPUT SOARS

Total Lumber Cut of the United States for Past Year Was 2,705,000,000 Feet More Than That of 1906—Output of the Southern States Increases 17 Per Cent.

Washington, D. C., July 16.—Notwithstanding the cry of timber famine, the soaring price of lumber, and the disastrous effects of a money panic late in the last year the total lumber output of the year 1907, according to figures made public today by the census bureau, is 2,705,000,000 feet, board measure, more than that of 1906. The total cut was 40,256,000,000 feet.

The production of lath throughout the country fell from 3,813,000,000 in 1906 to 3,664,000,000 in 1907—but the production of shingles ran from 11,555,000,000 in 1906 to 11,950,000,000 last year.

"The substantial increase in the total production of lumber in 1907," says the report, "was compared with 1906, in spite of the financial stringency is remarkable, and especially so in view of certain well-known local causes. Aside from the car shortage, which necessitated a restriction of the cut in many localities, the fact that the industry of lumber manufacture was practically suspended on the Pacific coast early in the fall on account of the prospective raise in freight rates by the railroads, materially affected the amount of the output."

The south was far and above every other section of the country the biggest producer of timber, the yellow pine cut for 1907 aggregating the enormous total of 17,694,218,000 feet by 11,195 mills, as against 15,096,110,000 feet by 8143 mills in 1906 an increase of 17 per cent.

The Lake states fell below their average, with 11 per cent decrease of white pine cut, the figures being 5,491,600,000 feet for 1907. In Minnesota the cut of pine in 1907 formed 91 per cent of the total lumber output of that state, and represented 60.9 per cent of the aggregate cut of this wood in all the Lake states.

Lewiston Box Factory.

The Lewiston Lumber company and A. W. Hawkins yesterday purchased from the Colby, Coryell & Howe company all the lumber of the company now stored at Jacques Spur, says the Lewiston Tribune. The lumber amounts to about 500,000 feet. The purchasers will operate the planing mill at Jacques Spur under lease and will immediately work up the lumber for shipment. Some of the supply will be devoted to the manufacture of fruit boxes.

The Lewiston Lumber company operates a sawmill in Lewiston and it is the plan, so soon as the present supply of lumber at Jacques Spur is

The Story of a Medicine.

Its name—"Golden Medical Discovery" was suggested by one of its most important and valuable ingredients—Golden Seal root.

Nearly forty years ago, Dr. Pierce discovered that he could, by the use of pure, tripe-refined glycerine, aided by a certain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native medicinal roots their curative properties much better than by the use of alcohol, so generally employed. So the now world-famed "Golden Medical Discovery," for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness and kindred derangements was first made, as it ever since has been, without a particle of alcohol in its make-up.

A glance at the full list of its ingredients, printed on every bottle wrapper, will show that it is made from the most valuable medicinal roots found growing in our American forests. All these ingredients have received the strongest endorsement from the leading medical experts, chemists, and Western and Eastern Medical men who recommend them as the very best remedies for the diseases for which "Golden Medical Discovery" is advised.

A little book of these endorsements has been compiled by Dr. E. V. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the doctor as above. From these endorsements, copied from standard medical books of all the different schools of practice, it will be found that the ingredients composing the "Golden Medical Discovery" are advised not only for the cure of the above mentioned diseases, but also for the cure of all catarrhal, bronchial and throat affections, accompanied with catarrhal discharges, hoarseness, sore throat, lingering, or hang-on-coughs, and all those wasting affections which, if not promptly and properly treated are liable to terminate in consumption. Take Dr. Pierce's Discovery in time and persevere in its use until you give it a fair trial and it is not likely to disappoint. Too much must not be expected of it. It will not perform miracles. It will not cure consumption in its advanced stages. No medicine will. It will cure the affections that lead up to consumption, if taken in time.

worked up, to move the box-making machinery to Lewiston when the plant will be established here. Additional equipment will be installed and plans of the company are to have a plant of adequate capacity to supply the greater part of the demand for fruit boxes in this field.

A. W. Hawkins last night confirmed the report of the purchase of the lumber at Jacques Spur and stated that the plans provided for having a box factory in operation here at a date early enough to supply the market in that line before the opening of the fruit season next year. The plant will be installed at the site of the Lewiston Lumber company's mill in the eastern section of the city.

Bert Barber of Elton, Wis., says: "I have only taken four doses of DeWitt's Kidney and Bladder Pills and they have done more for me than any other medicine has ever done." Sold by Tallman & Co.

Baker Flour Mill Assured.
It is with intense pleasure that the Democrat can announce that the committee appointed to solicit funds for purchasing the site for the new flouring mill has secured the necessary funds and the mill is now an assured fact, says the Baker City Democrat. The committee should have the thanks of every citizen of Baker county for the work it has done. Every member of the committee has made sacrifices; have left their businesses for the good of the community and the county.

"E. C. DeWitt & Co., Chicago, Ill.—Gentlemen—In 1897 I had a disease of the stomach and bowels. In the spring of 1902 I bought a bottle of Kodol and the benefit I received all the gold in Georgia could not buy. May you live long and prosper. Yours very truly, C. N. Cornell, Roding, Ga., Aug. 27, 1906." Sold by Tallman & Co.
