STORY OF THE FAMOUS ALASKAN WHEAT

An agricultural writer has prepared the following interesting sketch of the new Alaskan wheat which has been promulgated at Juliaetta, Idaho:

If some one were to tell the average wheat farmer that it was possible to raise a wheat crop on United States farms in one year, of five billion bushels, he would brand his informant as a liar pure and simple, and yet had the farmers in America planted a wonderful new wheat seed that has been perfected by Abraham Adams, of Juliaetta, Idaho, that is just what the yield would have been this season, based upon the possible crop of the year.

Connected with this assertion is the greatest wheat story that has ever been told, far greater than the wildest dreams of the wheat king, is the security of his vast domain and the demand for his golden harvest.

The United States paid eighty millions of money for Alaska, and yet the gold payment Alaska has returned sinks into insignificance when compared with Farmer Adams' Alaskan wheat, which in the secret and far away fields of Idaho he has gradually brought to perfection until he has given to the world a wheat that will grow under average conditions two hundred bushels to the acre.

This is a large assertion, and hardly believable were it not for the fact that it is backed up by surveys of land and output of threshers, and the yield and quality backed up by the Idaho experimental station at Moscow, Idaho, and being followed up by other stations, all eager to make a test to see if they can beat the yield of the originator.

The yield is only a part of the great discovery, for this Alaska wheat is both a winter and spring wheat, and when planted as either is a hard wheat that will grade as No. 1. Imagine a hard winter wheat for the great soft wheat belts of the country, which with this new wheat can compete with the hard wheat lands of the great Northwest.

A Brief History. A brief history of this almost miraculous seed is given in a few words by its modest originator, a plain man who farms in a plain way, but who all his life until old age has lived with and for his wheat, and has finally given the world the greatest gift any one man has ever been responsible for.

Mr. Adams' first perfect head of wheat came to realization in 1904, from an experimental plant of the spring of that year. This one head he planted that fall as winter wheat, and the next year he secured seven pounds of seed from this planting. From the seven pounds, planted in the spring of 1905, he harvested 1,545 pounds, an increase of 122 times, or a basic principle of 222 bushels to the acre.

Here comes another remarkable story of this wonderful wheat. The 1,545 pounds were sowed in the fall, and that summer there were terrific hail storms which put the club and bluestem wheat so much to the bad that many fields were never harvested, yet from the Alaska wheat plots there was gathered a crop which threshed out 53,000 pounds. This when all other wheat was rendered practically worthless.

At about this time the Idaho station became interested in the wheat and asked to make a test. Mr. Adams carried a sample to the station at Moscow, and after a most thorough test received the following reply:

"Regarding the analysis made upon the sample of Alaskan wheat which you brought to this laboratory, I have this to say: The kernels from the fall sown wheat were plump and sound, and doubtless will grade as No. 1. Judging from the chemical and physical condition of this sample I will say it will probably take rank with the best grade of bluestem for flour making purposes. The sample grown from spring grown wheat showed by chemical analysis a somewhat higher protein content (this being an indication of its probable strength for bread making purposes). I am inclined to think that the wheat you have here is equal if not superior to our bluestem for flour making purposes. I should like to make a mill test whenever you can send sufficient quantity for that purpose.

Very truly,
J. S. JONES,
State Chemist.

Looks Like Corn.

In appearance the standing wheat is strong and vigorous, with a corn-like growth. Its head in the bearing part is about four inches long to over that and an inch to an inch and a half broad at its broadest part. The kernel is about four times the size of hard wheat, and a clear light cream color without a dark spot, as clean as hulled peanuts in color.

It is almost absolutely frost protected and it would be a hard frost that would touch it. Its sturdiness makes it impervious to ordinary storm or light hail. It is originally grown on high unirrigated land and will stand drought as no known wheat will. Add all those qualities to its enormous yielding properties and it must be admitted that the world has been turned topsy turvy so far as wheat raising is concerned.

California, where so much soft wheat is grown, is beginning to take up the Alaska wheat, for they see the opportunity of a hard wheat yield. Farmers in Missouri and the east, and in the south, where soft wheat is all that can be raised with success, are beginning to think of what is in store for them when some neighbor convinces them by making a first trial, that the wonderful Alaskan wheat story is not as much a fabrication as the first story of seedless oranges was thought to be.

The wheat world is trembling on the verge of a new era, one in which the man with a hundred acres suddenly finds his farm increased in

area to a thousand acres, by the discovery of one old farmer away out in Idaho.

As a last test, Mr. Adams has sent single heads of wheat to other parts of the country, where he had men he could trust to plant and ascertain the result. Reports are just coming to him, and he finds that in other states the Alaska wheat does better than on his home soil. In Alabama a head planted December 31 was up January 30, waist high April 1, with leaves 5/8 of an inch broad, and July 7 was harvested. It showed to be hard wheat of a fine quality, and the one head yielded the same as the first head planted in Idaho.

One Oregon experimental station offered the originator \$5 for a pound of his wheat, a rate of over \$300 a bushel. The old gentleman did not prize the money. He only wanted to be sure that some attaché was not trying to get away with some of his seed. He required a contract that the state would not dispose of any wheat used in the test, and upon securing that sent the seed asked for along.

Now the United States experimenters are becoming interested, and next year's report will have much to say about Abraham Adams and his wheat and the old gentleman will at one step come as much into prominence as Luther Burbank, who, although accomplishing hundreds of miracles with growing things, has been eclipsed by this man, who has done what the average farmer will believe is an impossibility.

The Remedy That Does. "Dr. King's New Discovery is the remedy that does the healing others promise, but fail to perform," says Mrs. E. R. Pierson, of Auburn Center, Pa. "It is curing me of throat and lung trouble of long standing, that other treatments relieve only temporarily. New Discovery is doing me so much that I feel confident its continued use for a reasonable length of time will restore me to perfect health." This renowned cough and cold remedy and throat and lung healer is sold at Tallman & Co.'s drug store. 50c and \$1.00. Trial bottle free.

BIG PROJECT IS ENDORSED.

Manufacturers Pass Resolutions Declaring Gordon Falls Ideal Site for Great Textile Center.

At a meeting last night of the Manufacturers' association a resolution was passed in which the members expressed their entire approval of the plan of the Gordon Falls Electric & Manufacturing company to establish a power plant and woolen mill at Gordon falls, near Bridal Veil, Ore., says the Portland Oregonian. It was the sense of those present that the site of the new enterprise offers most favorable advantages for the establishment of such an industry.

The directors of the Manufacturers' association, which is also the committee on manufactures and public improvements of the chamber of commerce, after personally inspecting and investigating the property and water power and other natural facilities of the Gordon Falls Electric Manufacturing company, wishes to report to the respective associations and public generally that they desire to affirm again their belief that Oregon is the best natural field for the operation of woolen mills and other kindred industries, for which we possess the raw materials, and that the Gordon Falls Electric & Manufacturing company, with its location, served as it is by both rail and water, offers most excellent advantages for the establishment of such industries.

A resolution was also passed endorsing the school of trades, to be opened this fall under the auspices of the board of education.

Best the World Affords. "It gives me unbounded pleasure to recommend Bucklen's Arnica Salve," says J. W. Jenkins, of Chapel Hill, N. C. "I am convinced it's the best salve the world affords. It cured a felon on my thumb, and it never fails to heal every sore, burn or wound to which it is applied. 25c at Tallman & Co.'s drug store.

If you see it in the East Oregonian, it's so.

Oh How Delicious! MALTONA THE TEMPERANCE BREW

Looks like beer! Tastes like beer!

The pioneer temperance beer of the Pacific Coast

NORTH PACIFIC BREWING CO. ASTORIA, OREGON

RUSH ROAD FOR HARRIMAN. New Line Being Completed Into the Klamath Country.

Dorris is soon to lose the distinction of being the terminus of the California Northeastern, says the Southern Oregonian. Laying of steel across the hill from Dorris has already started and within a few days the line will be completed to Calor, and it is thought that by the end of the month the terminus will be at Worden, which is but a short distance from the edge of the marsh. The grade across the tunnel hill has been completed and the steel gang is already past the top of the hill where the deep cut was made.

It is understood that the Harriman party will arrive here about the first of August, and the extension of the road is made at this time so that the party will avoid as much of the stage ride as possible. As soon as

HIDAWAY SPRINGS

WM. SCOTT, PROPRIETOR AND MANAGER. The Great Mountain Resort

HIDAWAY SPRINGS, Oregon, 50 miles south of Pendleton. Board, lodging, and bathing, \$7 per week. Best hunting and fishing grounds in the Blue mountains. Fine camping grounds free.

Hack and telephone connection. Plenty of pleasure. Feed barn, hay and grain reasonable. Fine swimming pool, dance hall and good music. Cottages for rent. Boating lake for use of guests. Bowling alleys and skating rink are new features.

Best accommodations. Good hack service. For further particulars, address Wm. Scott, Hidaway, via, Albee, Ore.

Leave orders at Demott & Co., or Tallman's. Stage leaves Pilot Rock every Tuesday and Friday, making connections with Pilot Rock train.

LOCKSLEY HALL

SEASIDE, ORE.

Most beautiful location, overlooking the ocean, newly furnished, electric lights in every room, local and long distance telephone connections, fresh and salt water bathing, private and public baths in the house, 100 rooms, best known and most popular hotel. Seafood a specialty.

Rates \$2.50 and \$3.00 per day. Special rates by the week and for families.

MAKE YOUR OWN STOCK FOODS BY USING SKIDOO HORSE AND CATTLE TABLETS

Crush and mix in feed or salt. Proper dose in tablets. Makes Your Stock Look Like the Top Price

For Horses, Cattle, Sheep, Swine and Fowls. They are made from the active principle or the condensed essence of the drug. They don't contain Sawdust, Ashes, Chop Feed or Bran. Are just as good when 10 years old as when 10 days old. They comply with all pure drug laws. Ask for and try once SKIDOO Condition Tablets, or SKIDOO Worm, Kidney, Chicks Cholera, Blister, Cathartic, Heave, Fever, Hog Cholera, Distemper, Pink Eye, Colic tablets or L. 1st Powder, Spavin Cure or Barb Wire Liniment. Distributed by THE BLUE BELL MEDICINE CO., incorporated; Capital Stock \$300,000.00; Watertown, South Dakota, U. S. A.

RESERVE RANGE IN GOOD SHAPE

SCHMITZ SAYS WENAHA CATTLE ARE FARING WELL.

"Never So Good as This Year" Is the Statement—Lower Sheep Range Is Also in Good Condition—Grass Plentiful—200,000 Sheep on the Reserve—Walla Walla Water Supply Alright.

"Cattle range on the Wenaha reserve was never so good as this year," said J. M. Schmitz, ranger in charge, who has just returned from a trip of inspection through the forest. "On the lower ranges the cattle are doing nicely and the range is said to be better than for years, says the Walla Walla Statesman. The lower sheep range is also good, as good as could be expected. But the upper range, where the snow is just leaving, is dry and will furnish but poor picking. However, taking the forest over, there will be plenty of grass, although there will probably be a good many disputes over the range, as those who have the lower range where grass is good naturally do not want to exchange or give up part of it. But this will be necessary. In fact, my recent trip was for the purpose of settling several disputes of the kind.

"There are about 110,000 full grown sheep on the range and more than 90,000 lambs in addition, making in all about 200,000 sheep pasturing on the reserve. The cattle are in much

smaller numbers, only about 14,000 being on the forest altogether. City Water All Right. "Did you notice conditions above the intake of the city waterworks on Mill creek?" was asked Mr. Schmitz. "Why, yes; I paid particular attention to that after having heard the matter discussed lately. As I found things, and I observed pretty closely, everything is in good condition. There are no dead cattle in the creek that I could see, and the campers are quite careful in the way they use the stream. I think there is no cause at all for alarm over the conditions there. I do think, however, that the city should keep a man patrolling the creek and see that conditions are good at all times. Just at present there seems to be nothing needed beyond the notices posted, as these are being observed closely by campers and others who visit the creek above the intake. Conditions are good, I should say."

Pineules for the Kidneys, 30 days' trial \$1, guaranteed. Pineules act directly on the Kidneys and bring relief in the first dose to backache, weak back, rheumatic pains, kidney and bladder trouble. They purify the blood and invigorate the entire system. Sold by A. C. Koeppen & Bros.

Fund for New Whitman. According to an announcement made by Prof. A. W. Hendrick, \$64,533.13 has been subscribed for a new Whitman college by residents of Walla Walla county and city. No subscription has been over \$10,000 and none under \$1,000.

Bert Barber of Elton, Wis., says: "I have only taken four doses of De Witt's Kidney and Bladder Pills and they have done more for me than any other medicine has ever done."

Sold by Tallman & Co.

Estrayed. One coyote, one year and three months old; will answer to a rooster crow; has hamestrap collar and is noted for his side-stepping qualities when being shot at. Any one finding the same will please return collar as a guarantee of good faith and receive reward. Was last seen near Nye, where Mr. Mustard is engaged in the turkey business. He left Pilot Rock Sunday night apparently in disgust at the desertion of the town and it may be that he has followed the crowd to the mountains.—Pilot Rock Record.

COFFEE Our name on the package gives us the credit, and puts on us the money-back burden—it isn't a burden!

Your grocer returns your money if you don't like the coffee's taste: we pay him.
