Dr. Best has considerable land near Klamath and he will be there for the harvest season.

NEARING WALLOWA BRIDGE.

Extension Into Wallowa County Goes on Rapidly.

La Grande, Ore., July 31.—Slow but sure progress is being made in the extension of the Elgin branch of the O. R. & N. toward Wallowa. A report from the front received last night stated that the track is now at the fish hatchery, which is about 10 miles from the crossing of the Grand Ronde river, and but little more than a mile below the bridge.

Track laying has been progressing at the rate of about 3500 feet per day, which is not a record breaking speed, but at the same time counts as the days go by. It is said that the end of the track will be at the Wallowa bridge, otherwise known as "Minam," by Sunday. Word received from different points beyond the steel gang are all to the effect that good progress is being made and the work is being rushed as rapidly as the means at hand will permit.

HOT ONCE MORE.

Threshing Outfit Leaves Its Mark on Softened Pavement.

It has been hot in Pendleton again today, the thermometers running up to 105 in the shade this afternoon. During the past few days the weather has been growing warmer gradually and the threat of another hot spell is driving many people to the mountains or the coast.

The warm weather makes the bitu-lithic pavement very soft and a threshing outfit that traversed several blocks of Main and Court streets today left a ploughed trail behind. The outfit was driven by Guy Wyrick and came across the Main street bridge. Mr. Wyrick said he was unable to make the turn up Water street and had to drive up to Court.

But there is a rigid ordinance forbidding heavy machinery or trucks from using the paved streets to their injury and unless observed strictly prosecutions will follow.

AMUSEMENTS

The Old White Hen.

There is a change of motion pictures at the Eagle Show Shop this afternoon, all new and up to date. Among them are "Bakers in Trouble," "The Old White Hen," which is beautifully colored, "Trained Dogs" and a new illustrated song. This program will run until Sunday, when there will be another change.

The Dancing Nig.

The Pastime has the usual change of motion pictures this afternoon, all new, and among the best ever shown in the city. Among them are "The Dancing Nig," which is very comical, "The Miner's Daughter," "Mt. Garrett," "Costumes of Different Countries," which is beautiful, "The Cupboard," and the beautiful illustrated song, "Where the Silvery Colorado Wends Its Way." Another change will be put on Sunday.

Dime Change Today.

There is the usual Friday change of motion pictures on at the Dime today, all new and in beautiful colorings, with a late illustrated song. The management announces that the old Dime will be opened again tomorrow and Sunday as usual, all new pictures for both places. These are among the most popular amusement places in the city. The change at the new Dime today will be on until Sunday, when there will be another change.

The Servant Girl in Germany.

In most German households there is no such thing as the strict division of labor insisted on here. Your cook will be delighted to make a blouse for you, and your nurse will turn out in the dining room, while your chambermaid will take the child for an airing if you order it so. They are more human in their relation to their employers. The English servant fixes a gulf between herself and the most democratic mistress. The German brings her intimate joys and sorrows to a good herschafft and expects their sympathy.

When a girl has had luck and engages with a bad herschafft she is worse off than in England because she is more in the power of her employers and of the police than she would be here. She has to have a dienstbuch, an official book in which her age and personal appearance are registered. In this book her employers write her character. It is under the control of the police and has to be shown to them when she leaves and when she enters a situation. It is hardly necessary to say that when a girl does anything seriously bad and her employers record it in the book the book gets "lost." Then the police interfere and make it extremely disagreeable for the girl.

Charged With Girl's Death.

Frank W. Mitchell has been arrested at Blackfoot, Idaho, charged with murder in the second degree in connection with the death of Mary Robb on July 13, following a criminal operation. His preliminary was fixed for August, and he was released on a \$5000 bond.

Where Frost Does Not Kill.
Some of our correspondents take a doleful view of the government re-

ports which indicate more or less frost here during the growing months, says the Lake County Examiner.

It is a singular and unexplained fact of this climate that frosts, which would utterly ruin anything in other sections of the country, do not in the least injure any plant life here. Since the writer came to Lakeview we have noticed one frost early in the morning and "viewed the same with alarm," only to be laughed at by the old timers. When we expected to see black cucumber vines, dropping fruit and the like, everything came out as clear and bright as if there were no such thing in the world as Jack Frost.

The loaded cherry, apple and other trees at present all bear testimony that they are immune from white frost, and the great thrifty truck and garden patches would be the envy of the world anywhere.

The government of the United States is certainly "mistook." There is no such thing as "killing frost" in the Goose Lake valley, though there is an occasional inouous white frost that does just the damage that a light shower of rain would effect—no more, no less.

Such reports are misleading and should be corrected by the officials in charge of such government work.

RACE FOR BRITISH TROPHY.

International Motor Boat Speed Contest Tomorrow.

New York, July 31.—All is in readiness for the international motor boat speed contest for the British international trophy, to be held tomorrow off Huntington, L. I. The trophy is now in possession of the Motor Boat Club of America, having been won last year by Commodore Schroeder's Dixie. The cup was given by Lord Northcliffe and its ownership represents the world's motor boat championship. Three of the speediest American boats, selected in the recent trial, will represent this country.

The foreign competitors will be the English challenging boat, Walseley-Sideley, and a second English boat recently entered, Dalmier II., owned by Lord Howard de Walden. The challenging boat, which is a new creation this season and made a most excellent showing in the races at Monaco, is owned by the Duke of Westminster.

The course will be three times around a triangle, the apex of which—and the starting point—will be about a mile from the inner end of the bay, opposite the Chateau des Beaux Arts. The second angle will be at the "Lump Buoy" off Eaton's neck, and the third nearly two miles to the westward of that buoy. In order to comply with the conditions of the race, that no angle of less than 120 degrees shall be turned the points of the triangle are cut off by short legs a quarter of a mile in length. The angle at the starting point will be turned only twice, the start and the finish being made on the straight line of the first and third principal legs respectively. This course measures 36 nautical miles. It is all in water not less than 20 feet in depth, and excepting as to the second leg, it is fully protected from any sea excepting such as would be caused by a northerly blow.
