## SCIENTIFIC VALUE OF BARNYARD MANURE

The homely subject of barnyard manure is made highly interesting by a Missouri agricultural paper. That the farmer readers of the East Oregonian may be given the benefit of this article, it is printed in full as follows:

A load of fresh manure (one ton) contains ten pounds of nitrogen, two pounds of phosphorus and ten pounds of potassium, besides other elements of plant food not so important in point of provision, says the paper.

If figured at commercial prices, the nitrogen at 15 cents a pound, the phosphorus at 12 cents and the potassium at 6 cents, a ton of such manure would be worth \$2.34.

But bare figures are not interesting unless their relations to other things which do interest us are shown. Corn fodder, for instance, has 16 pounds of nitrogen, two pounds of phosphorus and 17 pounds of potassium. It is worth merely as manure when figured as above stated, \$3.65.

A ton of oat straw is on the same basis worth \$2.25. Wheat straw is worth \$2.75; clover hay \$3.40; alfalfa hay \$9.40; cowpea hay \$9; timothy hay \$5.35. Thus a ton of manure would be less value than a ton of our ordinary field crops, if the latter were used as fertilizer only, and also supposing them to be immediately available as plant food.

The fact that they require a longer or shorter period for decay, while manure is quickly available, accounts for the more apparent value of the manure.

It is interesting to note that a ton of manure contains sufficient nitrogen for 10 bushels of corn; enough phosphorus for 11 3-4 bushels; enough potassium for 52 3-10 bushels. For wheat there is enough nitrogen for eight bushels; phosphorus for 13 1/2 bushels; potassium for 3 61-3 bushels.

Now let us compare a ton of manure with an equal quantity of commercial fertilizer. We shall take such fertilizers as are best for some one element, rather than mixed or complete fertilizer, because the manufacturers charge extra for the mixing.

A ton of sodium nitrate has enough nitrogen for 310 bushels of corn or 270 bushels of wheat; it costs \$46.50. A ton of bone meal contains enough phosphorus for 1470 bushels of corn, or 1665 2-3 bushels of wheat; it costs \$30.

### COFFEE

Good coffee is partly in buying and partly in making; like everything else.

Your grocer returns your money if you don't like Schilling's Best; we pay him.

A ton of potassium chloride (sometimes called nitrate of potash) contains enough potassium for 4200 bushels of corn, or 3055 bushels of wheat. Accordingly, if one ton of sodium nitrate, one-third ton of bone meal and one-fourteenth ton of potassium chloride be applied to one acre, capable of producing say 50 bushels of corn, six 50-bushel crops might be taken from it and the soil still be as fertile as before.

The cost of fertilizer would be nearly \$60. The crops at 35 cents per bushel would amount to \$195. An equal quantity of manure would not produce one such crop of itself; yet at commercial fertilizer price \$60 would purchase 25 tons of manure, which would produce a 50-bushel crop without drawing upon the soil at all.

The value of manure is not limited to plant food alone, as are most commercial fertilizers. Manure has the effect of making the soil looser and more easily tillable. It gives better color and enables the soil to drain better. Also sets free other foods from the soil. Commercial fertilizers require that other things, such as straw or green manures, be added to prevent the land from becoming "killed," as the condition is often termed.

It must not be inferred from this article that commercial fertilizers are more valuable than manure. Manure does not cost the farmer \$2.34 per ton, even when he hires a hand and hauls it several miles from town or city. What we wish to show is that the farmer can afford to pay that much before he needs to think about investing in commercial fertilizers.

### AT WENAH SPRINGS.

Many Visitors to Popular Blue Mountain Resort.

The following is a list of recent visitors to the Wenaha springs: Paul Bulfinch, Weston; C. Wood, Weston; E. P. Marshall, Pendleton; D. B. Watson, Pendleton; C. ### COULDN'T GET CENTRAL.

Editor of North Yakima Paper Hurl-ed Stone Through Window to Awaken "Hello."

North Yakima, Wash., Aug. 7.—For the simple reason that Don H. Upjohn, editor of the Morning Herald, this city, in a fit of anger, threw a rock larger than a man's head through a rear window of the Pacific States Telephone & Telegraph company's building, Manager D. S. Wilkeson insists that the newspaper man either pay the costs of the broken window or stand prosecution for defacing the building.

Upjohn claims he tried for half an hour to get "central" a few nights ago just before time to go to press, and as he was unable to reach the girl with his dulcet voice he concluded she was asleep, whereupon he walked over to the office, which is across the street, and hove a rock into the room. The girl was frightened out of her wits for a minute, but saw who it was and reported him to the manager.

He will fight the case to the last ditch. The bill amounts to \$1.25.

All the news all the time in the East Oregonian.

## STEEL GUILTY OF BANK NEPOTISM

SONS-IN-LAWS ARE DEPUTY EXAMINERS.

State Bank Examiner Gives Easy Jobs Out to Members of His Family—Neither Have Had Any Banking Experience—Nepotism Is Sharply Censured.

That State Treasurer Steel seems to be determined to keep himself in an unfavorable light before the public, is shown by the following from the Portland Oregonian, which says:

Again members of the Steel family are in the spotlight, this time for nepotism. When George Steel secured for his brother James the \$3000 office of bank examiner last year, gossip ensued.

Then came the wreck of the bank of the Title Guarantee & Trust company, in which went down \$400,000 state money, afterwards redeemed by W. M. Ladd, thereby saving George Steel from responsibility for a heavy public loss.

Next was uncovered the political pact between George Steel and Banker Ross for control of state funds and their deposit in the now defunct bank, and for enactment of a "friendly" bank law, under which James Steel was appointed examiner.

All this and more brought the Steels into the limelight and made them very uncomfortable. Now again they are in the glare, this time because James Steel has appointed as assistant examiners, two sons-in-law, each of them without previous experience in banking, and one of them a failure in his own mercantile affairs.

These young gentlemen have examined the German-American bank, Ladd & Tilton and Hibernian bank, and comments in banking circles are anything but favorable to them.

Warrens was life insurance solicitor of indifferent fortune and then plunged into the lumber mill business in Yamhill county near Newberg, under the firm name, Warrens-Hun Lumber company. This venture made big debts and caused its creditors heavy losses.

Next Warrens is seen examining banks, possessed of the authority of the state so to do, reposed in him by his father-in-law. This gave the creditors of his lumber venture and others who know his unfitness for the position, a rude shock.

The talk immediately found its way into business circles and bankers who have been examined are jesting about the unpracticed inspectors that paid them a visit. The bankers are a queer lot, they imagine that years of training are needed to make a good banker or a good examiner.

Ewing is well and favorably known as a teacher in Portland Academy and as a prominent figure in the First Presbyterian church. Being without a school job this summer he has fitted snugly into the position of bank examiner. Ewing is regarded as a man of considerable ability and merit but of little experience in banking.

The work of the two examiners appears satisfactory and they seem to accomplish what the law requires. But State Examiner Steel and State Treasurer Steel both find themselves once more charged with nepotism.

### CURRY WOOL UNSOLD.

Sheepshearing Completed in Curry County, but Growers Want Better Prices.

Gold Beach, Ore., Aug. 7.—Sheep shearing is about completed in this part of the country. The clip has averaged fairly well, but there will be little or no selling at present prices. Sheepmen think a rise in prices is to be expected and almost without exception will hold for it. Offers have been made as low as 13 cents. T. S. Dickens of San Francisco lately passed through the county, but made no offers, saying he could not meet the 16 cents which was asked by the growers here. The closing of the California mills is held to be responsible for the low prices. Last year at this time wool was bringing 21 and 22 cents. The wool situation is the first touch which residents have had of the hard times.

A Cough Remedy that Cures. Hickory Bark Cough Remedy, made by the Hickory Bark Cough Remedy company, of Salem, Ore., guaranteed to cure your cough, or money refunded. Guaranteed to make a friend of you. For sale by all druggists and first class dealers everywhere. Pendleton Drug Co.

Three horses were burned to death, 50 tons of hay, two buggies and several sets of harness were destroyed in a fire which consumed the barn owned by Berry & Wilson, near Ellensburg, Wash., Monday evening.

## Lard Laden Stomachs

"Necessity" is the mother of invention. Lard is the father of indigestion.

More than half the indigestion in the country to-day is directly attributable to greasy, indigestible food prepared with lard.

Cottolene is the original anti-lard product. It was the first, and it is the best. It is purer, more healthful, and will give better results than any other shortening medium.

Just as the original is always better than the imitation, Cottolene is superior to its imitators. Ask your grocer for Cottolene, and see that our trade-mark, a steer's head in a cotton-plant wreath, appears on the pail.

Cottolene is never sold in bulk; therefore, is a cleanly product, absolutely protected from all the odors and dust to which lard is usually exposed in the ordinary grocery store.

Nature's Gift from the Sunny South

### BIG CATALOGUE IS OUT.

O. A. C. Issue 240-Page Booklet Filled With Information.

The annual catalogue of the Oregon Agricultural college for 1908-9, with list of students for 1907-8, is just off the press and the East Oregonian acknowledges the receipt of a copy at this office. It is a book of 240 pages besides 47 pages of splendid illustrations, showing to good advantage almost every phase of college life, inside and out, as found at this popular and rapidly growing institution of learning.

Something of the scope of this school will be appreciated by noting that 1156 students were enrolled last year, coming from practically every county in the state, several outside states and some from other countries. The names of 73 instructors appears in the faculty for the coming year, with four places yet to fill, quite a number having been added since last year.

A fair per cent of last year's graduates are from the agricultural department and it is encouraging to note that the percentage in this department is on the increase.

Every farmer in Oregon should have a copy of this catalogue and familiarize himself with the work of the institution, whether he has any children to educate or not.

### OREGON MARKSMEN EAST.

Rifle Team Leaves Portland Sunday for Camp Perry, Ohio.

The rifle team chosen to represent Oregon in the national contest at Camp Perry, Ohio, will leave Portland Sunday for the east. The team has been practicing on the Polk county range, and the team work is almost perfect. The opinion is general that the team this year is the strongest that has ever represented Oregon in the national shoot.

The party will consist of almost 29 men. Besides the 12 men on the first team, there will be three alternates, a team coach, team captain, and team spotter.

The Oregon boys will travel in the special Pullman car "Sunset." Every provision will be made for their comfort en route to the contest.

A sure cure, one you can depend upon. Hickory Bark Cough Remedy. A sure cure, and it's pure! Use it for all lung trouble, coughs, colds, hoarseness and sore throat. For sale by any druggist and first class dealers everywhere. Pendleton Drug Co.

### Sandbagged.

While going to his dark room in the rear of Bartholomew's barber shop at Reardan, Wash., Monday night, Lewis Moore, a photographer, was sandbagged by two men and robbed of \$65 in cash. There is no clue to the robbers.
