Glenn Sturdivant came up last evening from Hood River and will visit with friends for several days. He has been running a commission house in Hood River since June.

Herbert Thomson leaves this evening for Boise after having been here upon a short visit with his parents Mr. and Mrs. Henry Thomson. He is a linotype operator on the Boise Capital News.

Mr. and Mrs. R. W. Fletcher and family left for Portland this morning to visit Mrs. Fletcher's mother, Mrs. Eleanor Cameron. Mr. Fletcher will return in a few days, but the family will remain for some time.

Horsethief Is 81 Years Old.

Sacramento, Aug. 22.—Because of his inability to resist the temptation of appropriating other people's horses Charles Irwin, aged 81, will spend the next 10 years in prison. It practically means that Irwin will die in prison, as he is not expected to live more than 10 years. He has spent many years of his life behind the bars.

Wheat Market Quiet.

Though today has been Saturday and farmers have been in town there has been little doing in the wheat market. The price is still 75 cents for club and this is apparently too low to bring very heavy selling.

Read the East Oregonian.

AGRICULTURE IN JAPAN.

Two and Three Crops Raised Annually From One Field.

Consul Hunter Sharp of Kobe, transmits the following review of agricultural conditions in Japan, in which he calls attention to the national obstacles that confront the agriculturist, the aid extended to him by the government, and the results obtained from a very small acreage: Japan has an area of 148,852 square miles, and, according to the census of 1906, a population of 48,304,397. Sixty per cent of the people are agriculturists, and yet on account of the mountainous nature of the country, only about one-sixth of the total area is under cultivation.

Efforts are being made to enlarge the small, irregular lots into which arable land is divided; to rearrange and straighten roads built for agricultural purposes and waterways; to put to profitable uses pieces of land which now lie waste among cultivated fields; to improve land by irrigation; and to promote the use of machinery in agricultural pursuits.

Recent investigations have been made as to the possibilities of converting woodlands into rice fields by utilizing the water of certain rivers, and the scheme has been found feasible. As the result, 3000 acres of land in the prefecture alone will be taken up for cultivation in the near future.

With the object of facilitating the supply of capital for agricultural purposes, the government in 1896, established the Hypothec Bank of Japan, as well as the Agricultural and Industrial banks.

The government, moreover, established experimental stations at Tokyo and in certain provinces for the purpose of making experiments in the selection and supply of seeds and seedlings, also to make investigations relative to insect pests and agricultural implements.

The farm laborer works from sunrise to sunset. Men receive 17 to 23 cents, and women 10 to 15 cents per day, the employer paying for their subsistence.

The value of farm land varies according to proximity to market and quality. The average value of rice fields is about \$1.50 per tan (tan equals 0.2451 acre); and for uplands \$50 per tan. Taxes assessed on these lands are: National tax, 5 1/2 per cent of the value of the land; prefectural tax, 17 1/2 cents for every 50 cents of the national tax; village tax, 4 1/2 cents for every 50 cents of the national tax. Taxes for repairing roads and water privileges vary from 50 cents to \$1 per tan.

Naval Recruits are Deserters.

Ogden, Aug. 22.—It is reported that there are wholesale desertions from ranks of naval recruits being transported to the Pacific fleet. But three remain out of the original 60. The special train engaged by the government to take them to Oakland from Ogden was cancelled today. The deserters are being sought.

More Money to Fight Plague.

San Francisco, Aug. 22.—Word was received from Washington that the government has appropriated \$3300 additional a month for the suppression of the plague in San Francisco. There have been two cases in two months. The money will be used to catch rats.

Married in a Lion's Cage

Sacramento, Aug. 22.—That Cupid laughs at lions as well as at locksmiths is the discovery made by J. A. Flecher, secretary of the state fair opening here next week. He advertised a reward for couples to be married in a lions cage and several accepted.

Peculiar how absolutely certain the average man is as to just whom to credit when he succeeds and whom to blame when he fails.

NO BOOZE AT WESTON.

The Leader Says That the Normal School Town Is Orderly.

The Weston Leader says of the success of prohibition in that town:

Reports are circulated every now and then about the enormous quantity of "booze" guzzled in prohibition towns, but Weston's experience is quite the contrary.

There are no arrests, no drunkenness, no disorder. Young men who formerly made themselves conspicuous and obnoxious by getting drunk, are now sober and decent and gentlemanly. Since it is no longer an easy matter to acquire a hilarious jag with a bunch of boon companions, they seem to have dismissed all thought of their erstwhile thirst, unless a jaunt across the state line brings them into proximity with licensed booze emporiums.

And then they come back sober, desiring to be sober in a sober town. Near beer is sold here, but it is genuine near beer, and does not intoxicate. People drink it openly as they would lemonade, and not behind a screen, and after a glass or two go on about their business.

They do not reel out of a saloon door, lips adroit, eyesaleer and legs atremble, tongue afoul with oaths and

spittle. They are their own masters and King Alcohol is dethroned.

Yes, prohibition is an unqualified success at Weston, to which fact we cite the sage attention of the Rev. Andreas Bard.

Light and heavy buggies of all kinds at Nissen Implement Co.

It's All in the Eye

Thread Your Machine Without Looking.

Costs a little more—worth a lot more than the old style needle.
