HOW CAN YOU SPARE THE TIME

JAPANESE CANNOT UNDERSTAND ENTERTAINMENT ACCORDED

Do Not See How Professional and Business Men Can Afford to Give So Much Time to Entertaining Party—In Orient Time and Labor Are Cheap, in America of Highest Value.

Spokane, Sept. 15.—"One of the many surprises in this wonderful inland empire of the west which members of our party and myself are unable to understand, is how your business and professional men, energetic and enterprising as they must be to keep in the van of progress, could afford to give so much valuable time to our entertainment and comfort."

"There are many things which the oriental mind fails to grasp, but the foremost of these is what I have mentioned. In the orient the cheapest things are time and labor, while in America they are the highest. I appreciate the fact that minutes mean dollars to the Americans and why your professional men, mechanics and laborers are paid what to us would be princely incomes, but I cannot understand how hundreds of your business men could lay everything aside for three days, as you have during our stay in Spokane, solely for the

purpose of making our visit one of pleasure and profit. We shall long remember the warm friendship, hospitality and kindly courtesy of the people of Spokane and the inland empire."

Deafness Cannot Be Cured.

by local appliances, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

CUT IN RATES HIGHLY SALUTORY

ACTION OF WASHINGTON COMMISSION WILL SAVE MONEY

In Forcing Northern Pacific to Reduce Rate 12 1-2 Per Cent They Save Shippers Big Amount—Reduction Ordered Because Company's Profits Are Excessive.

Spokane, Wash., Sept. 15.—Shippers in Spokane and throughout the inland empire, where enormous tonnage in grains, fruits, timber and minerals is offered to railroads, believe that the action of the state railroad commission of Washington in ordering the Northern Pacific Railway company forthwith to reduce its freight rates on grain to 87 1-2 per cent of the tariff published on June 30, 1909, will have a salutary effect all over the northwest. Though the cut of 12 1-2 per cent applies only on the Northern Pacific main line in the state, it will save the shippers from one to one and a half cents a bushel or between \$50,000 and \$500,000 a year.

The reduction, based on the finding that the company's profits are more than \$1,000,000 a year exclusively on state business over a 7 per cent annual revenue on the investment, is taken to mean that inquiry may be made into other tonnage, the carrier charges on which are declared to be unreasonable, excessive and exorbitant. The significant portion of the commission's finding is best told in its own words, in part as follows:

"We have found the value of the Northern Pacific Railway company's property in the state used for the public to be \$111,374,950, divided \$45,703,730 for state use and \$65,671,219 for interstate use.

"We have found as facts that the net earnings of the company from state business were \$4,976,273 for 1908, \$5,174,047 for 1908, \$5,600,373 for 1907, and \$6,223,943 for 1908.

"The earnings of the Washington & Columbia river branch are not included in the earnings for 1908-6-7, so the value of the property used would be correspondingly reduced. The value of its property used for state business during 1908-6-7 would not exceed \$42,500,000.

"The estimated net earnings of the company from state business for 1908 exceeds \$8,450,000, thus showing a net return from state business for the five years under consideration of 11.7 per cent, 12.17 per cent, 13.17 per cent, 13.62 per cent, and 17.51 per cent, respectively. That this return with the percentage increasing yearly, is excessive is clearly evident."

The finding shows that grain amounted to 18.97 per cent of the total state tonnage carried by the company over its lines in Washington and to 45.07 per cent of the total ten miles, and furnished 33.99 per cent of the total state revenue received by the company in 1908. Sixteen million bushels of grain was carried by the company. The cost of movement, exclusive of taxes, interest of dividends, was approximately \$9668 a ton, while the average receipt per ton was approximately \$3.02, the moving cost being approximately 32.01 per cent of the gross earnings, the operating expenses of the road on all its business being 54.11 per cent of the gross receipts.

Carload merchandise constituted 11.54 per cent of the state tonnage and 14.84 per cent of the ton miles, while it contributed 19.16 per cent of the total state earnings, and the cost of moving was only 25.89 per cent of the gross earnings. Less than carload merchandise constituted 3.83 per cent of the tonnage, 3.5 per cent of the ton miles, and contributed 16.26 per cent of the total state earnings, the cost of moving being 51.93 per cent of the gross earnings therefrom.
