In order to reduce our stock of sweater coats which is entirely to large. We will give the following

\$2.50 SWEATER COATS WILL GO FOR	\$1.95
\$3.00 SWEATER COATS WILL GO FOR	\$2.35
\$3.50 SWEATER COATS WILL GO FOR	\$2.80
\$3.75 SWEATER COATS WILL GO FOR	\$2.95
\$4.00 SWEATER COATS WILL GO FOR	\$3.15

100 Silk Petticoats---Saturday Only

THE GREATEST SPECIAL OF THE SEASON

All colors, good grade silk, regular \$5.00 values, Special Saturday Price **\$3.25**

SHOE DEPARTMENT

Our shoe department is in itself a complete shoe store, the busiest in Eastern Oregon. Something doing all the time.

We are offering greater bargains in our sale of men's and women's fine footwear. Come while we have your size.

Men's shoes at \$2.95 Women's shoes at \$2.79

Don't forget the "Red Goose" the finest and best school shoe for boys and girls.

THE PEOPLES WAREHOUSE, Where it Pays to Trade

Agents for Carhartt Overalls, Jno. B. Stetson Hats, Red Man Collars, Blacks Gloves.

SHE USED HER BRASS KNUCKLES ON WOMEN

PUGILISTIC MATRON CLEARED ROOM AT SOCIETY MEETING

Incurred Enmity of Her Fellow Cohorts, But Undismayed, Faces Them and Scatters Them With Brass Knuckles—Fined Five Dollars in Court.

Pittsburg.—Mrs. Mary Cepola, an athletic looking young matron of Wilmerding, is under conviction of attacking Mrs. Stella Pokal and others comprising the Ladies' Beneficial society at Wilmerding.

There was developed in the trial much of the humorous, and Judge Ford showed a great deal of interest in the case after it had been shown that Mrs. Cepola had used brass knuckles in a fight in which she admittedly whipped the rest of the Ladies' Beneficial society, consisting of more than twenty women. The court was evidently much impressed with the defense of Mrs. Cepola, who declared that she had not resorted to the knuckles until she had been knocked down twice.

The court hearing developed that Mrs. Pokal had been treasurer of the Women's Beneficial society for some time, and there had been some bad blood politically between her and Mrs. Cepola. Mrs. Cepola had demanded an auditing of the society books, and it was brought out at the trial that Mrs. Pokal had asserted that she would whip Mrs. Cepola, that she would whip Mrs. Cepola on sight as a trouble maker. It appears that Mrs. Cepola who had the fewer members of the society on her side, decided when she started to attend a meeting recently that she would slip her husband's brass knuckles into her stocking—to be used in case of trouble.

The trouble was not long in starting, nor did Mrs. Pokal delay starting for Cepola. One of the members of the Ladies' Beneficial society said on the stand that Mrs. Pokal "sort of butted Mrs. Cepola and knocked her over the table." Other evidence was that as Mrs. Cepola struggled to her feet she was again flogged by an unabridged dictionary, which caught her in the back of the neck.

Mrs. Cepola appears to have become angry about this time, but before getting to her feet for another knock-down she reached into her stocking for the knuckles, and tossing off several members of the Ladies' Beneficial society who were trying to tramp on her face, she got into action. Mrs. Pokal showed in court the scar which Mrs. Cepola made on her face when she first swung with the brass knuckles.

Mrs. Cepola appears to have had things pretty much her own way after she came back with the brass piece, and she hammered both friend and foe alike, clearing the whole room, chasing all members of the Ladies' Beneficial society out into the weather without their wraps, then threw their wraps over them.

Judge Ford even smiled when it was shown that the longer Mrs. Cepola pondered over the table and flogged, by a dictionary the madder she got; that next midday she started out to whip Mrs. Pokal again, this time without the knuckles, but found her already in bed, under the doctor's care, from the other beating she had

gotten. Mrs. Cepola was fined \$5 and costs by Judge Ford.

MAN GONE, DOG GONE, TOO.

"Love Me, Love My Dog" Motto Results in Banishment of Officer. Washington.—Col. Clarence Deems of Fort Hancock, N. J., who has been a problem for the war department for some time because, among other things, of the devotion he has for his dog, has been ordered away from his station at that place and sent all the way out to the Presidio at San Francisco. And the little waggly-tailed canine was one of the remote causes for the change.

Some time ago Col. Deems was in command of the artillery district of Fort Howard, Maryland. While at that post his constant companion was a little dog—so constant a companion in fact, that his brother officers said that it toddled at his heels in the day time and slept at his feet at night.

The dog became such a source of discomfort to the other officers and men at the post that protest was made to the war department against Colonel Deems on this ground. Other objections were filed, but the dog occupied the center of the arena in the quiet investigation that followed. It was after this that the department decided that Col. Deems who didn't seem to gibe temperamentally with the officers under his command and insisted on standing by the dog, should not be placed at the head of a district. Accordingly he was relieved from command at Fort Howard and sent to Fort Hancock under Colonel Walter Howe.

Now President Taft has decided to make Howe a brigadier general and to place Col. John V. White in command of Fort Hancock. As Col. White is junior to Col. Deems it was necessary to transfer the latter. The troubles of Col. Deems have never reached so acute a stage as to necessitate his banishment to Arizona to command an abandoned post, which was the method adopted by the war department to induce Colonel Stewart to retire, but there is no telling what may happen if the department persists in refusing him a command.

Caught in the Rain
Then a cold and a cough—let it run on—get pneumonia or consumption, that's all. No matter how you get your cough, don't neglect it—take Ballard's Horehound Syrup and you'll be over it in no time. The sure cure for coughs, colds, bronchitis and all pulmonary diseases in young and old. A. C. Koepfen & Bros.

SOME EXPERT OPINION ABOUT SURETY COMPANIES

Washington.—The treasury department has promulgated an opinion of the attorney general relative to the requirement of state licenses of surety companies as a prerequisite to doing business with the United States.

Under the existing regulations of the department, a bond cannot be accepted by any officer in the treasury department if executed by a company or its agent in a state where the company has not obtained a state license. Under the opinion just promulgated, the department rules that an officer may accept a bond if executed by a surety company at its home office or at an office outside of the boundaries of the state wherein it has no license, for a principal residing in such state or to a contract to be performed therein.

The attorney general holds that such bonds running to the United States are valid and enforceable against the company whether or not it maintains an agency in the state in which the principal resides, and that

the execution of a bond in this manner would not be doing business within the state, within the meaning of the law.

FEDERAL BUILDING ON OLDEST STREET IN U. S.

Washington.—More than usual interest attaches to the selection recently made by the treasury department of the site for the federal building at Plymouth, Mass. For this purpose the property of the Baptist church at Leyden and Main streets has been acquired.

It happens that these are the two oldest streets in the United States, having been laid out in 1620. The lot selected is the one originally assigned to William Brewster, the "Ruling Elder" of the Pilgrim church. On this spot Brewster lived and disseminated that religious liberty which distinguishes the United States among the nations.

Governor Bradford's house was on the opposite corner, hardly 100 feet away, and at the head of the street is Town Square, overlooked by historic Burial Hill.

The government house of the colony, which gave way in 1749 to the court house, in 1820, became the town house. The latter is still in use as the municipal office center, and is only 200 feet distant from the postoffice site. The price paid for the site was \$22,000.

"SMILE, DAMN YOU, SMILE," MOTTO OF PRESIDENT

Washington.—President Taft's smile is already famed in song and story. It is the outward manifestation of geniality, good will and humor. But not infrequently it hides a presidential disappointment, and even a heartache.

For weeks recently the president was considering the names of candidates for appointment to two vacancies in the government service. At last he sifted out the two men whom he thought would fill the jobs satisfactorily. Somehow the names of these two candidates became known and immediately there began to pour into the executive offices letters and telegrams making all kinds of charges against the two men and so substantiating them that it was impossible for the president to make the appointments.

Speaking of the matter to one of his cabinet officers, President Taft said, rather ruefully, as he contemplated the upsetting of his long labors:

"Look at these last-hour returns. I've got to do the work all over again. Gee! If I couldn't smile I would have to resign from the presidency."

Hay for Sale.
Oat, mixed alfalfa, wild grass and timothy hay for sale at \$15 to \$20 per ton, f. o. b. cars Elgin branch. ELGIN FORWARDING CO., Elgin, Ore.

Choice Wheat Farm for Sale.
800 acres 2 miles from Helix; fair improvements; fine well. Price \$50,000. Leased to 1912. Easy terms. JOHN A. GROSS, 814 Boyer Ave., Walla Walla, Wash.

Girls.
Why have your shoe soles nailed on when we sew them on at 65c a pair. No swell dressed man or woman wants their shoes full of nails. A. EKLUND.

No interest, no taxes, title free and all improvements included in price of lots. See Jacobs-Stine representative today, sure.

PACIFIC COAST IS SINKING, SINKING

PORTLAND GEOLOGIST TAKES ISSUE WITH CONTEMPORARIES

Claims Lifetime Study of Geological Phenomena in Northwest Qualifies Him to Be Best Judge—Objects to Other Current Hypotheses.

Portland.—"The whole Pacific coast is sinking notwithstanding the consensus of opinion of scientific experts of the United States geological survey and others to the contrary. I can prove it by conclusive arguments and I can back my arguments with irrefutable data if I can only get a hearing. I have devoted a lifetime to a detailed study of geological phenomena in the northwest and I know that I am right. But because I stand alone in my theory I have not been able as yet to prevail upon any scientific journal of note to publish the facts that I have gleaned after years of delving into the mysteries of strata."

Such was the forceful statement made by W. Hampton Smith, a pioneer geologist of Portland, at a session of the Portland Academy of Sciences last Saturday night.

Can Advance Proof.
"My worthy contemporaries have further promulgated the hypothesis that the basaltic formation found in the Willamette valley and elsewhere on this coast belongs to the miocene or some later period of the tertiary age. They are absolutely wrong about this. I can, I think, advance conclusive proofs of their error," he continued.

"No, the government experts are surely mistaken when they say that the Cascade mountains, for instance, are of miocene origin. From laboratory investigation I have become convinced that the formation dates back, at the very latest, to the end of the cretaceous period, or the early part of the eocene period."

"No more palpable error can be made by a geologist than to say that the Pacific coast is rising. This is not true. The geological movement is downward. Every mark, characteristic and phenomena of submerging coast is evident from Behring sea to the Gulf of Lower California. No, ladies and gentlemen, this section of the globe was never under salt water in the miocene period of the world's evolution."

"It has been said that shells bearing the marks of the miocene period have been found on this coast. I seriously question the correctness of this. I never found any such shells. That shell game, I am inclined to believe, has been overworked."

Gravel Deposits of Glacial Origin.
Mr. Smith also advanced many arguments to show that the gravel deposits of the Willamette valley are of glacial origin, in spite of the fact that the government experts hold to the idea that they are the result of stream action. One of the most telling points was that the gravel could not have been deposited by the Columbia and Willamette rivers for the reason that it is found scattered all over Multnomah and Clackamas counties. Had the gravel been deposited by streams, he maintained, it would have been found only along their courses.

The geologist told some interesting facts observed by him in the course of 50 years of study of the coast strata. He explained the phenomena of cedar trees with basalt cores and basalt bark by expressing the belief that hollow logs while caught in the glacial period and buried in the ice were filled with lava, poured forth in immense volumes from one of the many vents in the Cascade ranges.

Talks of Logs and Stumps.
These logs, he said, might have been carried for hundreds and thousands of miles before being dropped where they were found. He told of stone stumps, and even of stone brush piles, which he had found in various localities of the northwest.

LEMONS STOP WHISTLING.

Pastor Has His Congregation Whistle Aps—Boys Produce Lemons, Whistling Stops.

Spokane, Wash.—Seven bright newboys, each carrying two juicy lemons, started a small riot in First Baptist church of Spokane, where Rev. Dr. J. W. Kramer, pastor, introduced a novelty by having the congregation whistle the airs of the religious hymns instead of depending upon the choir. The minister called for the hymn, "I Need Thee Every Hour," and 700 members of the congregation and a couple of hundred visitors puckered their lips and went to the heart of the composition. Just then the small boys, stationed at places of vantage, brought forth the lemons and bit into the yellow skins in an endeavor to extract the juice. A titter ran over the auditorium and then there was a noise not unlike the exhaust of a blacksmith's bellows. Some of those not in range of the sight of the boys with the lemons kept bravely on, but they took notice in a short time and one of them grabbed for the boy nearest to him. The youngest escaped and his getaway was a signal for the other six. Dr. Kramer tried to rally the whistlers, but the sight of the lemons had taken out all the pucker and the rest of the hymns were sung.

"Appearances are deceitful," said the Self Made Merchant to his son, "and so long as they are, better have 'em deceive for us instead of against us." If you get Hart Schaffner & Marx clothes of the Peoples Warehouse your appearance will speak well for you.

Cheese is now being made from the soya bean. The hitherto respectable and unassuming bean is forming associations that may bring it into ill-repute.

S.S.S. CURES BLOOD POISON

Removing the outward symptoms is not all that is necessary to cure Contagious Blood Poison. The virulent germs which produce these external manifestations must be completely driven from the blood before a real cure can be effected. The least taint left in the circulation will sooner or later cause a fresh outbreak of the trouble, with all its hideous symptoms of ulcerated mouth and throat, copper-colored spots, itching hair, sores and ulcers, etc. Only a blood purifier can cure Contagious Blood Poison. Medicines which merely check the symptoms for a time, because of their strong mineral nature, and leave the poison smoldering in the system, have brought disappointment to thousands. The disease always returns after such treatment. S. S. S. cures Contagious Blood Poison and cures it permanently. It goes into the blood, and removes every particle of the poison, making the circulation pure, rich and healthy, nor does S. S. S. leave the slightest trace of the disease for future outbreaks. S. S. S. does not contain any mineral ingredient, but is made entirely of roots, herbs and barks, which are most valuable in their blood-purifying properties, and at the same time specifically adapted to building up the entire system. If you have Contagious Blood Poison S. S. S. will cure you because it will thoroughly purify your blood. Home Treatment Book and any medical advice free to all. THE SWIFT SPECIFIC CO., ATLANTA, GA.

RAILROAD YARD TWO MILES UNDER GROUND

IDAHIO MINE HAS ONE BLASTED FROM ROCK

Morning Mine of Guggenheims Has Largest Railroad Yard Underground—Work Done by Old Football Star—Electric Cars Handle Ore.

Spokane, Wash.—Blasted out of solid rock, two miles underground, in the heart of a mountain near Mullan, Idaho, is a fully equipped railroad yard with electrically propelled cars handling the rich lead-silver ore produced by the Morning mine, owned by the Federal Mining & Smelting company. The work, just completed under the direction of Charles K. Cartwright, formerly a University of Pennsylvania football team, required more than a year and involved the expenditure of several hundreds of thousands of dollars and the labor of many men.

The yard, which is the only one of its kind in the northwest and the largest in America, is 200 feet in length and 36 feet in width, the height ranging from 20 to 100 feet. The electrical apparatus, hoisting machinery and boilers are in a chamber, 50 by 78 feet and 20 feet high, while in the rear of the four-compartment shaft, now under construction, is an ore bin, 20 by 25 feet high, with a capacity of 1500 tons. The shaft will be sunk to reach a depth of 2500 feet.

The foremost mining experts in Spokane and in the Coeur d'Alene say the fact that the Federal company, which is controlled by the Guggenheim interests, is expending a fortune in deep mining is proof of faith in the permanency and richness of the ore deposits at great depth in the Coeur d'Alene district.

This work has revised interest in the district, which produced about 40 per cent of the total lead output of the United States in 1909, and indications are that many properties which have been idle for years will be put in shape for active operation during the coming year. There is also renewed interest in placer mining in that and other parts of northern Idaho.

GIRL MAKES RACE TO ENGLAND AGAINST DEATH

Spokane, Wash.—Florence Mockett, a student in the training depart-

ment for nurses at Sacred Heart hospital in Spokane, is making a race against death in an effort to reach the bedside of her mother, wife of James Mockett, owner of the Savoy hotel in London, Eng. When a cablegram came to Miss Mockett from the king's specialist who has charge of the case, announcing there is only a fighting chance that the woman will live until her daughter reaches England, she lost no time in boarding the fastest train for Chicago, going thence to New York to board the swiftest steamship from that port to Liverpool. J. J. Brown, owner of a string of banks in eastern Washington and northern Idaho, and Mrs. Brown, who brought Miss Mockett to the United States four years ago when she was 17 years of age, completed arrangements for the trip by telegraph from Chicago, where they are visiting.

"Clothes don't make a man," said the Self Made Merchant to his son, "but they make all of him during business hours except his hands and face." Such clothes as Hart Schaffner & Marx make, sold by the Peoples Warehouse, makes some pretty good looking men.

See Jacobs-Stine Co., representatives today. Their Portland real estate proposition is a good one. Early selection makes best choice.

Write or Ask Druggists For this Free Sample

There is enough Kondon's Catarrhal Jelly in this free sample—send for a penny postal—for several days' treatment—enough to give instant relief from cold in the head or nasal catarrh, etc. This wonderful, pure remedy (in sanitary tubes) is applied direct to the raw surfaces. It is soothing and healing. That it gives instant relief, and its continued use will cure permanently all forms of catarrh. Over 35,000 druggists sell it in 2c and 50c tubes. Doctors, nurses, druggists recommend it. The sample proves. Ask your druggist or write today for free sample.
